September 3, 2019

Advice 4136-G/5627-E
(Pacific Gas and Electric Company ID U 39 M)

Public Utilities Commission of the State of California

## Subject: PG\&E's 2020 Energy Efficiency Annual Budget Advice Letter in

 Compliance with Decisions 15-10-028 and 18-05-041
## I. Purpose

Pacific Gas and Electric Company (PG\&E) hereby submits its 2020 energy efficiency (EE) portfolio budget ( 2020 EE Budget) by Tier 2 advice letter in compliance with the Decision Re Energy Efficiency Goals for 2016 and Beyond and Energy Efficiency Rolling Portfolio Mechanics, the "Rolling Portfolio Decision" (Decision (D.)15-10-028), ${ }^{1}$ the Decision Addressing Energy Efficiency Business Plans (D.18-05-041), ${ }^{2}$ and guidance from the California Public Utilities Commission (CPUC or Commission) Energy Division (ED) staff (Staff).

PG\&E requests that the Commission approve its 2020 ABAL budget of $\$ 237,525,829$ through a non-standard disposition for cost recovery and spending authorization purposes effective January 1, 2020, as this budget more closely aligns with the new energy savings goals set for 2020.3 PG\&E additionally requests that the Commission approve the forecasted 2020 electric/gas split for cost recovery allocations effective January 1, 2020. This will allow PG\&E to recover gas and electric costs in amounts that more appropriately matches the new measure potential in $2020 .{ }^{4}$

## II. Background

## A. Regulatory Requirements

[^0]The Rolling Portfolio Decision D.15-10-028 requires each EE program administrator (PA) to file an advice letter with a budget for the next calendar year's EE portfolio by the first business day of September each year. ${ }^{5}$

Subsequently, the Commission issued the Decision Addressing Energy Efficiency Business Plans D.18-05-041, which established September 3, 2019, as the deadline for the 2020 Annual Budget Advice Letter (ABAL). This decision also adopted the budgets set forth in the Business Plans for 2018-2025.

## B. Filing Requirements

D.15-10-028 requires each program administrator's (PA) advice letter to contain:

- A portfolio cost-effectiveness statement; and
- Application summary tables with forecast budgets and savings by sector and program/intervention. ${ }^{6}$

Furthermore, D.18-05-041 provides additional guidance to PAs regarding ABAL submission. D.18-05-041 requires that the investor-owned utilities' (IOUs) ABALs include the following:

- A forecasted Total Resource Cost (TRC) test score that meets or exceeds 1.25, except during program years 2019-2022, when the forecasted TRC must meet or exceed 1.0;
- Forecasted energy savings goals that must meet or exceed Commissionestablished savings goals for each IOU; and
- A forecasted budget that must not exceed the PA's annual budget in the approved Business Plans, or (if applicable) the revised annual budget in this ABAL. ${ }^{7}$

If a PA's ABAL submitted for program year 2019 through program year 2022 fails to meet the criteria above, including a forecasted portfolio TRC of 1.0 during program years 20192022, the PA is to hold a workshop to provide transparency into the associated challenges and receive feedback that would potentially aid the PA in revising its Business Plan pursuant to D.15-10-028 for Commission approval. ${ }^{8}$

[^1]
## C. Contents of this Filing

PG\&E's advice letter is organized as follows:

- Budget, Goals, and Cost-Effectiveness
- Business Plan Revision
- 2020 Forecast Approach
- Portfolio Strategies to Boost Cost-Effectiveness in 2020
- 2020 Program Changes
- Evaluation, Measurement \& Verification (EM\&V)
- Prior Years' Unspent Funds
- Cost Recovery
- Metrics to date

In addition to the information above, PG\&E's 2020 ABAL includes the following materials:

- Attachments:
- Attachment 1 - Joint IOUs Statewide Funding Allocations
- Attachment 2 - Supplemental Budget Tables
- Attachment 3 - California Energy Data and Reporting System (CEDARS) Filing Confirmation
- Attachment 4 - Appendices
- Attachment 5 - Caps and Targets Table

## III. Discussion

## A. Budget, Goals, and Cost-Effectiveness

PG\&E proposes a 2020 EE budget of $\$ 237.5$ million. This budget is based on portfolio modifications relative to 2019 that are oriented toward meeting the annual savings goals for 2020 that are significantly reduced relative to 2019 goal, ${ }^{9}$ resulting in a forecasted 2020 EE budget that is $26 \%$ lower than its approved 2019 EE budget of $\$ 319.5$ million. ${ }^{10}$ However, this proposed portfolio is not forecast to meet a TRC above 1.0 for 2020 instead, it opts to facilitate a successful transition to the Commission's new statewide and third-party model for energy efficiency, with a focus on TRC in future program years. Administering a portfolio that meets the 2020 savings goals, but not the 2020 costeffectiveness requirement, is the most effective way for PG\&E to administer an evolving portfolio that has the best chance to meet both the savings goals and cost-effectiveness requirements in future program years. Cost-effectiveness improvements may be realized in future program years when new programs have time to ramp-up and realize their full

[^2]cost-effectiveness potential. A portfolio that meets the 2020 savings goals will help facilitate a transition from existing offerings to future ones.

PG\&E expects incentive spending in 2020 to decrease relative to 2019 as a result of (a) the ramp-down of existing rebate programs as PG\&E's portfolio introduces new thirdparty programs, and (b) the ramp-up of new third-party programs resulting from solicitations that are expected to realize fewer savings during the program ramp-up phase relative to program costs. PG\&E expects to incur program costs to conduct work necessary to complete solicitations, review and provide quality control over program designs, finalize contracts, and get programs approved by the CPUC (where appropriate), to launch in 2020.

While PG\&E is acting to improve cost-effectiveness in 2020, PG\&E's believes its best opportunity to deliver a cost-effective portfolio that meets annual savings goals in the long run is through the solicitations process. Competition and new program ideas will likely contribute to cost-effectiveness improvements that efficient program administration cannot deliver alone. Unfortunately, the timing of the multi-sector solicitations process results in uncertainty that manifests in PG\&E's 2020 ABAL forecast. PG\&E recognizes that new programs take time to launch, ramp up, and ultimately acquire participants and deliver savings. Because of this uncertainty, the final 2020 program offerings, measure mixes, and corresponding portfolio TRC are subject to change after the September 3, 2019 filing of this 2020 EE Annual Budget Advice Letter (see Section III.D).

Additionally, Commission-issued dispositions, Database for Energy Efficiency Resources (DEER) updates, custom project refinements, and modifications to other key inputs will impact portfolio savings and cost-effectiveness. As cost-effectiveness inputs change, PG\&E will continue to evaluate the available mix of measures and programs and will balance the portfolio as necessary throughout 2020. This may include, but is not limited to, fund shifting, measure and program elimination, and modifications to rebate levels.

