**Advice 3824-E**  
**(Pacific Gas and Electric Company ID U39 E)**

Public Utilities Commission of the State of California

**Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Valley Springs #1 60 kV Power Line Relocation Project in San Joaquin and Calaveras Counties**

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

**Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

**Background**

In order to accommodate Caltrans' proposed Highway 26 Rehabilitation project, Caltrans has requested PG&E to relocate three short segments (approximately 550, 1100, and 500 feet respectively) along the Valley Springs #1 60 kilovolt (kV) Power Line between Wimer Road and Rose Marie Drive on Highway 26 located in San Joaquin and Calaveras Counties (minor relocation of existing lines). The relocations will require replacing five wood poles (existing franchise) approximately 60 to 65 feet tall with similar wood poles (replacement of existing structures). Additionally, two new wood guy poles, 35 and 40 feet tall, will be installed to support the new wood poles. Construction is scheduled to begin in June 2011 or as soon thereafter as possible, with completion in August 2011 or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption(s):

- “The replacement of existing power line facilities or supporting structures with equivalent facilities or structures.”
- “The minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures.”
- “Power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts.”

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

### **Protests**

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **April 21, 2011**, which is 20 days after the date of this filing. Protests should be mailed to the following address:
