Advice 3839-E

(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

**Subject: Submits Notice of Construction, Pursuant to General Order
131-D, for the Construction of the Arco-Tulare Lake 70 kV
Power Line Pole Replacement Project in the County of Kings**

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

In order install a new 12 kilovolt (kV) distribution line below the existing Arco-Tulare Lake 70 kV Power Line, PG&E proposes to replace approximately 65 poles along a 4.5-mile of segment of the power line (existing easement) with approximately 65 new 10- to 30-foot taller light-duty steel poles, which will weather to resemble wood. The new distribution line is needed to meet increasing demand and improve electrical capacity and reliability in the greater Kings County area. Most poles will be 30 feet taller to accommodate the new underbuild and meet current design standards, as well as the California Public Utilities Commission's General Order 95 clearance requirements. The power line segment begins at Tulare Lake Substation, located along 25th Avenue approximately 1,500 feet south of Racine Road in Kings County, and extends diagonally in a southeasterly direction for approximately 4.5 miles through irrigated farmland to and over Interstate 5. Work is scheduled to begin in July 2011, or as soon thereafter as possible, and will be completed by January 2013, or as soon thereafter as possible.

CPUC General Order 131-D, Section III, Subsection B.1.g, exempts projects meeting specific conditions from the CPUC's requirement to file an application

requesting authority to construct. The Company believes this project qualifies for the following exemption:

Power line facilities or substations to be located in an existing franchise road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR finds no significant unavoidable environmental impacts.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by **May 23, 2011**, which is 20 days after the date of this filing. Protests should be mailed to the following address:
