Advice 4138-E

(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of the MANTECA-LOUISE 60 KV POWER LINE PROJECT in the City of Manteca, County of San Joaquin

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

Purpose

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

Background

To accommodate Centerpoint Intermodal Center's planned improvements to Roth Road and Airport Way in the City of Manteca, Pacific Gas & Electric Company (PG&E) has been requested to relocate approximately 1,500 feet of the Manteca-Louise 60 Kilovolt (kV) Power Line along Roth Road (west of South Airport Way). PG&E will relocate the power line approximately 24 feet south of its current location along Roth Road (minor relocation) to accommodate traffic improvements. To relocate the line, PG&E will remove five wood poles on the south side of Roth Road and replace them with four new poles on the south side and one new wood pole on the north side of the road. In addition, two existing wood poles will be replaced with one new wood pole on the east side of Airport Way, approximately 200 feet north of Lovelace Road (replacement of existing facilities). The existing poles are approximately 55 feet tall and the replacement poles will be approximately 10 to 20 feet taller to accommodate future distribution circuits and the new signal lights at the intersection of Airport Way and Roth Road. Construction is scheduled to begin December 2012 or as soon as possible thereafter, with completion in January 2013 or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1 exempts projects meeting specific conditions from the CPUC's requirement to file an application requesting authority to construct. The Company believes this project qualifies for the following exemption(s),

- b. the replacement of existing power line facilities or supporting structures with equivalent facilities or structures.
- c. the minor relocation of existing power line facilities up to 2,000 feet in length, or the intersetting of additional support structures between existing support structures.

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.
