College of San Mateo

Power & Electrical Systems Certificate Training Program

This one-year certificate program is for you if you like:

- Working with electronics
- Designing, testing and troubleshooting
- Working with computers
- Reading diagrams and blueprints
- Working with tools and technology

Benefits of this certificate:

- Expand your career options and possibilities for advancement in the utility industry
- Gain experience in the field of electronics and power systems
- Learn the skills required to compete for skilled technical jobs within the utility & energy industry

The **College of San Mateo** with assistance from East Bay Municipal Water District, Pacific Gas and Electric, the San Francisco Public Utilities Commission and *BAYWORK*, is offering a one-year certificate program in Power & Electrical Systems training.

The purpose of this certificate program is to increase potential job candidates' technical skills so companies can hire local talent in the communities where they provide power, water, wastewater and other services.

Future jobs include:

- Electrical technician
- Instrument and control technician
- Apprentice system operator
- Electrical workers I, II, and III
- Maintenance technician

Classes start at the College of San Mateo in the Spring Semester of 2010

Interested students **must attend** a mandatory orientation meeting before officially enrolling in this certificate program. The orientation dates at the college are:

November 12th from 7:15 - 8:30 p.m. and November 14th from 9:15 -10:30 a.m.

Inquires about this certificate program can be directed to the College of San Mateo at the following address: electricalpowersystems@smccd.edu
