

# PG&E Flood Lighting Solutions

**PG&E can provide a safer and more secure environment for your home or business with custom flood lighting solutions.**

Increased light levels can:

- **Promote Safety** by illuminating parking lots and walkways to reduce accidents
- **Increase Security** by deterring loitering and crime
- **Enhance the Appearance** of your property

*Traditional styles used to add directional spot lighting in parking lots for additional security*

*Contemporary style used add to light to a recreational park area for added safety after dark.*

PG&E's flood lighting solutions allow homeowners and businesses to light potentially dangerous areas, such as

- yards
- driveways
- parking areas
- paths and walkways
- loading docks
- recreation areas

PG&E will **own, install** and **maintain** the selected flood lights under a low monthly fee structure.

Floodlights can be installed on existing wood poles or a new pole assembly under the LS1 or OL1 rate schedule.

## Traditional

## Contemporary
