**Advice 3330-E
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Glenn #2 60kV Power Line Reconductoring Project, Counties of Glenn and Colusa

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

In order to provide reliable transmission service and to reduce the risk of outages in its service area, Pacific Gas and Electric Company (PG&E) proposes to replace the conductor on its existing Glenn #2 60kV power line between its Hamilton "A" Substation off of Shasta Avenue in Hamilton City and its Jacinto Substation at State Hwy 45 and Bayliss Blue Gum Road (replacement of existing facilities, placing of new conductors). The 12-mile power line segment begins at the Hamilton "A" Substation and extends east a short distance along East 6th Street to Sacramento Avenue, where it turns south through town until it reaches East 1st Street, where it turns east until it reaches County Road 206. At this point, the power line leaves the Hamilton City area and heads southeast along the County Road until it joins up with the Southern Pacific Railroad Line and continues south until it reaches St. John Road and turns west to where it reaches State Hwy 45, and finally turns south paralleling the highway until it reaches

Jacinto Substation. A second small section of power line (approximately 1500 feet) adjacent to PG&E's Rice Substation, located in Princeton at the corner of Center and Summer Streets, will also be replaced to support the larger segment of work (replacement of existing facilities, placing of new conductors). Both of these sections of power line are in deteriorated condition and there are various locations where the conductor is damaged. To accommodate the new conductor installation, some existing poles will be replaced along the alignment as needed (replacement of existing facilities); the remaining poles need only to be reframed to accommodate the new conductor. Of the wood poles to be replaced, most will be approximately 10 feet taller or less, with a few 15-foot or taller poles to provide necessary line clearance to secondary circuits, roadways and waterway crossings along the pole line (greater sag of new conductor) and to eliminate guy wires in one instance; at switch locations, some wood poles will be replaced with direct burial, weathered steel poles, similar in appearance to the wood poles, to provide switch equipment stability and longevity of the structure. Construction is scheduled to begin in October 2008 with work expected to be complete by June 2009, or as soon as possible after project completion.

CPUC General Order 131-D, Section III, Subsection B.1., exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption(s):

- b. the replacement of existing power line facilities or supporting structures with equivalent facilities or structures.
- e. the placing of new or additional conductors, insulators, or their accessories on supporting structures already built.

Additionally, G.O. 131-D requires utilities to employ "no cost" and specified "low cost" measures to reduce public exposure to the electric and magnetic fields (EMFs) in accordance with CPUC Decision 06-01-042 and the "EMF Guidelines for Electric Facilities". The following measures are proposed for this project:

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

Protests

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **September 18, 2008**, which is 20 days after the date of this filing. Protests should be mailed to the following address:

CPUC Energy Division
Tariff Files, Room 4005
DMS Branch
505 Van Ness Avenue
San Francisco, California 94102

Facsimile: (415) 703-2200
E-Mail: jjn@cpuc.ca.gov and mas@cpuc.ca.gov

Copies of protests also should be mailed to the attention of the Director, Energy Division, Room 4004, at the address shown above.

The protest also should be sent via U.S. mail (and by facsimile and electronically, if possible) to PG&E at the address shown below on the same date it is mailed or delivered to the Commission:

David T. Kraska,
Attorney, Law Department
Pacific Gas and Electric Company
P.O. Box 7442
San Francisco, California 94120

Facsimile: (415) 973-0516

Brian Cherry
Vice President, Regulatory Relations
Pacific Gas and Electric Company
P.O. Box 770000, Mail Code B10C
San Francisco, California 94177

Facsimile: (415) 973-7226
E-Mail: PGETariffs@pge.com

Persons or groups may protest the proposed construction if they believe that the Company has incorrectly applied for an exemption or that the conditions set out in Section III.B.2 of G.O. 131-D exist.

Effective Date

The Company requests that this advice filing become effective on **September 28, 2008**, which is 30 days after the date of filing. (In accordance with G.O. 131-D, construction will not begin until 45 days after notice is first published.)

Notice

In accordance with G.O. 96-B, Section IV, a copy of this advice letter is being sent electronically and via U.S. mail to parties shown on the attached list, including the parties listed in G.O. 131-D, Section XI, Paragraphs B.1 and B.2. These parties are identified in the "Notice Distribution List" included in Attachment I. Address change requests should be directed to Rose de la Torre at (415) 973-4716. Advice letter filings can also be accessed electronically at <http://www.pge.com/tariffs>.

A handwritten signature in cursive script that reads "Brian Cherry / mt".

Vice President, Regulatory Relations

(Date Filed/ Received Stamp by CPUC)

Advice Letter (AL) #: **3330-E**

Tier: N/A

Subject of AL: Glenn #2 60kV Power Line Reconductoring Project (Counties of Glenn and Colusa)

Keywords (choose from CPUC listing): Power Lines

AL filing type: Monthly Quarterly Annual One-Time Other _____

If AL filed in compliance with a Commission order, indicate relevant Decision/Resolution #:

Does AL replace a withdrawn or rejected AL? If so, identify the prior AL: No

Summarize differences between the AL and the prior withdrawn or rejected AL¹: _____

Is AL requesting confidential treatment? If so, what information is the utility seeking confidential treatment for:

Confidential information will be made available to those who have executed a nondisclosure agreement: Yes No

Name(s) and contact information of the person(s) who will provide the nondisclosure agreement and access to the confidential information: _____

Resolution Required? Yes No

Requested effective date: **September 28, 2008**

No. of tariff sheets: N/A

Estimated system annual revenue effect (%): N/A

Estimated system average rate effect (%): N/A

When rates are affected by AL, include attachment in AL showing average rate effects on customer classes (residential, small commercial, large C/I, agricultural, lighting).

