**ADVICE 2316-E  
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

Subject            **Notice of Proposed Construction of Facilities Pursuant to  
General Order 131-D, Lockeford #1 60 Kilovolt Power Line  
Relocation Project, City of Stockton, County of San Joaquin**

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4 of the construction of facilities that are exempt from a Permit to Construct.<sup>1</sup>

**Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI, Subsections B and C.

**Background**

Pacific Gas and Electric Company has been requested by the developer of La Morada Subdivision to relocate a portion of the Lockeford #1 60 kilovolt power line in the City of Stockton, County of San Joaquin, to avoid conflicts with the proposed street improvements. Eight poles along the north side of Morada Lane, between Holman Road and Highway 99, are to be moved approximately 35 feet north of their existing positions. Construction is scheduled to begin in January 2003, or as soon as possible thereafter, and the new facilities are planned to be in operation in February 2003, or as soon as possible after project completion.

This project qualifies as exempt from Permit to Construct filing requirements pursuant to G.O. 131-D, Section III, Subsection B.1.g, which exempts, "power

line facilities or substations to be located in an existing franchise, road-widening setback, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or Environmental Impact Report finds no significant unavoidable environmental impacts.”

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs).

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

### **Protests**

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **December 25, 2002**, which is 20 days after the filing date, at the following address:
