**Advice 2831-E
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

Subject: Stone Substation Modification Project, City of San Jose

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

In order to accommodate a proposal for the General Electric Planned Development, a retail commercial development on a 55-acre parcel located at Monterey Boulevard and Curtner Avenue in central San Jose, PG&E proposes to modify the existing Stone Substation to replace substation facilities that need to be upgraded as well as those formerly occupied by an adjacent customer transmission substation. This modification will enable Stone Substation to serve existing area electric loads, the new loads generated by the retail/commercial development on site, and subsequent development in the general region. The modifications will include replacing the existing transformers with larger transformers and constructing a second 115kV circuit, approximately 1400 feet in length, into the substation from Monterey Boulevard to provide needed system reliability. To support the additional circuit, three existing wood poles supporting the

existing 115kV circuit will be replaced by three to five new tubular steel, double-circuit poles (approximately 90 feet in height) extending westerly from Monterey Boulevard toward the substation for approximately 500 feet. The existing circuit will then transition back onto existing wood poles and continue westerly into the substation. The new circuit will continue straight westerly on tubular steel poles for approximately 900 feet before turning south into the substation.

Construction is expected to begin in August, 2006, or as soon as possible thereafter, and to be completed by the end of July, 2007, or as soon as possible thereafter.

This project qualifies as exempt from Permit to Construct filing requirements, pursuant to G.O. 131-D, Section III, Subsection B.1, which exempts the following:

- Power lines or substations to be relocated or constructed which have undergone environmental review pursuant to CEQA as part of a larger project, and for which the final CEQA document (Environmental Impact Report (EIR) or Negative Declaration) finds no significant unavoidable environmental impacts caused by the proposed line or substation.

The EIR for the General Electric Planned Development was adopted on April 4, 2005 (SCH# 2004062104), and identified no significant unavoidable environmental impacts caused by the proposed line or substation.

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to electric and magnetic fields (EMFs). No low cost measures were available for this project.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

Protests

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **June 8, 2006**, which is 20 days after the filing date, at the following address:

CPUC Energy Division
Attn: Tariff Unit, 4th Floor
California Public Utilities Commission
505 Van Ness Avenue
San Francisco, California 94102
Facsimile: (415) 703-2200
E-Mail: jjr@cpuc.ca.gov and jnj@cpuc.ca.gov

In addition, protests and all other correspondence regarding this advice letter should also be sent by letter and transmitted via facsimile to the attention of:

David T. Kraska
Attorney, Law Department
Pacific Gas and Electric Company
P.O. Box 7442
San Francisco, California 94120
Facsimile: (415) 973-0516

Brian K. Cherry
Director, Regulatory Relations
Pacific Gas and Electric Company
P.O. Box 770000, Mail Code B10C
San Francisco, California 94177
Facsimile: (415) 973-7226
E-Mail: PGETariffs@pge.com

Persons or groups may protest the proposed construction if they believe that the Company has incorrectly applied for an exemption or that the conditions set out in Section III, B.2 of G.O. 131-D exist.

Effective Date

The Company requests that this advice filing become effective on **June 18, 2006**, which is 30 days after the date of filing. (In accordance with G.O. 131-D, construction will not begin until 45 days after the notice is first published.)

Notice

In accordance with G.O. 96-A, Section III, Paragraph G, the Company is electronically and postal mailing copies of this advice letter to the utilities and interested parties shown on the attached list, including the parties listed in G.O. 131-D, Section XI, Paragraphs B.1 and B.2. These parties are identified in the "Notice of Distribution List" included in Attachment 1. Address change requests should be directed to Rose de la Torre (415) 973-4716. Advice letter filings can also be accessed electronically at: <http://www.pge.com/tariffs>

NOTICE OF PROPOSED CONSTRUCTION

PROJECT NAME: Stone Substation Modification Project, City of San Jose
ADVICE LETTER NUMBER: 2831-E

