

Helping you prepare and stay safe

To keep you and your community safe, we use advanced safety tools to help prevent wildfires. Using these tools may result in safety power outages. Support is available to help you prepare.

Wildfire safety outages may occur when we:

- ✓ Proactively turn off power as a last resort during dry, windy weather. This is a Public Safety Power Shutoff (PSPS).
- ✓ Enable Enhanced Powerline Safety Settings, which automatically shut off power if a wildfire threat is detected.

Get help creating your emergency plan so you're ready

- ▶ For emergency planning tips, visit **[safetyactioncenter.com](https://www.safetyactioncenter.com)**.
- ▶ Receive planning assistance for certain medical needs. Visit **[disabilitydisasteraccess.org](https://www.disabilitydisasteraccess.org)**.

See reverse for more resources.

Access the resources you need to prepare for wildfire safety outages

- ▶ See if you qualify for a free battery or generator rebate at **pge.com/backuppowers**.
- ▶ Get extra support if you rely on power for health or safety. Visit **pge.com/disabilityandaging**.
- ▶ Access 24/7 support, including food, lodging and transportation. Call 211, text "PSPS" to 211-211 or visit **211.org**.
- ▶ During a PSPS, locate your Community Resource Center for basic supplies, Wi-Fi and charging stations at **pge.com/crc**.
