PG&E shall not be responsible for enforcing requirements applicable to the performance of the Scheduling Coordinators. The Aggregator agrees to follow the SC-to-SC trade protocol in **Attachment C**. ### Protocol for SC-to-SC Trade

Five calendar days prior to the beginning of each operating month, Aggregator shall provide to PG&E via PG&E's CBP website, monthly nominations of demand response broken down by Option, Product and Congestion Zone (i.e., NP-15 or ZP-26, or as currently established by the CAISO) to be made available under this Agreement.

For the Day-Ahead option, PG&E or PG&E's program coordinator shall notify Aggregator by 1500 hours if a dispatch is required the next business day. PG&E's notification shall specify the quantity of each Product in each hour and by Congestion Zone. Such schedules shall be for contiguous hours only. Each business day following a PG&E notification, Aggregator shall perform or cause to be performed a Scheduling Coordinator to Scheduling Coordinator trade to PG&E's scheduling agent at least ninety (90) minutes in advance of the CAISO Hour-Ahead scheduling time line equivalent to the demand reduction set forth in PG&E's notification for that hour. Such traded quantity shall be adjusted by the Distribution Loss Factor for each Customer to account for delivery at the CAISO interface. The Electric Service Provider will not be compensated by PG&E for SC-to-SC trades submitted as a result of CBP Events.

For the Day-Of option, PG&E or PG&E's program coordinator shall notify Customer with up to thirty (30) minutes notice prior to the close of the CAISO Hour-Ahead Market (approximately three hours prior to the start of a Day-Of Event). PG&E's notification shall specify the quantity of each Product in each hour and by Congestion Zone. Such schedules shall be for contiguous hours only. Customer shall perform or cause to be performed a Scheduling Coordinator to Scheduling Coordinator trade to PG&E's scheduling agent prior to the close of the CAISO's Hour-Ahead Market. Such traded quantity shall be adjusted by the Distribution Loss Factor for each Customer to account for delivery at the CAISO interface. The Electric Service Provider will not be compensated by PG&E for SC-to-SC trades submitted as a result of CBP Events.

### Market Redesign and Technology Upgrade

The foregoing protocols are intended for implementation under the current CAISO electric market structure. At this time, the precise treatment of Demand Response by the CAISO under Market Redesign and Technology Upgrade (MRTU) is uncertain. PG&E reserves the right to modify these protocols so that utilization of the Products can be consistent with MRTU requirements.
