Date Sent:	March 3, 2021	Requesting Party:	Public Advocates Office
PG&E Witness:		Requester:	Alan Wehrman

The following questions related to PG&E's 2021 Wildfire Mitigation Plan (WMP) Update.

QUESTION 08

In response to data requests in CalAdvocates-PGE-2021WMP-01, Question 4, PG&E provided a table including all distribution circuits and 2020 wildfire mitigation work performed on each circuit. The data in columns L, M, and N for EVM mileage appears to contain errors. In several cases, the sum of EVM mileage exceeds the length of the circuit. Additionally, the total EVM mileage performed across all circuits sums to 16,518 miles. However, per p.4 of PGE's 2021 WMP, PG&E performed 1,878 miles of EVM work in 2020.

- a. Please explain the discrepancies discussed above with respect to 2020 EVM work.
- b. Please provide an updated version of this spreadsheet that reconciles the discrepancies noted and corrects the data as needed.

ANSWER 08

- a. In the attachment "WildfireMitigationPlans_DR_CalAdvocates_035-Q04-Atch01" (*CalAdvocates-PGE-2021WMP-01*) the mileage breakdown for EVM was incorrect due to a transposition error. Please see the corrected response referenced below.
- b. Please see attachment "WildfireMitigationPlans_DR_CalAdvocates_044-Q08-Atch01.xlsx" (*CalAdvocates-PGE-2021WMP-10*) with the corrected breakdown of EVM 2020 mileage by HFTD and non-HFTD areas. The approximately 29 miles outside of Tier 2 and Tier 3 are due to segments that start inside a Tier 2 or Tier 3 HFTD area and end outside of the Tier 2 or Tier 3 HFTD area. In these circumstances the full segment is completed, including the mileage outside of the HFTD area.