Table 1 provides an overview of PG\&E's 2020 forecasted portfolio budget, savings, and cost-effectiveness, excluding market effects. Table 2 provides the TRC test and Program Administrator Cost (PAC) test forecasts for its 2020 EE portfolio using the CPUC's CostEffectiveness Tool (CET). ${ }^{11}$

[^3]Table 1: PG\&E 2020 Forecast Budget and Savings Summary

For reference only

| MCE EM\&V PY Budget $^{7}$ | $\$ 277,857$ |
| :--- | ---: |
| BayREN EM\&V PY Budget $^{7}$ | $\$ 961,353$ |
| 3C-REN EM\&V PY Budget $^{7}$ | $\$ 113,324$ |
| EM\&V PY PA Budget total | $\$ 10,853,567$ |

[^4]Table 2: PG\&E $2020{ }^{12}$ Cost-Effectiveness Statement

| Cost-Effectiveness Scenario | 2020 TRC <br> Forecast | 2020 PAC <br> Forecast | 2020 RIM <br> Forecast |
| :--- | :---: | :---: | :---: |
| Total portfolio including the Energy Savings and Performance <br> Incentive (ESPI) award, and excluding C\&S and market effects | 0.75 | 1.12 | 0.47 |
| Total portfolio including the ESPI award and C\&S, and excluding <br> market effects | 1.26 | 4.06 | 0.55 |

TRC and PAC calculations include costs for:

- Resource and non-resource programs, including Financing and Workforce Education and Training (WE\&T) programs;
- EM\&V; and
- An estimated $\$ 12$ million for PG\&E's ESPI award in 2020. ${ }^{13}$

TRC and PAC calculations do not include:

- Emerging Technologies (ET) program costs;
- Statewide (SW) Marketing, Education and Outreach (ME\&O) costs;
- BayREN and MCE benefits and costs; ${ }^{14}$
- Financing costs including credit enhancements approved for the Statewide Financing Pilots in D.13-09-044; and
- Energy Savings Assistance (ESA) benefits and costs.

## B. Business Plan Revision

As noted in Section A, PG\&E is forecasting a portfolio TRC of 0.75 without C\&S or market effects for 2020. As such, PG\&E acknowledges that this triggers the application filing and business plan revision described in D.15-10-028, OP 2. PG\&E expects to work with Energy Division on a schedule and process for refiling its Business Plan.

## C. Forecast Approach

PG\&E's 2020 ABAL was developed using a combination of top-down and ground-up forecasting techniques. PG\&E used its 2019 ABAL as a baseline and made measure adjustments, which included removing sunset measures (predominantly lighting) and incorporating statewide workpaper measures. PG\&E added sector-level budget placeholders for new third-party programs expected to be launched in 2020 as a result of solicitations. PG\&E also adjusted existing programs and savings to reflect the existing program ramp-down expected as new third-party programs are introduced into the portfolio. The 2020 forecast is a trade-off between reducing existing low-TRC program

[^5]costs necessary to make room for solicited third-party programs coming online in 2020, which may not be achieving savings in the same program year versus forecasting enough existing program budget to meet 2020 savings goals.

In addition to these top-down forecasting techniques, PG\&E developed a ground-up forecast for a subset of programs (such as Residential Pay for Performance, Strategic Energy Management, On-Bill Financing Alternative Pathway, Multifamily New Construction, and Residential New Construction). The Residential Pay for Performance, Strategic Energy Management, and On-Bill Financing Alternative Pathway programs are newer programs with less historical data, and thus were considered in more detail for 2020 forecast development instead of relying on the 2019 ABAL forecast as a starting point. The Residential New Construction and Multifamily New Construction programs were determined to benefit from a ground-up forecast refresh to align with 2020 program expectations.

## New Third-Party Program Placeholders

When forecasting savings for new third-party program placeholders, PG\&E used the forecasting method used for custom projects where possible, in compliance with D.19-08-034. ${ }^{15}$ Otherwise, forecasted savings are based upon available inputs and information from its third-party solicitations, historical program information, and sector knowledge to inform assumptions and forecasted savings. PG\&E's savings from statewide third-party programs used the funding share method approved in the Joint IOUs Supplemental Advice Letter of the Shared Funding Mechanism Proposal submitted on November 15, 2018. ${ }^{16}$ An overview of PG\&E's third-party program forecast is shown in Table 3.

## Table 3: PG\&E 2020 New Third-Party Program Placeholder Forecast ${ }^{17}$

| Third-Party Program <br> Placeholder | Budget | First-Year <br> Net kWh | First-Year <br> Net kW | First-Year <br> Net Therm |
| :--- | ---: | ---: | ---: | ---: |
| Residential | $\$ 7,055,634$ | $6,713,207$ | 983 | 170,088 |
| Commercial | $\$ 8,241,182$ | $4,335,201$ | 537 | 578,944 |
| Agriculture | $\$ 4,416,941$ | 600,000 | 23 | 320,563 |
| Industrial | $\$ 7,291,294$ | $1,710,689$ | 170 | 190,488 |

[^6]| Public | $\$ 7,153,561$ | $1,875,000$ | 438 | $-14,620$ |
| :--- | ---: | ---: | ---: | ---: |
| Total | $\$ 34, \mathbf{1 5 8 , 6 1 1}$ | $\mathbf{1 5 , 2 3 4 , 0 9 7}$ | $\mathbf{2 , 1 5 1}$ | $\mathbf{1 , 2 4 5 , 4 6 3}$ |

## Fuel Substitution Measures

With the adoption of D.19-08-009 on August 1, 2019, PG\&E has the opportunity to introduce fuel-substitution measures into its portfolio that previously may not have been offered due to restrictions that no longer apply. PG\&E plans to explore and pursue viable fuel-substitution measures in 2020. However, fuel-substitution measures are not included in the 2020 forecast due to timing constraints for developing ex ante estimates between the adoption of D.19-08-009 and the finalization of PG\&E's 2020 forecast for the September 3, 2019 filing date of this advice letter.

## D. Portfolio Strategies to Boost Cost-Effectiveness in 2020

As part of the third-party program solicitations process, PG\&E will undertake "portfolio balancing" work after scoring completes for the first solicitation round, expected in midSeptember. Portfolio balancing is the process through which PG\&E will identify existing programs for ramp down and closure, identify new programs for launch, and create a smooth transition to new third-party programs for PG\&E's EE portfolio and its customers. This will continue throughout the entire solicitation process until PG\&E has balanced the portfolio for cost effectiveness, savings, and third-party outsourcing targets.

PG\&E will seek input from the Procurement Review Group (PRG) in decision-making regarding new third-party program selection and existing program replacement. Through portfolio balancing activities, PG\&E will seek to create a cost-effective EE portfolio by focusing on combinations of existing program closures and new programs that yield the largest increase in projected portfolio realized benefits. Program contract negotiation for new and existing programs will also take place during this time.

PG\&E has significantly reduced its program administrator costs relative to 2019. In 2019, PG\&E identified and implemented labor efficiencies that drove the reduced program administrator costs. PG\&E will continue to identify opportunities for program administrator cost efficiencies as it transitions to the statewide and third-party outsourced portfolio model. Please see Attachment 1 - Supplemental Budget Tables for more detail on spend by functional area.

## E. 2020 Program Changes

This section identifies changes to PG\&E's proposed programmatic activity in compliance with the Rolling Portfolio Decision ${ }^{18}$ and Business Plan Decision. ${ }^{19}$ The program budget

[^7]changes described in Sections III.E.1. through III.E.6. reflect budgets that changed by $40 \%$ or more relative to program budgets approved in its 2019 ABAL in accordance with D.18-05-041 OP 41 and Section 7.2. See Attachment 4, Appendix Table 4 for the 2020 budget tables associated with these programs.

PG\&E's 2020 portfolio forecast represents significant budget adjustments to most existing programs across the program sectors. These budget adjustments are subject to change, pending the results of the solicitations process that will continue through 2019 and 2020 and subsequent contract negotiations. Budget reductions were primarily driven by the removal of sunset measures (largely lighting) and the associated incentive budgets, as well as budget reductions necessary to make room for sector-level third-party program placeholders.

While the 2020 budget assumptions in this advice letter are subject to change, PG\&E's 2020 program budgets will be finalized through the third-party solicitation portfolio balancing process described in Section D. In this process, new programs across sectors will be selected for inclusion into the portfolio and existing programs will be reviewed for continuation, modification, or closure. This process will result in contract negotiations that will determine final 2020 program budgets. The portfolio balancing activities and subsequent contract negotiations are dependent on the scope of new third-party programs that are reviewed and selected. Given the solicitations schedule, the scope of these new programs is uncertain at the time of this 2020 EE annual budget advice letter filing. ${ }^{20}$

Despite the uncertainties of 2020 program budgets resulting from solicitations, PG\&E has developed the 2020 budget presented in this advice letter using the information available at the time of preparation. The 2020 budget allocation in this advice letter represents a $24 \%$ decrease from its 2019 ABAL budget, with reductions across multiple sectors. PG\&E will introduce high-level portfolio changes, such as measure sunsets and significant (i.e. greater than $40 \%$ ) budget adjustments, followed by sector-specific summaries of key program changes to support the portfolio through 2020.

## 1. Reduced Budgets Resulting from Updated Potential and/or Upcoming Solicitations

The majority of PG\&E's forecasted budget reductions in 2020 stem from two major changes: 1) lower savings opportunities identified in the updated Potential and Goals Study, ${ }^{21}$ particularly for lighting; and 2) the upcoming transition of the EE portfolio to new third-party programs via the solicitations process. PG\&E is currently working with existing vendors to understand their opportunities to continue delivering existing programs more cost effectively in each sector and will finalize existing program budgets based on those

[^8]negotiations. Table 4 below lists those programs with a forecast budget reduction of at least 40\%:

Table 4. Budgets Reduced by 40\% or More Resulting From Updated Potential and/or Upcoming Solicitations ${ }^{(a),(d)}$

| Program ID | Program Description | \% Budget <br> Reduction <br> Relative to <br> 2019 ABAL |
| :--- | :--- | :---: |
| PGE21032 | Agricultural Deemed Incentives | $42 \%$ |
| PGE21015 | Commercial HVAC | $53 \%$ |
| PGE210212 | Compressed Air and Vacuum Optimization Program | $44 \%$ |
| PGE2110014 | Department of Corrections and Rehabilitation | $51 \%$ |
| PGE21009 | Direct Install for Manufactured and Mobile Homes | $88 \%$ |
| PGE21026 | Energy Efficiency Services for Oil Production | $50 \%$ |
| PGE21008 | Enhance Time Delay Relay | $89 \%$ |
| PGE210123 | Healthcare Energy Efficiency Program | $57 \%$ |
| PGE210143 | Hospitality Program | $84 \%$ |
| PGE210210 | Industrial Recommissioning Program | $50 \%$ |
| PGE21041 | Primary Lighting (b) | $100 \%$ |
| PGE210311 | Process Wastewater Treatment Energy Management for | $400 \%$ |
| PGE210011 | Residential Energy Fitness program | $56 \%$ |
| PGE21006 | Residential HVAC | $52 \%$ |
| PGE210112 | School Energy Efficiency | $53 \%$ |
| PGE2110013 | State of California | $46 \%$ |
| PGE2110012 | University of California/California State University | $56 \%$ |
| PGE210135 | Water Infrastructure and System Efficiency | $45 \%$ |

(a) 2020 program budget reductions are relative to 2019 ABAL program budgets.
(b) The Primary Lighting Program (PGE21041) budget has been reduced to zero as the majority of measures historically offered through this program are no longer viable as a result of code baseline changes. PG\&E will formally close this program when the IOU statewide lead (Southern California Edison) leads this program closure effort. PG\&E will be moving to the outsourced statewide lighting program model that will likely come online in 2021.
(c) The Process Wastewater Treatment Program (PGE210311) reflects a budget of zero dollars in this advice letter, however at this time, this program is scheduled to ramp down, not close. In preparation of this advice letter, PG\&E discovered an error that the budget for this program had been reduced to zero. The correct budget for this program is expected to be approximately $\$ 270,000$ in 2020 to cover costs including program administration, contractor implementation, and customer incentives. PG\&E intends to ramp down this program budget relative to its 2019 budget, similar to other programs in the portfolio, in order to make room for new third-party programs launching in 2020. PG\&E will not be requesting additional funds outside of the EE portfolio budget request presented in this advice letter. However, PG\&E plans to reallocate funds in 2020 from other areas of its portfolio to support these Process Wastewater Treatment program activities.

## 2. Public Sector EEGA Cleanup and Reduced Lighting Potential

The Local Government Partnership (LGP) program budgets have historically funded a combination of lead local partner (LLP) budgets, third-party implementer budgets, and incentives for direct install offerings. From a reporting perspective, these have historically been captured in 22 unique program identification numbers (program IDs) representing the geographic areas in which the funds were distributed. The largest proportion of these budgets are to fund direct-install activities serving small and medium business customers (SMB). This SMB offering has been designed to be the same throughout the service territory even though it is delivered by seven different implementers and marketed under the 22 local Energy Watch brands.

Given the expected transitions to new third-party and statewide programs in 2020, PG\&E will be combining the existing SMB budgets across geographic areas under a single LGP program, Local Government Energy Action Resources (LGEAR), to enable flexibility in funding across geographic areas and minimize administrative costs. PG\&E will include contract provisions with the implementers to ensure that every community continues to be served through LGEAR.

Similarly, LLP budgets of the geographically-specific LGP programs will be consolidated under the Strategic Energy Resources (SER) non-resource program. As indicated above, LLP budgets have historically been split between the geographically-specific resource LGP programs and the non-resource SER program. As PG\&E's LLP LGP programs transition to being fully non-resource in 2020 upon completion of the solicitation process, the existing LLP budgets will be captured in the SER program. In addition, the SER program also contains budget to fund other local government resources - namely for the Statewide Energy Efficiency Collaborative and the development of a new energy data center. ${ }^{22}$

As a result of these administrative changes, the following Public Sector programs shown in Table 5 will appear with a zero budget. Appearing with a zero budget does not mean these program activities will cease. As described above, these territories will continue to be served through the resource program LGEAR and the non-resource program SER. The total funding simply has been consolidated into two programs.

[^9]
## Table 5. Public Sector Programs with

 Budgets Transferring to LGEAR and SER| Program ID | Program Description |
| :--- | :--- |
| PGE211007 | Association of Monterey Bay Area Governments (AMBAG) |
| PGE211009 | East Bay |
| PGE211010 | Fresno |
| PGE211011 | Kern |
| PGE211012 | Madera |
| PGE211013 | Marin County |
| PGE211014 | Mendocino/Lake County |
| PGE211015 | Napa County |
| PGE211016 | Redwood Coast |
| PGE211018 | San Luis Obispo County |
| PGE211019 | San Mateo County |
| PGE211020 | Santa Barbara |
| PGE211021 | Sierra Nevada |
| PGE211022 | Sonoma County |
| PGE211023 | Silicon Valley |
| PGE211024 | San Francisco |
| PGE211026 | North Valley |
| PGE211027 | Sutter Buttes |
| PGE211028 | Yolo |
| PGE211029 | Solano |
| PGE211030 | Northern San Joaquin Valley |
| PGE211031 | Valley Innovative Energy Watch (VIEW) |

Overall budget in these areas will still be reduced. Following the change of the lighting baseline to LEDs, lighting retrofits are generally no longer cost-effective. Since most savings from the LGP programs in Table 5 historically came from lighting, the sector budget for both incentives and implementer contracts under the LGEAR resource program will both be reduced.

## 3. Codes and Standards (C\&S) Programs

PG\&E is forecasting a reallocation of budget among the Codes and Standards (C\&S) subprograms resulting in program budget changes of 40\% or more relative to the 2019 ABAL budgets, as described below:

- Advocacy budgets, which include Building Codes Advocacy (PGE21051), Appliance Standards Advocacy (PGE21052), and National Codes and Standards Advocacy (PGE21057), are expected to all decrease due to anticipated increased contributions from other IOUs with PG\&E's transition to statewide lead for
advocacy subprograms. Since these three advocacy programs are expected to go statewide in 2020, PG\&E is forecasting a statewide placeholder in lieu of any budget for these existing advocacy programs. PG\&E anticipates decreased spending on advocacy will be offset by greater spending in Compliance Improvement (PGE21053), Reach Codes (PGE21054), and Code Readiness (PGE21056) discussed below.
- Reach Codes (PGE21054) is forecasting a budget increase of $190 \%$ relative to its 2019 ABAL budget, as the shift in California's policy landscape towards zero net energy and electrification has caused a significant upsurge in local government interest in reach codes. Additional support from the Reach Code subprogram is needed to meet the technical needs of local jurisdictions while limiting the diversity of local ordinances to minimize builder confusion, and to engage in a wide range of policy issues related to gas-pipeline infrastructure.
- Code Readiness (PGE21056) is also forecasting a budget increase of 87\% relative to the 2019 ABAL due to greater need for cost effectiveness and feasibility data unique to codes and standards, such as lab testing, field assessments, appliance surveys, and cost and compliance data. The landscape for California Energy Council (CEC) and Department of Energy (DOE) advocacy has become more challenging, so more technical support work is needed at the beginning of those rulemakings.

## 4. On-Bill Financing

PG\&E's budget for OBF Alternative Pathway is increasing by 26\% relative to the 2019 ABAL budget. Although this increase is not a change of $40 \%$ or more, this On-Bill Financing section discusses details of the 2020 forecast relative to 2019 given significant OBF Alternative Pathway forecast changes in 2020, particularly for therms. PG\&E is currently forecasting 2020 first-year energy savings of 41 GWh and 1.8 MMtherms for its OBF Alternative Pathway program, lower than the 2019 forecast of 47 GWh and 6.1 MMtherms. ${ }^{23}$

At the time of its OBF Alternative Pathway 2019 forecast development, the loan cap increase had not been approved, thus PG\&E had no 2019 projects to inform a forecast of large-loan projects. Therefore, PG\&E used information gathered from trade professionals, customers, and project implementers to develop forecast assumptions for potential large-loan projects. The loan cap increase was approved in April 2019, enabling PG\&E to use its 2020 project pipeline - which reflects the availability of the new loan cap increase - to develop its 2020 forecast. Consequently, PG\&E's 2020 OBF Alternative Pathway forecast includes a more reliable estimate of large-loan projects. PG\&E does not forecast any changes to the OBF program rules in 2020.

[^10]The OBF Alternative Pathway pipeline 2019 growth was primarily based on lighting projects. OBF has been available to customers through incentive programs for several years. The Alternative Pathway program was recently stood up to enable savings claims for financed projects that do not include an incentive. Lighting vendors that were already familiar with OBF offerings for incentive-based projects were able to quickly understand and promote the Alternative Pathway non-incentive OBF offering to customers, leading to 2019 Alternative Pathway projects comprised mainly of lighting. Vendors promoting gas projects did not have significant experience with OBF offerings with incentives prior to the introduction of the Alternative Pathway non-incentive OBF offering, and thus the ramp-up of non-incentive OBF gas projects has been slower than non-incentive OBF electric projects.

The 2019 therms forecast for OBF was overly optimistic, particularly for the completion of large gas projects. Customers targeted for gas savings have taken longer to develop those projects than PG\&E had originally anticipated. PG\&E is significantly reducing its gas forecast for OBF in 2020 based on these lessons learned.

PG\&E calculated cost effectiveness for OBF using an approach consistent with PG\&E's 2019 Second Supplemental ABAL with one change. PG\&E is reducing the COC incentive amount by the complement of the net-to-gross (NTG) value (i.e. 1-NTG) consistent with Commission policy ${ }^{24}$ on the TRC treatment of incentive costs because the COC benefits the non-freerider participants. ${ }^{25}$ PG\&E will continue to treat cost of capital (COC) as an incentive cost, as these are funds that benefit customers that are not recouped through loan repayments. ${ }^{26}$

## 5. Other Program Budget Increases

Residential Energy Advisor (PGE21001): PG\&E will be increasing budget 44\% relative to its 2019 ABAL budget for the large-scale, cost-effective, third-party Residential Energy Advisor program. The Home Energy Reports generated through this program have a long history of delivering cost-effective savings. PG\&E plans to expand on this successful effort by increasing its budget to support the increased participation in HER at the end of 2019 that will continue into 2020.

Industrial Strategic Energy Management (SEM) (PGE21030): Building on the success of the first year of SEM implementation due to high customer satisfaction and completion of all California Industrial SEM Design Guide activities, ${ }^{27}$ PG\&E is increasing budget for this

[^11]program by $111 \%$ to continue providing SEM services through two offerings, SEM Manufacturing and SEM-Food Processing, to 22 participants throughout its service territory. Based on the SEM Guide, implementers will complete the workshops offered, assist customers in project implementation, and refine energy savings models to capture the full spectrum of behavioral, retro-commissioning, and operational (BRO) and custom projects implemented during a two-year engagement. Implementers will work closely with PG\&E and CPUC EM\&V teams to finalize energy savings for the program.

PG\&E is also extending its SEM offering beyond a two-year engagement to customers who would like to continue receiving SEM services. At this time PG\&E estimates that more than half of current participants may dedicate resources to continue SEM. The services provided for the extended period may include, but are not limited to, customization of workshop topics based on customer feedback, re-baseline performance models, assistance in implementation of Energy Management Information Systems, as well providing milestone incentives based on established Key Performance Indicators.

Commercial Energy Advisor (PGE21014) and Industrial Energy Advisor (PGE21024): PG\&E is also showing increased budget of 101\% (approximately \$580k) and 288\% (approximately $\$ 190 k$ ), respectively for information technology products that are provided through its Commercial and Industrial Energy Advisor programs, to support additional behavioral measures. These information products are critical to support customers' energy efficiency investments throughout the portfolio.

## 6. Other Program Budget Reductions

Savings By Design (PGE211025) and Residential New Construction (PGE21005): The Savings By Design and Residential New Construction budgets are reducing by 63\% and $44 \%$, respectively in 2020 relative to the 2019 ABAL budget based on the anticipated budget needs for existing customer commitments that will be completed in 2020 as these programs ramp down to make room for potential new third-party program offerings.

Career and Workforce Readiness (PGE21076): The 2020 budget for this program has been reduced by $52 \%$ relative to the 2019 ABAL budget. This Workforce Education and Training subprogram is scheduled to be introduced statewide. PG\&E expects the statewide solicitation for this program to be complete in Q3 2020, with budget spend expected to begin in 2021.

Emerging Technologies (ET): The Statewide ET Programs are led by SCE and SCG. The Statewide ET Programs are scheduled to launch in early 2021. As such, 2020 will be a transition year during which PG\&E will complete its remaining existing PG\&E-led ET projects. New projects that PG\&E may initiate and sunset before or shortly after the transition to statewide administration may include projects that have the potential to support both incentive programs and codes and standards. Given the eventual transition and the typically long project durations, PG\&E is reducing its budget forecast for ET, particularly with the Technology Development Support (PGE21061) subprogram that is reducing by $73 \%$ relative to the 2019 ABAL budget.

Industrial Refrigeration Performance Plus program (PGE21036): PG\&E's 2019 ABAL indicated that this program would only remain open to close out a few remaining projects in $2019 .{ }^{28}$ PG\&E will continue to keep this program open in 2020 in anticipation of an energy savings project closing out in 2021 after 2 -year persistence monitoring. PG\&E does not expect any program activity in 2020 and therefore has reduced the budget for this program down to zero.

Third-Party Financing (PGE21092): PG\&E is showing a budget of zero dollars in this advice letter for this program. This program ramped down in 2019 with a 2019 ABAL budget of $\$ 64,982$. ${ }^{29}$ The administrative and implementation costs necessary to support this program are minimal and will be reallocated from other areas of the portfolio if necessary.

## G. EM\&V

PG\&E proposes a PG\&E EM\&V budget of $\$ 9,501,033$, consistent with the $4 \% \mathrm{EM} \& \mathrm{~V}$ budget cap originally adopted in D.09-09-047 and upheld in subsequent EE budget Decisions. ${ }^{30}$ D.16-08-019 established grounds to revise the allocation of EM\&V fund split between Commission and IOU EM\&V efforts, beginning after the EE Business Plans are approved by the Commission, to at least $60 \%$ reserved for Commission staff evaluation efforts and up to $40 \%$ for PAs. ${ }^{31}$ PG\&E will allocate $72.5 \%$ of EM\&V funds for Commission EM\&V efforts and $27.5 \%$ for PG\&E EM\&V efforts. Table 6 presents the allocation as set by PG\&E per D.16-08-019.

Table 6: 2020 EM\&V Budget

| PA | Total PA Budget <br> without EM\&V | EM\&V Total | EM\&V CPUC <br> $(\mathbf{7 2 . 5 \%})$ | EM\&V <br> PA <br> $(\mathbf{2 7 . 5 \%})$ | Total PA <br> Budget <br> with EM\&V |
| :---: | :---: | :---: | :---: | :---: | :---: |
| PG\&E | $\$ 228,024,796$ | $\$ 9,501,033$ | $\$ 6,888,249$ | $\$ 2,612,784$ | $\$ 237,525,829$ |

## F. Unspent Funds

## 1. PG\&E Prior Years' Unspent Funds

Table 7 illustrates PG\&E's unspent funds for prior years' program cycles. ${ }^{32}$ This data is also presented in the Appendices on Table 6: Committed Energy Efficiency Program Funding Not Yet Spent, and Table 7: 2019 Authorized and Spent/Unspent Detail. As of

[^12]June 30, 2019, PG\&E estimates that $\$ 13.3$ million of funds are unspent and uncommitted. The 2020 EE revenue collections will be offset by 2019 unspent and uncommitted funds to be finalized in early 2020 when 2019 program year activities conclude.

Table 7: Prior Years' Unspent Funds as of June 2019

|  | PY2013-2015 | PY 2016 | PY 2017 | PY 2018 | PY 2019 (estimated) | Totals |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Unspent \& Committed |  |  |  |  |  |  |
| EM\&V ${ }^{[1]}$ | \$5,179,004 | \$15,672,827 | \$14,479,143 | \$11,501,157 | \$5,657,498 | \$52,489,629 |
| Financing Pilots ${ }^{[2]}$ | \$2,257,726 | \$0 | \$165,400 | \$220,797 | \$439,288 | \$3,083,211 |
| BayREN | \$3,760,885 | \$0 | \$42,769 | \$5,218,732 | \$12,792,398 | \$21,814,784 |
| MCE | \$36,182 | \$104,615 | \$0 | \$223,670 | \$1,528,991 | \$1,893,458 |
| 3C REN | \$0 | \$0 | \$0 | \$0 | \$2,833,090 | \$2,833,090 |
|  | PY2013-2015 | PY 2016 | PY 2017 | PY 2018 | PY 2019 (estimated) | Totals |
| Total | \$11,233,797 | \$15,777,442 | \$14,687,312 | \$17,164,356 | \$23,251,265 | \$82,114,172 |
| Estimated Unspent \& Uncommitted for 2020 Offset |  |  |  |  |  |  |
| Utility Program Funds | \$0 | \$0 | \$0 | \$0 | \$13,324,000 | \$13,324,000 |

[1] Includes unspent funds from the CPUC ( $\$ 40.7$ million) and PG\&E ( $\$ 11.8$ million).
[2] In 2018, the Commission authorized 2017, 2018 \& 2019 committed funds in AL 3904-G/5175-E, effective December 3, 2017.

## 2. PG\&E's MCE Sub-Account Prior Years' Unspent Funds

In D.14-10-046, the Commission instructed PG\&E to offset MCE's unspent funds against payments to be made to MCE under its authorized electric EE portfolio budget. As of June 30, 2019, PG\&E estimates that all of MCE's 2019 electric funds (authorized in ABAL $33-\mathrm{E}$ and supplements) will be paid to MCE by the end of 2019 .

## G. Cost Recovery

## 1. EE Budget Cost Recovery

The PG\&E energy efficiency budget for 2020 cost recovery purposes upon approval of this advice letter is $\$ 237,525,829$. ${ }^{33}$ The unspent and uncommitted carryover balance for program year 2019 discussed in Section III.F. is an estimate at the time of this advice letter filing. After the conclusion of program year 2019 and when PG\&E finalizes the unspent and uncommitted 2019 carryover balance in early 2020, PG\&E will seek Commission approval in an advice letter filing to return those unspent funds to customers via the Annual Electric True-up (AET) and Annual Gas True-up (AGT) Advice Letter filings. Thus, the estimated unspent and uncommitted carryover balance in Section III.F. is not included in the cost recovery budget of $\$ 237,525,829$ for this filing. The energy

[^13]efficiency budgets for PG\&E's 2020 cost recovery related to MCE, BayREN, and 3C-REN will be based upon Commission approval of the budgets they present in their 2020 ABALs, including the CPUC portion of the REN and CCA EM\&V budgets. PG\&E will collect from customers the combined total of PG\&E, MCE, BayREN, and 3C-REN's cost recovery budget.

The allocation of the authorized 2020 budget for electric and gas cost recovery will be based on the electric/gas split attributed to the most recent Commission-approved program forecast. If the Commission approves the electric/gas split of 69\%/31\% associated with the 2020 EE program forecast in this advice letter, PG\&E will apply this electric/gas split for 2020 cost recovery purposes. If the Commission does not approve the electric/gas split associated with the 2020 EE program forecast in this advice letter, PG\&E will default to its last approved electric/gas split of $76 \% / 24 \%$ from the Commissionapproved 2019 ABAL. ${ }^{34}$

## 2. Integrated Demand-Side Management (IDSM) Budget

D.18-05-041 directs each IOU PA to set aside a minimum of $\$ 1$ million for the residential sector and a load-share-proportional fraction of $\$ 20$ million for the commercial sector from each IOU PA's IDSM budget for testing and deployment of integration strategies. ${ }^{35}$ In consultation and agreement with the IOUs, PG\&E will budget $\$ 8$ million of the required $\$ 20$ million for the commercial sector. With an additional $\$ 1$ million of IDSM budget for the residential sector, PG\&E's budget for IDSM activities will total $\$ 9$ million.

Table 8: Demand Response IDSM Funding Request in 2020 Rates

| Category | PG\&E Electric Demand Response Funds |
| :--- | ---: |
| Energy Efficiency | $\$ 1,230,000$ |
| Demand Response | $\$ 7,771,000$ |
| Total PG\&E | $\$ 9,001,000$ |

Regarding IDSM funding, please note that RF\&U is not included in this table but will be added to electric funding to determine the revenue requirement when recovered in rates through the AET.