Proposed Project: In order to accommodate a proposal for the General Electric Planned Development, a retail commercial development on a 55-acre parcel located at Monterey Boulevard and Curtner Avenue in central San Jose, PG&E proposes to modify the existing Stone Substation to replace substation facilities that need to be upgraded as well as those formerly occupied by an adjacent customer transmission substation. This modification will enable Stone Substation to serve existing area electric loads, the new loads generated by the retail/commercial development on site, and subsequent development in the general region. The modifications will include replacing the existing transformers with larger transformers and constructing a second 115kV circuit, approximately 1400 feet in length, into the substation from Monterey Boulevard to provide needed system reliability. To support the additional circuit, three existing wood poles supporting the existing 115kV circuit will be replaced by three to five new tubular steel, double-circuit poles (approximately 90 feet in height) extending westerly from Monterey Boulevard toward the substation for approximately 500 feet. The existing circuit will then transition back onto existing wood poles and continue westerly into the substation. The new circuit will continue straight westerly on tubular steel poles for approximately 900 feet before turning south into the substation.

Construction is expected to begin in August, 2006, or as soon as possible thereafter, and to be completed by the end of July, 2007, or as soon as possible thereafter.

Electric and Magnetic Fields (EMF): Pacific Gas and Electric Company will employ "no cost" and specified "low cost" measures to reduce public exposure to EMF in accordance with California Public Utilities Commission (CPUC) Decision 93-11-013 and Pacific Gas and Electric Company's "EMF Design Guidelines of New Electrical Facilities: Transmission, Substation, and Distribution." The following measure(s) is proposed for this project:

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

Exemption from CPUC Permit Requirement: CPUC General Order 131-D, Section III, B.1, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. Pacific Gas and Electric Company believes this project qualifies for the following exemption(s):

- Power lines or substations to be relocated or constructed which have undergone environmental review pursuant to CEQA as part of a larger project, and for which the final CEQA document (Environmental Impact Report (EIR) or Negative Declaration) finds no significant unavoidable environmental impacts caused by the proposed line or substation.

The EIR for the General Electric Planned Development was adopted on April 4, 2005 (SCH# 2004062104), and identified no significant unavoidable environmental impacts caused by the proposed line or substation.

Public Review Process: Persons or groups may protest the proposed construction if they believe that Pacific Gas and Electric Company has incorrectly applied for an exemption or that the conditions set out in Section III.B.2 of General Order 131-D exist;

- a. There is reasonable possibility that the activity may have an impact on an environmental resource of hazardous or critical concern where designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies; or
- c.b. The cumulative impact of successive projects of the same type in the same place, over time, is significant; or
- e.c. There is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

Protests should include the following:

1. Your name, mailing address and daytime telephone number.
2. Reference to the CPUC Advice Letter Number and Project Name.
3. A clear description of the reason for the protest.
- 5.4. Whether you believe that evidentiary hearings are necessary to resolve factual disputes.

Protests for this project must be filed by June 8, 2006, at the following address:

CPUC Energy Division
 Attn: Tariff Unit, 4th Floor
 California Public Utilities Commission
 505 Van Ness Avenue
 San Francisco, California 94102

With a copy mailed to:

David Kraska, Law Department
 Pacific Gas and Electric Company
 P.O. Box 7442
 San Francisco, California 94120

Pacific Gas and Electric Company must respond within five business days of receipt and serve copies of its response on each protestant and the Energy Division. Within 30 days after Pacific Gas and Electric Company has submitted its response, the Executive Director of the CPUC will send you a copy of an Executive Resolution granting or denying the request and stating the reasons for the decision.

Assistance in Filing a Protest: For assistance in filing a protest, contact the CPUC Public Advisor in San Francisco at (415) 703-2074 or 1-866-849-8390 (toll-free); TTY# (415) 703-5258; or public.advisor@cpuc.ca.gov

Additional Project Information: To obtain further information on the proposed project, please call Pacific Gas and Electric Company's Project Information Line at (415) 973-5530.
