

# Empower your community with California sunshine

**PG&E's Local Green Saver\* program offers residential customers in select communities access to local solar power and a 20% electric bill discount at no added cost.** Customers can now save money and access renewable energy within their own community. This program is available to residential customers, including renters and customers in homes not suitable for traditional rooftop solar.

## Program benefits

- **20% electricity bill discount** in addition to any CARE, FERA, or Medical Baseline discounts
- Positively impact local communities through **increased clean energy use**
- **Job creation** opportunities with renewable projects in local communities
- 100% of participants' electricity comes from **renewable solar projects in their communities**

## Eligibility

- Available to residential customers only
- Customers must receive energy from PG&E and live in select communities within 5 miles of a participating renewable project
- Customers must be CARE or FERA-eligible. If you are not already enrolled, you will be prompted to apply for CARE or FERA during your Local Green Saver enrollment process
- Net Energy Metering (NEM) customers are not eligible for this program, including rooftop solar customers

## How to apply

Visit [pge.com/greensaver](https://pge.com/greensaver) to:

- Confirm you are in an eligible community with a nearby solar project
- Log into your PG&E online account to complete your application process

If your application is approved, you will be enrolled in the program when your nearby solar project starts generating energy.

## FAQs

### **Will I have to pay to participate in the program?**

PG&E's Local Green Saver program offers customers in eligible communities access to solar energy at no additional cost and you will receive a 20% discount on your electricity bill.

### **Which communities are eligible?**

To be eligible, a community must be listed as a disadvantaged community and be located within 5 miles of participating solar project. Disadvantaged communities are those most impacted by socioeconomic factors and pollution according to the CalEnviroScreen tool. Communities on tribal lands are also eligible.

### **How does the Local Green Saver program compare to traditional rooftop solar?**

For many customers, rooftop solar can be a good option. However, many rooftops are unsuitable for solar because of structural, shading, ownership, or financial barriers.

With the Local Green Saver program, PG&E works with solar developers on behalf of customers to create solar projects that will help customers access solar benefits, without installing panels.

### **Is there a long-term commitment?**

There is no contract required when enrolling for PG&E's Local Green Saver program. You may leave the program at any time, but will not be eligible to re-enroll for one year.

### **Can I start getting solar energy immediately?**

The construction timelines for each solar project vary, but PG&E plans for the first projects to come online in 2023.

The solar project in your community may not be live at the time you submit your application. In this case, you will be added to the project's waitlist and PG&E will automatically enroll you until the project is full. There is no additional action needed from you.

### **When should I expect to receive savings?**

After applying online you will receive a confirmation email from PG&E stating whether you are placed on the waitlist or enrolled directly in the program. If you are on the waitlist, you will receive an additional email when you are added to the program. Once you are enrolled in the program (not on the waitlist) you will begin seeing discounts applied to your bill.

### **Can the program fill up?**

Yes. The programs will remain open for enrollment until the program reaches full capacity. Once full, new applicants will be placed on a project waitlist. Each project will have its own waitlist. PG&E will review and add waitlisted customers to the program as space becomes available on a per project basis.

### **Do I have to apply online?**

No, but applying online at [pge.com/greensaver](https://pge.com/greensaver) is the quickest method for completing your application because it automatically determines whether there are any projects you are eligible for in your community. If you are unable to complete your application online, PG&E representatives may assist you with enrolling into the Local Green Saver program by calling [1-800-743-5000](tel:1-800-743-5000).

### **Can PG&E residential customers participate in these programs?**

Yes. These programs are available only to residential customers with the exception of the sponsor which may be a non-profit community-based organization or local government. Go to [pge.com/greensaver](https://pge.com/greensaver) for more details.

### **How long can I be on the program?**

You may be enrolled in the program for a maximum of 20 years.
