SUBJECT: REGARDING UNDEFINED TERMS IN 8.4.6

QUESTION 017

PG&E discusses “red tagged” customers, “impacted” communities, and “impacted” customers (including cities, counties, and tribal governments) in Section 8.4.6; however, definitions of such terms are not provided.

- a. Provide a definition, as it pertains to both wildfire and PSPS events in the context of Section 8.4.6, and the criteria for these groups being identified as such for:
 - i. “Red tagged” customers
 - ii. “Impacted” communities
 - iii. “Impacted” customers

ANSWER 017

Red Tag: For natural disasters, including wildfires, in which the Governor or POTUS declares a State of Emergency, the official definition comes from ***D.19-07-015 (page 16)*** “...when a disaster(s) has resulted in the destruction or damage of a structure, such that utility service is disrupted voluntarily or involuntarily due to safety concerns or reconstruction activities to address the damage from a proclaimed state of emergency event...”.

Impacted Communities: this term was used as shorthand for all impacted customers and facilities.

Impacted Customers: In a typical wildfire event, PG&E uses the fire perimeter maps available on **National Inter-Agency Fire Center** website and expand them by 2 miles each day. Any customer attached to a meter within the extended perimeter becomes an “impacted customer”. The list of impacted customers and structures are refreshed daily, until the fire is contained.
