**Advice 2710-E  
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

**Subject: Notice of Proposed Construction of Facilities Pursuant to  
General Order 131-D, Table Mountain Substation Project, County  
of Butte**

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4 of the construction of facilities that are exempt from a Permit to Construct.

**Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in GO 131-D, Section XI, Subsections B and C.

**Background**

Pacific Gas and Electric Company proposes to install a 230kV transmission tie line connecting an existing buss structure to transformer Bank 4 at Table Mountain Substation. The tie line is approximately 1321 feet long, with approximately 1087 feet outside of the substation on an existing PG&E easement. The line is supported by two new tubular steel poles, each 80 feet tall, and one tubular steel H structure, 45 feet tall. In addition, an existing lattice pole will be raised 35 feet to maintain the proper GO 95 clearance. Construction is scheduled to begin in October, 2005, or as soon as possible thereafter, and the new facilities are planned to be in operation in November, 2005, or as soon as possible after project completion.

This project qualifies as exempt from Permit to Construct filing requirements pursuant to G.O. 131-D, Section III, B, 1, c & g, which exempts;

- "power line facilities or substations to be located in an existing franchise, road widening setback easement or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts."

Electric and Magnetic Fields (EMF): Pacific Gas and Electric Company will employ "no cost" and specified "low cost" measures to reduce public exposure to EMF in accordance with California Public Utilities Commission (CPUC) Decision 93-11-013 and Pacific Gas and Electric Company's "EMF Design Guidelines of New Electrical Facilities: Transmission, Substation, and Distribution." Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

### **Protests**

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **October 5, 2005**, which is 20 days after the filing date, at the following address:

Persons or groups may protest the proposed construction if they believe that the Company has incorrectly applied for an exemption or that the conditions identified in G.O. 131-D, Section III.B.2, exist.

**Effective Date**

The Company requests that this advice filing become effective on **October 15, 2005**, which is 30 days after the date of filing. (In accordance with GO 131-D, construction will not begin until 45 days after notice is first published.)