Of PG\&E's $\$ 9$ million IDSM budget, $\$ 1.23$ million will be allocated to the EE portion of the IDSM budget, and $\$ 7.77$ million will be allocated to the Demand Response portion of the IDSM budget. The $\$ 1.23$ million EE portion of the budget is embedded within the residential and commercial sector budgets shown in Table 1. The $\$ 7.77$ million IDSM

[^14]budget related to Demand Response will continued to be tracked in the Demand Response Expense Balancing Accounting and recovered via the Distribution Revenue Adjustment Mechanism.

## H. Metrics

Pursuant to D.18-05-041, PG\&E reported on sector-level metrics and their associated targets for program years 2017 and 2018 as part of the 2017 and 2018 EE Annual Report filings filed on May 1, 2018 and May 1, 2019, respectively. They can be found in spreadsheet form on the CPUC's data reporting website, Energy Efficiency Statistics (EEStats), ${ }^{37}$ by filtering documents for the "Annual" Report Category and "Narrative \& Spreadsheet" Report Type.

In compliance with D.18-10-008, PG\&E proposes a portfolio-level indicator for third-party programs for disadvantaged worker participation as shown in the table below. ${ }^{38}$

## Table 9: Proposed Portfolio-Level Indicators for Disadvantaged Worker Participation

| Description | Indicator | Unit |
| :--- | :--- | :---: |
| Disadvantaged Worker <br> Participation in Training or <br> Apprenticeship Programs in <br> Partnership with Third-Party <br> ImplementersNumber of disadvantaged worker participants by sector | - Residential <br> Number of disadvantaged worker participants by sector <br> - Commercial | \# |
|  | Number of disadvantaged worker participants by sector <br> - Industrial | \# |
| Participation in Third-Party <br> EE Projects | Number of disadvantaged worker participants in energy <br> efficiency projects | \# |

PG\&E anticipates that third-party programs will start and ramp-up in late-2020 and early2021, thus, reporting of these indicators will likely begin with the PY 2021 EE Annual Report (to be filed May 1, 2022), following the first full year of third-party programs.

[^15]
## Protests

Anyone wishing to protest this submittal may do so by letter sent via U.S. mail, facsimile or E-mail, no later than September 23, 2019, which is 20 days after the date of this submittal. Protests must be submitted to:

CPUC Energy Division
ED Tariff Unit
505 Van Ness Avenue, $4^{\text {th }}$ Floor
San Francisco, California 94102
Facsimile: (415) 703-2200
E-mail: EDTariffUnit@cpuc.ca.gov
Copies of protests also should be mailed to the attention of the Director, Energy Division, Room 4004, at the address shown above.

The protest shall also be sent to PG\&E either via e-mail or U.S. mail (and by facsimile, if possible) at the address shown below on the same date it is mailed or delivered to the Commission:

Erik Jacobson
Director, Regulatory Relations
c/o Megan Lawson
Pacific Gas and Electric Company
77 Beale Street, Mail Code B13U
P.O. Box 770000

San Francisco, California 94177
Facsimile: (415) 973-3582
E-mail: PGETariffs@pge.com
Any person (including individuals, groups, or organizations) may protest or respond to an advice letter (General Order 96-B, Section 7.4). The protest shall contain the following information: specification of the advice letter protested; grounds for the protest; supporting factual information or legal argument; name, telephone number, postal address, and (where appropriate) e-mail address of the protestant; and statement that the protest was sent to the utility no later than the day on which the protest was submitted to the reviewing Industry Division (General Order 96-B, Section 3.11).

## Effective Date

PG\&E requests that the Commission approve its 2020 ABAL budget of $\$ 237,525,829$ through a non-standard disposition for cost recovery and spending authorization purposes effective January 1, 2020, as this budget more closely aligns with the new energy savings goals set for 2020. ${ }^{39}$ PG\&E additionally requests that the Commission approve the forecasted 2020 electric/gas split of $69 \% / 31 \%$ associated with its 2020 EE program forecast for cost recovery budget allocations effective January 1, 2020. This will allow PG\&E to recover gas and electric costs in amounts that more appropriately matches the new measure potential in 2020. ${ }^{40}$

## Notice

In accordance with General Order 96-B, Section IV, a copy of this advice letter is being sent electronically and via U.S. mail to parties shown on the attached list and the parties on the service lists for R.13-11-005, A.17-01-013 et al. Address changes to the General Order 96-B service list should be directed to PG\&E at email address PGETariffs@pge.com. For changes to any other service list, please contact the Commission's Process Office at (415) 703-2021 or at Process_Office@cpuc.ca.gov. Send all electronic approvals to PGETariffs@pge.com. Advice letter filings can also be accessed electronically at: http://www.pge.com/tariffs/.

## PG\&E's Supplemental Budget Information

On August 8, 2019, PG\&E, the Public Advocates Office (Cal PA), and The Utility Reform Network (TURN), met and conferred to discuss the supplemental budget information for inclusion in the Program Administrators' (PAs) 2020 Annual Budget Advice Letter filings. The three parties agreed on a template to be submitted with each PA's 2020 Annual Budget Advice Letter (ABAL). PG\&E submits the following information pursuant to its agreement with Cal PA and TURN and in support of its 2020 ABAL.

## I. DESCRIPTION OF IN-HOUSE ENERGY EFFICIENCY (EE) ORGANIZATIONAL STRUCTURE \& ASSOCIATED COSTS

## A. Narrative description of in-house departments/organizations supporting the Program Administrator's (PA) EE portfolio

1. Functions conducted by each department/organization.

PG\&E's "Narrative Description - Functions Conducted by Each
Department/Organization" is provided in Appendix I.A.1. of this Attachment 2 for Supplemental Budget Information.
2. Management structure and organizational chart.

An organizational chart depicting the management structure of PG\&E's Energy Efficiency Department is provided in Appendix I.A. 2 of this Attachment 2 for Supplemental Budget Information.
3. Staffing needs by department/organization, including current and forecast for 2020, as well as a description of what changes are expected in the near term (2021-22) or why it is impossible to predict beyond 2020, if that is the Program Administrator's position.

PG\&E's staffing for 2018 and 2020 forecast are provided in the "Portfolio Headcount (FTE)" table in Appendix I.C. PG\&E cannot currently predict EE staffing needs by department/organization beyond 2020 because staffing needs are contingent upon the outcome of statewide and third-party program solicitations and ongoing portfolio balancing activities. PG\&E will continue to identify opportunities to reduce labor costs over time.

Therefore, PG\&E forecasted some reductions in 2020 in anticipation of these changes but is not able to predict beyond 2020 until PG\&E knows the result of portfolio balancing and the level of PA support needed by new implementers. For example, if implementers opt-in to additional Informational Technology (IT), Marketing, or Sales team support, PG\&E's costs in these functions could increase. As PG\&E heads into the 2021 program year with more information, PG\&E can provide an update to these forecasts.
4. Non-program functions currently performed by contractors (e.g. advisory consultants), as well as a description of what changes are expected in the near term (2019-2020) or why it's impossible to predict beyond 2018, if that is the PA's position.

All costs charged to the EE balancing account (i.e., the cost reflected in section I. C, below) support PG\&E's EE programs. As such, there are no "non-program" costs to disclose. PG\&E does not foresee any change in this practice.
5. Anticipated drivers of in-house cost changes by department/organization.

