**Advice 4480-E**  
(Pacific Gas and Electric Company ID U39 E)

Public Utilities Commission of the State of California

**Subject: Submits Notice of Construction, Pursuant to General Order 131-D, for the Construction of Kingsburg-Lemoore 70 kV Power Line Pole Replacement Project - (City of Hanford, County of Kings)**

Pacific Gas and Electric Company ("PG&E" or "the Company") hereby submits notice pursuant to General Order (G.O.) 131-D, Section XI, Subsection B.4, of the construction of facilities that are exempt from a Permit to Construct.

### **Purpose**

This advice letter provides a copy of the Notice of Proposed Construction (Attachment I) and the Notice Distribution List, which comply with the noticing requirements found in G.O. 131-D, Section XI.

### **Background**

Southern California Edison has requested that PG&E replace approximately 22 poles in the existing Kingsburg-Lemoore 70 Kilovolt (kV) Power Line with taller poles to accommodate the addition of a new distribution wire under the power line. The project is located along Hanford Armona Road between 12<sup>th</sup> Avenue and State Route 198 in the City of Hanford and in unincorporated areas of Kings County (existing franchise). PG&E will replace approximately 22 existing wood poles ranging in height from 55 to 65 feet with new wood poles approximately 10-15 feet taller (replacement of existing facilities). The taller poles are needed to meet California Public Utilities Commission (CPUC) General Order 95 minimum clearance requirements for the new distribution wire. Construction is tentatively scheduled to begin in September 2014, or as soon as project plans and approvals are in place. Construction is scheduled to be complete in November 2014, or as soon as possible after construction begins.

CPUC General Order 131-D, Section III, Subsection B.1, exempts a utility from the CPUC's requirement to file an application requesting authority to construct if a project meets specific conditions. This project qualifies for the following exemption(s),

- b. "the replacement of existing power line facilities or supporting structures with equivalent facilities or structures."
- g. "power line facilities or substations to be located in an existing franchise, road-widening setback easement, or public utility easement; or in a utility corridor designated, precisely mapped and officially adopted pursuant to law by federal, state, or local agencies for which a final Negative Declaration or EIR [Environmental Impact Report] finds no significant unavoidable environmental impacts."

This filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other rate schedule or rule.

### **Protests**

Anyone wishing to protest this filing may do so by filing a protest with the CPUC and the Company by September 9, 2014, which is 20 days after the date of this filing. Protests should be mailed to the following address:
