**Advice 2213-E  
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

**Subject: Notice of Proposed Construction of Facilities Pursuant to General Order 131-D, Power Lines Fulton Molino-Cotati 60 Kilovolt and Stony Point Tap 115 Kilovolt in the City of Santa Rosa.**

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4 of the construction of facilities that are exempt from a Permit to Construct.<sup>1</sup>

**Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI, Subsections B, C and G.

**Background**

The Company has been requested by the Brennan Acres, LLC, to relocate a portion of the Fulton Molino-Cotati 60 kilovolt (kV) power line (between pole 16/17 and 15/19) and the Stony Point Tap 115 kV power line (2/15). Developers for Brennan Acres Subdivision at Stony Point Road and Giffen Avenue are required by the City of Santa Rosa, as a condition of the development, to widen Stony Point Road fronting their subdivision. The relocation will include relocating four poles; two poles (16/16 & 16/15) will be relocated approximately 20 feet east of their existing location, pole 15/20, 100 feet south of its current location and pole 2/15, 10 feet east of its current location. The relocation will be approximately

1150 feet in length. Construction is scheduled to begin in May 2002, and the new facilities should be in operation by August 2002.

This project qualifies as exempt from Permit to Construct filing requirements, pursuant to G.O. 131-D, Section III, Subsection B.1. (b), (c) and (g), which exempts, "the replacement of existing power line facilities or supporting structures with equivalent facilities or structures", "the minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures" and "power line facilities or substation to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts.

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs). Based upon the standard that "low cost" mitigation measures not exceed 4% of the total project costs, there are no "no cost" or "low cost" measures to be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
