

POSTING REQUIREMENTS FOR FERC ORDER 2004

PACIFIC GAS and ELECTRIC COMPANY

FERC Order 2004, Section 358.4(b)(3)(ii): Transmission Providers must post comprehensive organizational charts showing the business units, job titles and descriptions, and chain of command for all positions, including officers and directors, with the exception of clerical, maintenance, and field positions. The job titles and descriptions must include the employee's title, the employee's duties, whether the employee is involved in transmission or sales, and the name of the supervisory employees who manage non-clerical employees involved in transmission or sales.

TRANSMISSION FUNCTION JOB DESCRIPTIONS

Electric Transmission Rates Department

Director (S. Metague)

The Director of Electric Transmission Rates is responsible for directing and managing PG&E's regulatory affairs at the FERC, including securing approval of PG&E's Transmission Owner (TO) Tariff, and all other PG&E FERC rate schedules and tariffs. The Director also has overall responsibility for managing, administering, settling and renegotiating PG&E's wholesale transmission and distribution contracts, as well as ISO contracts.

Consultant (P. Bray)

Appears as expert witness for Company in proceedings before FERC. Instrumental in determining cost allocations of ISO charges to existing wholesale transmission customers (ETCs). Participates in development of Company position on ISO matters with an eye to the transmission implications of those proposals. Assists with case management of CPUC regulatory proceedings on transmission planning and siting. Involved in electric transmission business planning.

TO/Tariff/Rate Cases

Manager (T. Wilson)

Case manager for PG&E's TO Rate Cases. Directs filing of testimony, cost support and exhibits to TO Tariff Rates filing with the help of coordinators. Oversees discovery, settlement negotiations and hearing support for witnesses in litigated cases. Manager is involved in development of issues and key points the witnesses are making in filing from

planning operation, accounting, finance law, regulation, tax , load forecasting, rate design and other another areas.

Case Coordinator (I. Rice, S. Thomas)

Manages hearing, procedural schedule documents and other items in FERC proceedings. This may involve service to parties in the proceeding. Assists attorneys involved in legal research, maintains case files, monitors production schedules for discovery and maintains associated discovery databases. Assigns work functions to clerical and document services staff related to case production.

Filings, Rates and Regulations

Manager (R. Doran)

Manages and oversees the development, compliance and execution of PG&E's filings at FERC, including: overseeing compliance with regulatory procedures and deadline requests; establishment and maintenance of conformed rate schedules and tariffs, processing of public inquiries of rate schedules and tariffs, filing cost support in ratemaking matters involving wholesale revenues, ancillary service revenues and costs, cost allocation and cost based ratemaking. Oversees research regarding FERC orders and decisions. Oversees preparation of wholesale cost data as reported in the FERC Form 1.

In addition, manages the production and distribution of: regulatory filings associated with wholesale generators in compliance with FERC's policies for wholesale generators; regulatory filings for transmission and distribution as it pertains to ETC customer changes and WDT service agreements; and regulatory filings associated with changes to PG&E's TO Tariff.

Team Leader (J. Myers, J. McGee)

Supervises analysts and case coordinators involved in preparation and/or support of FERC filings for transmission and/or distribution services. May also work directly on FERC filings. May work with other departments and get data necessary to prepare filing packages.

May also manage regulatory projects including support to FERC rate or contractual proceedings which involve discovery, testimony, service on case participants, and briefing support.

Senior Regulatory Analyst (M. Fisher)

Prepares complex filing packages in compliance with FERC regulations for FERC jurisdictional transmission and/or distribution services. May oversee other analysts' work, act as a witness in FERC proceedings related to filings, may work with other departments and get data necessary to prepare filing packages. Develops support for cost based allocations, cost based rates and or special cost and revenue calculations.

Consultant (T. King)

Prepares complex filing packages in compliance with FERC regulations for FERC jurisdictional transmission and/or distribution services. May oversee other analysts work, act as a witness in FERC proceedings related to filings, and work with other departments and get data necessary to prepare filing packages. Develop support for cost based allocations, cost based rates and or special cost and revenue calculations.

Regulatory Analyst (B. Diorio)

Prepares filing packages in compliance with FERC regulations for FERC jurisdictional transmission and/or distribution services. May act as a witness or witness assistant in FERC proceedings. May prepare documents or reports which summarize revenue, cost or load data as used for regulatory filings or for reporting purposes.

Associate Regulatory Analyst (D. Poster)

Assists analysts and senior analysts in preparing workpapers, statements and other necessary FERC filing data. Prepares simple FERC filings for FERC jurisdictional transmission and /or distribution services in compliance with FERC regulations.

Case Coordinator (B. Deniston, J. Migocki, E. Hunt (Contractor), M. Porter)

Manages hearing and procedural schedule documents and other items in FERC proceedings. This may involve service to parties in the proceeding. Assists attorneys involved in legal research, maintains case files, monitors production schedules for discovery, maintains associated discovery database, and assigns work functions to clerical and document services staff related to case production.

Senior Regulatory Analyst, including filing support to the Generation Department for Reliability Must Run (RMR) Contracts (W. Davis)

Prepares complex filing packages in compliance with FERC regulations for FERC jurisdictional transmission and production associated with PG&E RMR plants which make sales for resale to the California ISO. Acts as a witness related to transmission filings where generator contributions to the transmission grid are returned to the generators and rolled into transmission rates. May work with other departments and get data necessary to prepare filing packages. May support cost based rates and or special cost and revenue calculations.
