**Advice 3815-E  
(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

**Subject: Submits Notice of Construction, Pursuant to General Order 131-D,  
for the Ravenswood–Palo Alto 115kV Power Line Relocation, City of  
Palo Alto, Santa Clara County**

Pacific Gas and Electric Company (“PG&E” or “the Company”) hereby submits notice pursuant to General Order (“G.O.”) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

**Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

**Background**

The California Department of Transportation (Caltrans), in cooperation with the Santa Clara Valley Transportation Authority (VTA), proposes to construct the U.S. 101 Auxiliary Lanes Project (State Route 85 to Embarcadero Road) in Santa Clara County, and has requested PG&E to relocate approximately 1,600 feet (minor relocation) of the existing Ravenswood–Palo Alto 115 kilovolt (kV) Power Line. The relocation will take place along East Bayshore Road abutting Highway 101, approximately one-third mile south of Embarcadero Road in the City of Palo Alto. For this relocation (all in existing franchise), ten existing wood poles, each approximately 50 to 67 feet tall, will be replaced with seven new structures, including 4 light-duty steel poles and 3 tubular steel poles. The new poles will be approximately 10-18 feet taller than the existing poles due to longer span lengths caused by a reduction in total number of poles to accommodate the project. Construction activities are tentatively scheduled to begin in April 2011, or as soon as possible thereafter, with the relocations scheduled to be operational in June 2011, or as soon as possible after construction is completed.

CPUC General Order 131-D, Section III, Subsection B.1., exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption(s):

- (c) The minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures.
- (g) Power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

### **Protests**

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **April 6, 2011**, which is 20 days after the date of this filing. Protests should be mailed to the following address:
