LAMPS

T8 OR T5 LINEAR FLUORESCENT LAMPS WITH ELECTRONIC BALLASTS

Rebate applies to existing T12 lamps and magnetic ballasts that are replaced by T8 or T5 lamps with the electronic, high frequency ($\geq 20\text{kHz}$), Underwriters Laboratory (UL) listed ballasts that are warranted against mechanical or electrical defects for five years, and have a Power Factor (PF) of ≥ 0.90 . At full light output, ballasts for 4-foot and 8-foot lamps must have Total Harmonic Distortion (THD) of $\leq 20\%$, while ballasts for 2-foot and 3-foot lamps must have THD of $\leq 32\%$.

Programmed Start/Programmed Rapid-start ballasts must be used for T5 lamp installations. Customers installing T5 lamps for direct lighting in low ceilings should consult a lighting professional to address the possibility of excessive glare. T8 and T5 replacement lamps must meet the Color Rendering Index (CRI) and Rated Lamp Life standards listed, and the

***Please Note:** In all cases, the Wattage of the replacement fixture must be less than the Wattage of the existing lamp. The maximum replacement Wattage listed in the table for each category is typically associated with the highest Wattage in the basecase range.

manufacturer's specification sheet must document these characteristics for each ballast type.

When T8 lamps are being installed and occupancy sensors are not in use, Instant Start ballasts must be used. When occupancy sensors are installed to control circuits in lamp/ballast retrofits Programmed Start or Programmed Rapid-start ballasts are recommended in order to maximize lamp life. Occupancy sensor rebates are allowed with linear fluorescent lighting retrofits, but must meet the requirements of the Occupancy Sensor category. Replacement lamps and ballasts rebated in this category are not eligible for rebates under the Interior Linear Fluorescent Fixtures category.

Lamp and Ballast Requirements

Lamp Type & Size	Ballast Type	CRI	Minimum Rated Lamp Life (3 hrs/start)
T8 - 2-ft, 3-ft, 4-ft	Programmed Start or Programmed Rapid-start	≥80	24,000 hours
T8 - All sizes	Instant Start	≥80	18,000 hours
T5 - All sizes	Programmed Start or Programmed Rapid-start	≥82	20,000 hours

A de-lamping rebate may also apply. De-lamping is the permanent removal of existing T12 lamps/ballasts and unused lampholders (tombstones) from existing fixtures without replacing the lamps. To receive credit for de-lamping, customers must not remove more than half of the existing lamps and ballasts (along with lamp holders) from each fixture. The total number of lamps claimed for de-lamping may not be more than the number of replacement T8 or T5 lamps installed. Customers are responsible for deciding whether de-lamping will maintain adequate light levels.

Energy Efficiency Rebates

for Homes, Businesses and Multifamily Properties

2009 INTERIM
APPLICATION
INSTRUCTIONS

This Application Form and Instructions supersedes and replaces the 2006-2008 Energy Efficiency Rebate Application Form and Instructions.

PROOF OF PURCHASE REQUIREMENTS

Proof of purchase and other documentation required to process your rebate application may differ depending on who completes the installation – you or your contractor.

All Customers – Homes, Businesses and Multifamily Properties

1. Retail Product Receipt/Invoice

Proof of purchase and supporting documentation should be submitted within 90 days of purchase date and must include all of the following information:

- A. Retailer/Contractor name, address, and phone number
- B. Itemized listing of each product including quantity, product description, manufacturer, model number, or other identifying information, i.e., SKU # as appropriate
- C. Purchase price per product
- D. Date “Paid in Full” or payment terms, such as “Charge” or “Net 30”
- E. Product installation date

Read the product specifications included in the appropriate catalog to make sure all requirements are met.

Residential and Multifamily Property Customers Only

Depending on your energy-efficiency project, you may need to submit a Home Improvement Contract as additional documentation to be submitted to PG&E, along with your proof of purchase.

2. Home Improvement Contract (HIC)

- A. The California State License Board (CSLB) requires that licensed contractors must provide you with an HIC if the materials and labor total for the product(s) and installation is \$500 or more. It is recommended that you request an HIC from your contractor even if the contractor’s product and installation costs are less than \$500.
- B. If an HIC is your proof of purchase it must be given to you by your contractor and must be signed and dated by both you and your licensed contractor.
- C. If the signatures are not dated, the date that the HIC was written will determine the product order/purchase date.

For additional information on Home Improvement Contracts or the status of your contractor’s license, visit www.cslb.ca.gov or call the **Contractors State License Board** at **1-800-321-CSLB**.
