**Advice 3331-E
(Pacific Gas and Electric Company ID U 39E)**

Public Utilities Commission of the State of California

Subject: Notice of Proposed Construction of Facilities, Pursuant to General Order 131-D, for the Santa Maria-Sisquoc 115kV Reconductor Project, County of Santa Barbara

Pacific Gas and Electric Company (the Company) hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

Due to structural deterioration and the need to increase capacity, Pacific Gas and Electric Company (PG&E) proposes to reconductor and replace approximately 161 wood poles along the existing Santa Maria-Sisquoc 115kV Power Line within Santa Barbara County. The existing 60- to 75-foot wood poles, within existing franchise (existing franchise) are proposed to be replaced with new poles of the same height to approximately 5 feet taller (replacement of existing facilities) to maintain sufficient distance between the ground and lower distribution lines as required by the Commission's General Order 95. The project begins at PG&E's Sisquoc Substation at 3790 Orcutt Garey Road and continues approximately 2.5 miles northwesterly and then northerly approximately 1.5 miles to Andrew Avenue. The project then extends westerly approximately 3.5 miles prior to entering the City of Santa Maria at Highway 101 and East Battles Road. The project continues westerly on the southerly side of East Battles Road for approximately 1.5 miles to the intersection of East Battles Road and South Depot Street. The project then continues northerly approximately 1.3 miles, and concludes within a PG&E's Santa Maria Substation located at the southeasterly corner of South Depot Street and Cypress Street. Construction is proposed to begin October

2008, or as soon as possible thereafter, and project completion is scheduled for May 2009, or as soon as possible thereafter.

This project qualifies as exempt from Permit to Construct filing requirements, pursuant to G.O. 131-D, Section III, B.1, which states that a Permit to Construct is not required for:

- b. The replacement of existing power line facilities or supporting structures with equivalent facilities or structures.
- g. Power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts.
