The following questions relate to your 2022 WMP Update submission.

QUESTION 05

Page 645 of PG&E's 2022 WMP states, "Vegetation identified as pending Priority 2 work within the Red Flag Warning (RFW) area will be reviewed and re-prioritized if determined necessary by the local PG&E VM Point of Contact."

- a) Please describe the steps PG&E takes to review and re-prioritize vegetation identified as pending Priority 2 work within the RFW area.
- b) On average, how long does it take PG&E to review and re-prioritize such vegetation?

ANSWER 05

- a) Pre-Inspectors follow Procedure 'TD-7102P-23' for Red Flag Warning procedure and 'TD-7102P-17' for Priority Tag Procedure to review and re-prioritize work within the RFW area.¹
- b) The amount of time required is variable based on factors such as size of area, number of locations, and difficulty of access. At this time, we have not analyzed the time it takes to review and re-prioritize such vegetation.

¹ Procedure TD-7102P-17 is available on our WMP website at [Wildfire Mitigation Plan Discovery/Data Requests \(pge.com\)](https://www.pge.com/wildfire-mitigation-plans-discovery/data-requests),