PG\&E lists its drivers of in-house cost changes by department/organization in the table in Appendix I.A.5. of this Attachment 2 for Supplemental Budget Information.
6. Explanation of method for forecasting costs.

Given the uncertainty for PG\&Es 2020 portfolio stemming from the timing of local resource program solicitation and portfolio balancing which will not be completed until after the ABAL September 3rd filing date, PG\&E used a top-down and groundup approach for its 2020 ABAL forecast. PG\&E added sector-level budget placeholders for new third-party programs expected to be launched in 2020 as a result of solicitations and made adjustments to existing programs and savings to reflect the existing program ramp-down expected as new third-party programs are introduced into the portfolio. In addition to these top-down forecasting techniques, PG\&E developed a ground-up forecast for a subset of select programs that warranted focused forecast development instead of reliance on the 2019 forecast. In general, due to the timing of program launches, PG\&E took a conservative approach for new program spend due to ramp-up time. More details on PG\&E's portfolio forecasting approach can be found in Section C of its 2020 ABAL.

Forecasted staffing levels reflect anticipated reductions due to PG\&E's continued focus on driving out labor costs by finding efficiencies in PG\&E's program delivery activities. Actual costs may vary depending on the result of portfolio balancing and the level of PA support needed by PG\&E's new implementers.

## B. Table showing PA EE "Full Time Equivalent" (FTE) headcount by department/organization.

The table showing PG\&E full-time equivalent headcount can be found in Appendix I.B. of this Attachment 2 for Supplemental Budget Information.

## C. Table showing costs by functional area of management structure.

PG\&E provides the requested information in multiple tables in Appendix I.C. of this Attachment 2 for Supplemental Budget Information:

- Function Definitions Table,
- Residential Budget Detail,
- Commercial Budget Detail,
- Agricultural Budget Detail,
- Industrial Budget Detail,
- Public Sector Budget Detail, and
- Cross-Cutting Budget Detail.

These tables itemize expenses into labor, non-labor O\&M (with contract labor identified). There were no associated capital costs.

## D. Table showing cost drivers across the EE organization

The following table shows the major cost drivers across PG\&E's EE organization. As recommended by TURN and Cal PA, this table is based on the format of testimony concerning cost drivers in PG\&E's 2017 general rate case (GRC).

| Cost Driver | 2018 Expenditures | 2020 Forecast | Difference |
| :--- | ---: | ---: | ---: |
| Program Design and Delivery | $\$ 262.1$ | $\$ 195.6$ | $-\$ 66.5$ |
| Program Fulfillment | $\$ 4.2$ | $\$ 2.8$ | $-\$ 1.4$ |
| Operations Support | $\$ 18.3$ | $\$ 16.1$ | $-\$ 2.2$ |
| Total | $\mathbf{\$ 2 8 4 . 6}$ | $\mathbf{\$ 2 1 4 . 5}$ | $\mathbf{- \$ 7 0 . 1}$ |

*This is the Total Sector Budget, which excludes EM\&V, DSM, On Bill Financing (OBF) Loan Pool, Bay Area Regional Network (BayREN), Marin Clean Energy (MCE), and Tri-County Regional Network (3C-REN).

Program Design and Delivery - overall decrease in cost primarily associated with the following drivers:

- Existing program ramp-down in anticipation of new programs.
- Program budgets decreased across the portfolio due sunsetting lighting measures.
- Addition of third-party and statewide placeholder and contracts. PG\&E is only forecasting for a half year of ramp-up costs for new implementers with very little incentive budget.
- Decrease in staffing due to operational efficiencies.

Program Fulfillment - Overall decrease in staffing costs due to fewer custom projects for inspections and fewer rebates being processed.

Operations Support - Overall decrease in staffing and contract costs. PG\&E is cutting costs but also absorbing a lot of additional administratively burdensome tasks for operations support such as data requests, annual filings, and additional regulatory requirements for business plan metrics and business plan support.

## E. Explanation of allocation of labor and O\&M costs between EE-functions and GRC- functions or other non-EE functions

1. When an employee spends less than $100 \%$ of her/his time on EE, how are costs tracked and recovered (e.g., on a pro rata basis between EE rates and GRC rates; when time exceeds a certain threshold, all to EE; etc.).

PG\&E employees fill out timesheets each week and charge their hours worked to order numbers. Typically, an employee will charge a maximum of 40 hours per
week. Order numbers are the accounting vehicle for capturing costs of the EE subprograms, as well as non-EE programs (demand response (DR), Energy Savings Assistance (ESA), etc.) and GRC-related activities. Each order number is assigned attributes that allow for the accurate reporting of charged costs. There are unique attributes assigned to each order that identify the following information used for regulatory reporting:

- Funding Cycle (e.g., EE, DR, ESA, etc.)
- EE Program or Sector (e.g., Residential, Commercial, Industrial, etc.)
- EE Subprogram (e.g., Energy Upgrade California (EUC) Home Upgrade, Commercial Calculated Incentives, etc.)
- Cost Category (e.g., Administrative, Marketing, Implementation, EM\&V)
- Program Type (e.g., Resource, Non-resource)
- Delivery Channel (e.g., Core, Third-party, Governmental Partnerships)

Each order number can only be assigned one attribute from each of the above reporting categories. For example, an order cannot be assigned multiple funding cycles. Costs charged to an order can only be identified and reported as either EE or DR or ESA or GRC, etc. An order can only be identified and reported to only one Sector, only one Subprogram, only one Cost Category, etc.

Because of this model of charging and categorizing costs, when an employee fills out a timesheet, the employee must choose an order or orders that reflect the work functions performed during the week. There is a dropdown menu on the timesheet in which the employee selects the appropriate order number that reflects the work performed. For example, assume that a PG\&E employee performed implementation functions for the Energy Upgrade California subprogram that is part of the current EE funding cycle for 24 hours during one week. The employee must choose an order number that describes the subprogram, funding cycle, and cost category of the work performed. The employee would accordingly record 24 hours associated with that order. Then, assume that the same employee also worked 16 hours in the same week on some GRC activities. The employee would choose a different order number that best describes the GRC activities performed, then record the 16 hours against that GRC order.

Once the timesheet is complete, the employee's supervisor would review and approve it. Because of the existing cost model, costs charged to GRC-related orders should not be reported or charged against authorized EE budgets or recorded in EE balancing accounts. By the same token, costs charged to EE orders should be reported against authorized EE budgets, recorded in the EE balancing accounts, and matched against the electric and gas EE- collected revenue. Management costs and other overheads such as office charges are embedded in the employee hourly rate.
2. Describe the method used to determine the proportion charged to EE balancing accounts for all employees who also do non-EE work.

See the response to Question I.E.1, above.
3. Identify the EE functions that are most likely to be performed by employees who

## also do non-EE work (e.g. Customer Account Representatives?)

PG\&E identifies the following functions:

- Account Management / Sales
- Engineering Services support (Applied Technical Services Organization)
- EM\&V
- Call Centers
- Marketing, Education and Outreach (ME\&O)
- Inspections
- Information Technology (IT and System Administration)
- Program Management support (Sourcing Organization)
- Portfolio Analytics
- Policy, Strategy, and Regulatory Reporting Compliance support (Business Finance Organization, Financial Reporting \& Governance)

4. Are labor costs charged to EE fully loaded?

Yes.
5. How are burden benefit-related administrative and general (A\&G) expenses for employees who work on EE programs recovered (EE rates or GRC rates)?

PG\&E allocates these costs to EE pursuant to a settlement agreement with Marin Clean Energy (MCE) and TURN, which was adopted in Decision (D.)14-08-032. PG\&E's burden benefit-related A\&G expenses for employees who work on EE programs are litigated through its GRC and are recovered through EE rates.
6. When EE and non-EE activities are supported by the same non-labor resources, how are the costs of those resources or systems allocated to EE and non-EE activities?

