**Advice 3179-E
(Pacific Gas and Electric Company ID U 39E)**

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the relocation of Woodland-Davis 115kV power line in the City of Woodland.

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

In order to accommodate a road widening project in the City of Woodland, Pacific Gas and Electric Company (PG&E) has been requested to relocate approximately 1,440 feet (minor relocation) of the Woodland-Davis 115kV line along the east side of County Road 102 between I5 and south of Maxwell Road (existing franchise). Two wood poles on the Woodland-Davis 115kV power line will be relocated to a new location approximately 40' to the east of their existing location and one lattice steel tower will be relocated to a new location approximately 17' to the east of its existing location. Two additional wood poles located at the southeast corner of New Winton Drive and County Road 102, and at the northeast corner of New Maxwell Road and County Road 102 will be relocated approximately 40' to the east and 100' to the north of their existing location. One pole will be removed entirely. All new poles will be approximately the same height as existing poles. The conductors will be placed on temporary poles during construction. Construction is scheduled to begin in January 2008 or as soon thereafter as possible, with completion in approximately one week or as soon as possible after construction begins.

- This project qualifies as exempt from Permit to Construct filing requirements, pursuant to G.O. 131-D, Section III, Subsection B.1., which exempts, “The minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures” and “Power line facilities or substations to be located in an existing franchise, road widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts.”
