

FRESNO ENERGY SAVINGS ALLIANCE

*Free and Low-Cost
Energy-Efficiency Services
for Businesses
and Residents of Fresno*

A joint project of:

Pacific Gas and
Electric Company®

Alan Autry
Mayor, City of Fresno

"Given energy costs are significant budget items for homeowners and small businesses, this energy-efficiency partnership with the City of Fresno and PG&E could help offset these high costs for many of our local residents and businesses. This program offers a great opportunity for our community to help California reduce electric demand and the need for new power plants."

For a limited time, the City of Fresno, Pacific Gas and Electric Company, and Richard Heath and Associates, Inc. (RHA) are joining forces to deliver an energy-efficiency program designed specifically for residents and businesses located in Fresno's Enterprise Zone.

Through the Fresno Energy Savings Alliance, eligible residents and businesses can reduce their energy usage and costs using the unique program elements listed below. What's more, these customers are also eligible to participate in a multitude of energy-efficiency programs that are available to all PG&E customers.

save energy

SINGLE-FAMILY AND MULTI-FAMILY HOME DIRECT INSTALL PROGRAM

Energy-efficiency experts will canvass designated neighborhoods and identify single- and multi-family homes that qualify for the installation of a variety of free energy-efficient measures such as: compact fluorescent lamps, interior and exterior hardwired fluorescent lighting fixtures, programmable thermostats, water faucet aerators, and low-flow showerheads. Residents with single-family homes may also receive a free energy analysis that can help them identify how they are using their energy and ways to save. Special emphasis will be placed on working with moderate-income customers, California Alternate Rates for Energy (CARE) participants, and senior citizens. For more information, please call RHA, Inc. at 1.559.447.7012.

SMALL AND MEDIUM-SIZED BUSINESS DIRECT INSTALL PROGRAM

Energy-efficiency experts will contact small and medium-sized businesses, offer to perform free energy audits to help businesses identify energy-saving opportunities and provide information regarding energy-efficient equipment. Qualifying customers may gain a number of energy-efficient upgrades free of charge. For more information, please call RHA, Inc. at 1.559.447.7012.

ENERGY-EFFICIENCY EDUCATION & INFORMATION SERVICES

PG&E will provide energy clinics and classes designed specifically for residents and businesses located in Fresno's Enterprise Zone. Through these free training opportunities, residential and business customers can gain suggestions on how to reduce their energy bills and operate more energy efficiently. For more information or to register for classes, please call PG&E's Energy Training Center at 1.800.244.9912.

ENERGY-EFFICIENCY SERVICES AND INCENTIVES FOR MUNICIPAL BUILDINGS

Technical consultants will survey major energy-consuming systems within City facilities in order to identify potential energy-saving opportunities. Financial incentives may be available to help support the investment in energy-efficiency retrofits at select municipal facilities. For more information, please call PG&E at 1.559.263.5534.

CODES AND STANDARDS SUPPORT

PG&E will provide Title 24 training and educational seminars related to energy codes and standards for existing and future building designs. These courses are targeted to designers, engineers, architects and building officials in Fresno.

ELIGIBILITY AND PROGRAM DATES

The Fresno Energy Savings Alliance is available until December 31, 2005 to residents and business owners located in Fresno's Enterprise Zone. Program services and benefits are offered on a first-come, first-served basis until the program deadline or until program

funds are spent, whichever comes first. Please see individual program fact sheets for program requirements.

OTHER AVAILABLE ENERGY-EFFICIENCY PROGRAMS

Residential and business customers in the City of Fresno may also be eligible to participate in other energy-efficiency programs and educational offerings provided by PG&E. For more information, please visit www.pge.com/foryourhome or www.pge.com/foryourbusiness.
