

Agricultural Customers

Find the best rate plan options for your business

We provide a range of options for electric service. Select the rate plan that best fits the needs of your business.

Log in or register at [pge.com](https://www.pge.com) to:

- Get detailed information about your current usage
- Improve your bottom line with the business energy savings quick tool
- Learn about Time-of-Use rate plans

In addition to these online tools, you can call **1-877-311-FARM (3276)** for help with a rate analysis.

Electric Rate Plan Options

For details and more information on all electric rate plan options, visit [pge.com/tariffs](https://www.pge.com/tariffs).

Time-of-Use

Time-of-Use rate plans can help save money on your energy bills. By shifting energy usage to off-peak hours when demand is lower and renewable energy is more plentiful, you can reduce your expenses while supporting a cleaner and more reliable energy grid.

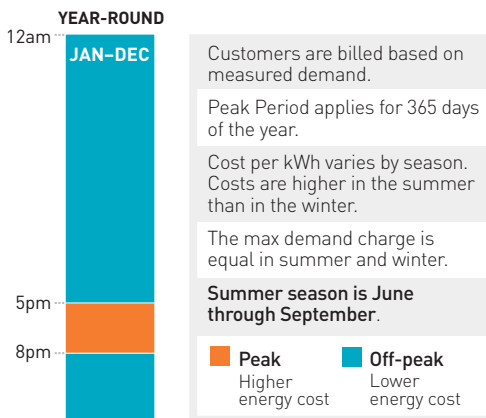

Most agricultural customers are on one of the Time-of-Use rate plans below with peak hours from 5 p.m. to 8 p.m. Remaining customers who are eligible for default will transition **annually each March**.
[pge.com/tou](https://www.pge.com/tou)

Ag<35 kW Low Use (AG-A1) is for small agricultural businesses with low to moderate operating hours and demand less than 35 kW.

Ag<35 kW High Use (AG-A2) is for small agricultural businesses with high annual operating hours and demand less than 35 kW.

Ag35+ kW Med Use (AG-B) is for medium agricultural businesses with low to moderate operating hours and demand 35 kW or greater.

Ag35+ kW High Use (AG-C) is for large agricultural businesses with high annual operating hours and demand 35 kW or greater. Only the AG-C rate plan includes Summer Peak Demand Charge and Demand Charge Rate Limiter.

AG-F (Flex) is a flexible rate option available for agricultural businesses that can limit operating hours to two off-peak days per week (Wednesday and Thursday, Saturday and Sunday or Monday and Friday). This rate plan has peak hours from 5 p.m. to 8 p.m. on five days per week instead of seven. In exchange for two off-peak days, peak prices on this rate plan will be higher than peak prices on a seven-day per week peak hour rate plan.

Peak Day Pricing

Peak Day Pricing (PDP) offers agricultural customers a discount on summer electricity rates in exchange for higher prices on 9 to 15 PDP Event Days per year. PDP event hours are from 4 p.m. to 9 p.m., while Time-of-Use peak hours are from 5 p.m. to 8 p.m.

Clean Energy Alternatives

Renewable Generation (e.g., Rooftop Solar) enables you to install a generating system, interconnect to the PG&E grid and receive credits to offset the cost of your energy usage. With certain additional requirements, storage can also be installed to increase the value of your system.

The current renewable generation program (Net Energy Metering 2) will be closing on April 14, 2023. If you submit an application after this date, you will be enrolled in the Solar Billing Plan.

NEM2A will remain available after this date, but with only a 9-year legacy period, and is only available to customers having two or more meters as of December 15, 2022.

Renewable Feed-in Tariffs offer long-term wholesale electric energy contracts to eligible generators.
[pge.com/feedintariffs](https://www.pge.com/feedintariffs)

Note: Direct Access and Community Choice Aggregation customers purchase electricity from another provider and receive electric transmission and distribution services from PG&E. These customers are eligible for many, but not all, of the rate plans or features listed in this notice. To learn more, contact your provider.

Programs to Save Money

Emergency Load Reduction Program (ELRP)

offers incentives (\$2/kWh) for voluntarily reducing energy consumption during times of high demand on the grid. No penalties are associated with participation.

elrp.olivineinc.com

Capacity Bidding Program (E-CBP) offers incentives to eligible customers for reducing their energy consumption upon request. A customer may only enroll in Schedule E-CBP through an Aggregator.

pge.com/cbp

Automated Demand Response Incentive (ADR)

offers a one-time incentive to help pay for the installation of automated controls to shed load during a demand response event upon a signal sent by PG&E. Requires enrolling in a demand response program.