Tariff schedules affected: N/A

Service affected and changes proposed¹: N/A

Pending advice letters that revise the same tariff sheets: N/A

Protests, dispositions, and all other correspondence regarding this AL are due no later than 20 days after the date of this filing, unless otherwise authorized by the Commission, and shall be sent to:

NOTICE OF PROPOSED CONSTRUCTION

PROJECT NAME: GLENN #2 60kV POWER LINE RECONDUCTORING PROJECT, COUNTIES OF GLENN AND COLUSA
ADVICE LETTER NUMBER: 3330-E

Proposed Project: In order to provide reliable transmission service and to reduce the risk of outages in its service area, Pacific Gas and Electric Company (PG&E) proposes to replace the conductor on its existing Glenn #2 60kV power line between its Hamilton "A" Substation off of Shasta Avenue in Hamilton City and its Jacinto Substation at State Hwy 45 and Bayliss Blue Gum Road (replacement of existing facilities, placing of new conductors). The 12-mile power line segment begins at the Hamilton "A" Substation and extends east a short distance along East 6th Street to Sacramento Avenue, where it turns south through town until it reaches East 1st Street, where it turns east until it reaches County Road 206. At this point, the power line leaves the Hamilton City area and heads southeast along the County Road until it joins up with the Southern Pacific Railroad Line and continues south until it reaches St. John Road and turns west to where it reaches State Hwy 45 and finally turns south paralleling the highway until it reaches Jacinto Substation. A second small section of power line (approximately 1500 feet) adjacent to PG&E's Rice Substation, located in Princeton at the corner of Center and Summer Streets, will also be replaced to support the larger segment of work (replacement of existing facilities, placing of new conductors). Both of these sections of power line are in deteriorated condition and there are various locations where the conductor is damaged. To accommodate the new conductor installation, some existing poles will be replaced along the alignment as needed (replacement of existing facilities); the remaining poles need only to be reframed to accommodate the new conductor. Of the wood poles to be replaced, most will be approximately 10 feet taller or less, with a few 15-foot or taller poles to provide necessary line clearance to secondary circuits, roadways and waterway crossings along the pole line (greater sag of new conductor) and to eliminate guy wires in one instance; at switch locations, some wood poles will be replaced with direct burial, weathered steel poles, similar in appearance to the wood poles, to provide switch equipment stability and longevity of the structure. Construction is scheduled to begin in October 2008 with work expected to be complete by June 2009, or as soon as possible after project completion.

Electric and Magnetic Fields (EMF): Pacific Gas and Electric Company will employ "no cost" and specified "low cost" measures to reduce public exposure to EMF in accordance with California Public Utilities Commission (CPUC) Decision 06-01-042 and Pacific Gas and Electric Company's "EMF Design Guidelines for Electrical Facilities." The following measures are proposed for this project:

- Because there are no EMF mitigation measures available on this project that would meet the CPUC's benchmark of 4% or less of the total project cost, no "no cost" or "low cost" measures will be employed.

Exemption from CPUC Permit Requirement: CPUC General Order 131-D, Section III.B.1, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. Pacific Gas and Electric Company believes this project qualifies for the following exemption:

- b. the replacement of existing power line facilities or supporting structures with equivalent facilities or structures.
- e. the placing of new or additional conductors, insulators, or their accessories on supporting structures already built.

Public Review Process: Persons or groups may protest the proposed construction if they believe that Pacific Gas and Electric Company has incorrectly applied for an exemption or that the conditions set out in Section III.B.2 of General Order 131-D exist:

- a. There is reasonable possibility that the activity may have an impact on an environmental resource of hazardous or critical concern where designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies; or
- b. The cumulative impact of successive projects of the same type in the same place, over time, is significant; or
- c. There is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

Protests should include the following:

1. Your name, mailing address and daytime telephone number.
2. Reference to the CPUC Advice Letter Number and Project Name.
3. A clear description of the reason for the protest.
4. Whether you believe that evidentiary hearings are necessary to resolve factual disputes.

Protests for this project must be filed by September 18, 2008 at the following address:

CPUC Energy Division
 Attn: Tariff Unit, 4th Floor
 California Public Utilities Commission
 505 Van Ness Avenue
 San Francisco, California 94102

With a copy mailed to:
 David Kraska, Law Department
 Pacific Gas and Electric Company
 P.O. Box 7442
 San Francisco, California 94120

Pacific Gas and Electric Company must respond within five business days of receipt and serve copies of its response on each protestant and the Energy Division. Within 30 days after Pacific Gas and Electric Company has submitted its response, the Executive Director of the CPUC will send you a copy of an Executive Resolution granting or denying the request and stating the reasons for the decision.

Assistance in Filing a Protest: For assistance in filing a protest, contact the CPUC Public Advisor in San Francisco at (415) 703-2074 or 1-866-849-8390 (toll-free) or TTY (415) 703-5258 or public.advisor@cpuc.ca.gov.

Additional Project Information: To obtain further information on the proposed project, please call Pacific Gas and Electric Company's Project Information Line at (415) 973-5530.
