**Advice 2412-E
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Lincoln-Pleasant Grove 60 Kilovolt (kV) Relocation Project, City of Lincoln, County of Placer

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.¹

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

PG&E has been requested by the developer of Lincoln Crossing Subdivision in the City of Lincoln to relocate a portion of the Lincoln-Pleasant Grove 60kV electric transmission pole line. The relocation consists of installing 23 wood poles along the westerly and northerly boundaries of the subdivision a distance of approximately 9000 feet. The relocated pole line will replace 26 wood poles

that will be removed due to conflicts with proposed streets and other improvements within the new subdivision. Construction is scheduled to begin in September 2003, or as soon as possible thereafter, and the new facilities are planned to be in operation in October 2003, or as soon as possible after project completion.

This project qualifies as exempt from Permit to Construct filing requirements, pursuant to G.O. 131-D, Section III, Subsection B, 1, (f), which exempts, power lines or substations to be relocated or constructed which have undergone environmental review pursuant to CEQA as part of a larger project, and for which the final CEQA document (Environmental Impact Report (EIR) or Negative Declaration) finds no significant unavoidable environmental impacts caused by the proposed line or substation. The City of Lincoln adopted the Supplement to the Lincoln Crossing Specific Plan Environmental Impact Report in January 2001 (State Clearinghouse Number 89073119).

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs). The following measure is proposed for this project:

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

Effective Date

The Company requests that this advice filing become effective on **September 30, 2003**, which is 40 days after the date of filing. (In accordance with G.O. 131-D, construction will not begin until 45 days after notice is first published.)
