**Advice 2287-E
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

Subject: Rearrangement of Manteca-Patterson 60kV power line

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4 of the construction of facilities that are exempt from a Permit to Construct.¹

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI, Subsections B, C and G.

Background

The sale of the Company's Patterson Substation, in Stanislaus County, to Turlock Irrigation District is in progress. In order to accommodate this arrangement, the Company proposes to connect the existing Manteca-Patterson 60 kilovolt (kV) wood pole power line to the existing Salado-Newman #2 60kV wood pole power line, and sever the connection of the existing Salado-Newman #2 60kV wood pole power line at Patterson Substation. Approximately 500 feet of the Manteca-Patterson 60kV wood pole power line will be relocated to a new franchise location on the easterly side of Elm Avenue near the City of Patterson. Construction is scheduled to begin in November 2002, or as soon as possible thereafter, and to be completed in February 2003, or as soon as possible thereafter.

This project qualifies as exempt from Permit to Construct filing requirements, pursuant to G.O. 131-D, Section III, Subsection B.1. (c) and (g), which exempts,

¹ The Company reserves all legal rights to challenge the decisions or statutes under which it has been required to make this advice filing, and nothing in this advice filing constitutes a waiver of such rights. Also, the Company reserves any additional legal rights to challenge the requirement to make this advice filing by reason of its status as a debtor under Chapter 11 of the Bankruptcy Code, and nothing in this advice filing constitutes a waiver of such rights.

“the minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures” and “power line facilities or substation to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts.

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs). Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
