**Advice 2418-E  
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

**Subject: Notice of Proposed Construction of Facilities Pursuant to  
General Order 131-D, Power Line Relocation in the City of  
Oakley**

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4 of the construction of facilities that are exempt from a Permit to Construct.<sup>1</sup>

**Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI, Subsections B and C.

**Background**

The intersection of O'Hara Avenue and Laurel Road is being widened to accommodate new development in the area. The Company has been requested to relocate a portion of the Contra Costa – Balfour 60 kV line to provide clearance for the widened roadway. This relocation project will involve the following modifications to four transmission poles. Pole No. 134 will be raised approximately 15 feet in order to provide the necessary electrical clearances for the transmission line. Pole 135 will be removed and not replaced. Pole 136 will be removed and relocated west approximately 20 feet. A down guy will be installed to support Pole 137.

This project qualifies as exempt from Permit to Construct filing requirements pursuant to GO 131-D, Section III, Subsection B.1.c and g, which exempts, "The minor relocation of existing power line facilities up to 2,000 feet in length, or the

intersetting of additional support structures between existing support structures.” and “Power line facilities or substation to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration EIR finds no significant unavoidable environmental impacts.”

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs). Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

### **Protests**

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **October 2, 2003**, at the following address:
