Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4 of the construction of facilities that are exempt from a Permit to Construct.¹

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI, Subsections B and C.

Background

Pacific Gas and Electric Company is proposing to replace existing wires with new wires on the West Sacramento-Davis 115 kilovolt power line in the Cities of Davis and West Sacramento, County of Yolo, to provide for increased load growth in the Sacramento region. The total length of 115 kV line to be replaced is approximately 11 miles. Construction is scheduled to begin in January 2003, or as soon as possible thereafter, and the new facilities are planned to be in operation in June 2004, or as soon as possible after project completion.

placing of new or additional conductors, insulators, or their accessories on supporting structures already built.”

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs).

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
