**ADVICE 2204-E
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

**Subject: Notice of Proposed Construction of Facilities Pursuant to
General Order 131-D, South San Francisco Oyster Point Hook
Ramp Project / Relocation of San Mateo-Martin 230 kV
Underground Power Line in the City of South San Francisco**

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4 of the construction of facilities that are exempt from a Permit to Construct.¹

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI, Subsections B and C.

Background

The City of South San Francisco's Terrabay Specific Plan (last amended in 1996) includes the relocation of a 1,900-foot segment of Bayshore Boulevard to an alignment located, at its farthest, 140 feet west of the existing roadway. The Company has an underground 230 kilovolt (kV) transmission line located within the project area. In order to make room for future development, the Company will relocate the line up to 120 feet west of its current location.

¹ The Company reserves all legal rights to challenge the decisions or statutes under which it has been required to make this advice filing, and nothing in this advice filing constitutes a waiver of such rights. Also, the Company reserves any additional legal rights to challenge the requirement to make this advice filing by reason of its status as a debtor under Chapter 11 of the Bankruptcy Code, and nothing in this advice filing constitutes a waiver of such rights.

This project qualifies as exempt from Permit to Construct filing requirements pursuant to G.O. 131-D, Sections III A & B.1, exempt "the minor relocation of existing power line facilities"

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs). Because there are no EMF mitigation measures available on this project that would meet the Commission's benchmark of 4 % or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

Protests

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **March 26, 2002**, at the following address:
