**Advice 2337-E
(Pacific Gas and Electric Company ID U 39 E)**

Public Utilities Commission of the State of California

Subject: New Electric Contract for Use By Pacific Gas and Electric Company and the City of Davis Regarding Calculation of Bill Credits for the Output of the PV-USA Solar Generating Facility In Compliance With Senate Bill 1038, Section 21

Pacific Gas and Electric Company (PG&E) hereby submits for filing the enclosed contract for use with the City of Davis.¹

Purpose

The purpose of this filing is to comply with Senate Bill (SB) 1038 Section 21, which adds Section 2826.5 to the California Public Utilities Code. The bill became effective January 1, 2003. In this filing, PG&E presents a new contract for use between the City of Davis and PG&E regarding the output of the PVUSA solar generating facility.

Background

On September 12, 2002, the Governor approved SB 1038. The bill establishes a special program to provide the City of Davis with a bill credit for the electricity

generated at the photovoltaic facility owned in part by the City of Davis known as PVUSA.

PG&E is filing this advice letter and the attached contract with the Commission in compliance with the timeline set out in SB 1038, which requires filing no later than ten days from January 1, 2003. Also, per SB 1038, the Commission is directed to approve the proposed contract or specify conforming changes to be made by PG&E within 30 days of this filing.

Tariff Revisions

The attached contract when executed would provide City of Davis "Benefiting Accounts" with bill credits for electricity supplied to the PG&E grid by the PVUSA photovoltaic generating facility. Each Benefiting Account receives a pro rata share of the PVUSA output based on historic usage data. All Benefiting Accounts are required to be on time-of-use (TOU) rates and the PVUSA output must be measured on a TOU basis. The bill for each Benefiting Account is calculated according to the specific TOU rate for that individual account. Credits are calculated for each TOU period using the generation component of the TOU rate of the specific Benefiting Account receiving the credit. In any given month, any credit not used by the Benefiting Account is carried forward to the next billing cycle for that Benefiting Account. After the last billing cycle of the calendar year, any net credits that may have accrued on each Benefiting Account will be zeroed out.
