Advice 2262-E
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Lambie Energy Center Interconnection Project, Solano County

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Certificate of Public Convenience and Necessity.¹

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

In order to interconnect the Lambie Energy Center Power Plant facility near Fairfield, California, to the Company's electrical system, the Company has been asked to construct a new transmission line loop, totaling 260 feet in length, from the existing Vaca Dixon-Contra Costa 230 kilovolt (kV) transmission line into and out of a new electric switching station adjacent to the new Lambie Energy Center Power Plant. The new double-circuit line will be supported by one structure near

Also, the Company reserves any additional legal rights to challenge the requirement to make this advice filing by reason of its status as a debtor under Chapter 11 of the Bankruptcy Code, and nothing in this advice filing constitutes a waiver of such rights.

the existing transmission line. The loop will allow the Company's transmission lines to transport power from the Lambie Energy Center.

This project qualifies as exempt from Permit to Construct filing requirements, pursuant to G.O. 131-D, Section III, Subsection A, which exempts, "the minor relocation of existing power line facilities."

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs). The following measures are proposed for this project:

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
