

# Energy Efficiency Programs

FOR MORE INFORMATION,  
CONTACT YOUR PG&E  
ECONOMIC DEVELOPMENT  
REPRESENTATIVE, CALL  
800-468-4743, OR VISIT  
[PGE.COM/BUSINESS](http://PGE.COM/BUSINESS)

PG&E offers an array of energy management solutions to help our commercial and industrial customers save energy and money. Our offerings play an important role in PG&E's commitment to helping California businesses save energy, increase profitability, reduce environmental impacts and enhance California's competitiveness.

## SMART ENERGY ANALYZER™

On-site, phone, or on-line surveys help customers learn how their businesses can save money by saving energy. PG&E also offers an on-site Integrated Energy Audit, which identifies opportunities in demand response and self-generation as well as energy efficiency for eligible customers. Visit [com/biz/energy\\_tools\\_resources/expert\\_energy\\_audit](http://com/biz/energy_tools_resources/expert_energy_audit) for more information.

## REBATES FOR ENERGY-EFFICIENT TECHNOLOGIES

Energy Efficiency Rebates pay customers cash back when they buy and install energy-efficient equipment such as building envelope improvements, efficient motors and pumps, and improved lighting. For a list of eligible products, visit [pge.com/biz/rebates](http://pge.com/biz/rebates).

## INCENTIVES FOR CUSTOMIZED ENERGY EFFICIENCY PROJECTS

Energy savings-based incentives and design assistance are available for customers and/or their project sponsors who complete customized energy efficiency projects. Total incentive payments are based on actual reductions in energy usage.

## INCENTIVES FOR ENERGY-EFFICIENT NEW CONSTRUCTION

Cash incentives, design assistance, and education are offered to support the design and construction of energy-efficient new facilities and to incorporate energy efficiency in customers' plant processes.

## ENERGY DESIGN RESOURCES

Educates and informs architects, engineers, lighting designers, and developers about techniques and technologies that contribute to energy-efficient new construction design. Visit [energydesignresources.com](http://energydesignresources.com) for more information.

## EDUCATION AND TRAINING ON ENERGY EFFICIENCY

PG&E provides energy efficiency technical expertise, information, tools and educational services:

- Pacific Energy Center - San Francisco  
visit [pge.com/pec](http://pge.com/pec)
- Energy Training Center - Stockton  
visit [pge.com/stockton](http://pge.com/stockton)
- Food Service Technology Center - San Ramon – visit [pge.com/fstc](http://pge.com/fstc)