Assuming that "non-labor resources" are defined as contractors and consultants, typically a contract would be created that supports only one funding cycle. The contractor would perform work for only EE, only DR or only ESA, etc. within the scope of one contract. However, occasionally there are contracts that support multiple funding cycles. In this situation, when the Purchase Order (PO) for the contract is created, all work and contracted amounts within the scope of the contract are identified as to the funding cycle being supported (EE, ESA, DR, etc.). Separate PO line items representing each funding cycle would be assigned order numbers that roll up to that particular funding cycle. When the contractor performs work on the contract, its invoice should specify enough detail to determine which funding cycle(s) the work pertained to and which PO line item(s) the work should be charged against. When the invoice is paid, the appropriate order numbers are charged and the costs are reported to the corresponding funding cycles.
7. Identify the EE O\&M costs that are most likely to be spread to non-EE functions as well as EE, if any

See the list provided in response to Question I.E.3, above.

## II. BUDGET TABLES INCLUDING INFORMATION IDENTIFIED INTHE SCOPING MEMO¹

## A. Scoping Memo Attachment-A, Question C. 8

"Present a single table summarizing energy savings targets, and expenditures by sector (for the six specified sectors). This table should enable / facilitate assessment of relative contributions of the sectors to savings targets, and relative cost-effectiveness."

1. TURN and ORA invite the PAs to propose a common table format for this information. We don't have anything specific in mind. Additionally, include a brief description of the method used by the PA to estimate the costs presented in the C. 8 Table.

A single table labeled "Portfolio Summary" summarizing energy savings targets, and expenditures by sector (for the six specified sectors) can be found in Appendix II.A. of this Attachment 2 for Supplemental Budget Information. Please refer to PG\&E's response to Question I.A. 6 for a brief description of the method used by PG\&E to estimate the costs presented in this table.

## B. Scoping Memo Attachment-A, Question C. 9

"Using a common budget template developed in consultation with interested stakeholders (hopefully agreed upon at a "meet and confer" session), display how much of each year's budget each PA anticipates spending "in-house" (e.g., for administration, non-outsourced direct implementation, other non-incentive costs, marketing), by sector and by cross-cutting program."

1. TURN and ORA invite the PAs to propose a common table format for this information. We don't have anything specific in mind. Additionally, include a brief description of the method used by the PA to estimate the costs presented in the C. 9 Table.

Please refer to the Tables in Section I.C, "Costs by functional Areas of Management Structure," for PG\&E's estimate of the portion of annual budget that it anticipates spending "in-house" (e.g., for administration, non-outsourced direct implementation, other non-incentive costs, and marketing), by sector and by cross-cutting programs. Please refer to PG\&E's response to Question I.A. 6 for a brief description of the method used by PG\&E to estimate the costs presented in this table.

## C. Scoping Memo Attachment-A, Question C. 10

[^17]"Present a table akin to PG\&E's Figure 1.9 (Portfolio Overview, p 37) or SDG\&E's Figure 1.10 (p.23) that not only shows anticipated solicitation schedule of "statewide programs" by calendar year and quarter, but also expected solicitation schedule of local third-party solicitations, by sector, and program area (latter to extent known, and/or by intervention strategy if that is more applicable). For both tables, and for each program entry on the calendar, give an approximate size of budget likely to be available for each solicitation (can be a range)."

1. TURN and ORA invite the PAs to propose a common table format for this information. We don't have anything specific in mind. Additionally, include a brief description of the method used by the PA to estimate the costs presented in the C. 10 Table.

PG\&E provides a table with its expected solicitation schedule for local third-party solicitations and by sector in Appendix II.C. of this Attachment 2 for Supplemental Budget Information. This table includes an approximate budget range likely to be available for each solicitation. For PG\&E's budgets for Statewide Programs, please refer to the Statewide Budget Table in Table 8 of Attachment 4 of PG\&E's 2020 ABAL. At this time, given the nature of PG\&E's solicitation strategy and allowing for multisector bids, PG\&E cannot predict the budget size that each sector will need and has provided a range of $\$ 0.0 \mathrm{M}-\$ 150.0 \mathrm{M}$.

# PG\&E 2020 ABAL Attachment 2: Supplemental Budget Information 

Appendix I.A1.<br>Narrative Description - Functions Conducted by Each<br>Department/Organization

Codes and Standards (C\&S) \& Cross Cutting: C\&S works with local, state, and federal authorities to develop and substantiate new building codes and appliance standards. C\&S also supports compliance improvement through development and delivery of education, training, and tools. Major functions and areas of responsibility include Building Energy Codes Advocacy, Appliance Standards, Reach Codes and Planning/Coordination. This team also manages the new construction programs.

Workforce Education \& Training: This team supports the training centers and delivers classes/events each year to a variety of partners including 3P, Low Income, Contractors, Architects, etc. They also maintain a tools lending library, deliver programs to K-12 schools + community colleges throughout our territory and consult on energy efficiency needs for customers.

EE Procurement: This team oversees the implementation of a business strategy to transition at least $60 \%$ of the EE budget to fund EE programs proposed, designed, implemented and delivered by third party vendors and at least $25 \%$ of EE budget to fund statewide programs by 2022.

Engineering Services: Engineering Services includes the Deemed Product Support (DPS), Field Engineering, and Custom Implementation teams. DPS develops work papers to substantiate the energy savings for our deemed products; reviews calculated incentive applications; manages the parallel review process for calculated projects; and completes claims reviews and audit reviews. The Field Engineering teams also support implementation of our calculated energy efficiency programs by providing on-site auditing services, calculation assistance, and technical support for our sales and service staff. The Custom Implementation supports delivery of our custom programs across all channels by providing technical support, performing quality assurance activities, managing external vendors, and supporting training for our calculated energy efficiency projects.

Non-Residential Programs: This team includes the Commercial Programs, Industrial, Agriculture, \& Water Programs (IAW), and financing programs. This team focuses on leveraging relationships with retailers, manufacturers, distributors and trade professionals to drive access and adoption of EE products and services. In addition, the IAW Program team is responsible for the overall strategy and execution of energy efficiency programs that cater to a wide array of customer segments that include Refineries, Oil Production, Manufacturing, Food Processing, Water Agencies, Wineries, Dairies and Agricultural Growers. The IAW team is also leading the water-energy nexus related activities. Our financing team oversees On-Bill Financing, our interaction with the Statewide financing pilots, project evaluation tools and EE funding related activities.

Policy Shaping, Analytics \& Compliance: This team provides strong and sound policy direction and leadership to EE Programs to empower them with the knowledge and tools they need to drive business objectives, achieve EE savings goals, and demonstrate strength in program administration. It also provides direction for future EE portfolio administration. Addresses long-term EE strategic issues and related regulatory and legislative policy issues that arise at state and national levels. Aims to Influence long term policy to advance PG\&E's EE goals and ensure PG\&E's leadership in EE is well represented in key markets.

Portfolio Strategy \& Optimization: This team focuses on proactively planning for and overseeing the strategy and health of the EE portfolio

Residential and Partnership Programs: This team designs, manages and delivers programs that engage and support residential customers. In addition, this team also manages local and regional partnerships covering nearly every city and county in PG\&E's service territory as well as supports four statewide joint-Investor Owned Utilities (IOU) institutional partnerships. The team serves as the Public Sector lead for the EE Portfolio overseeing the strategy and programs that serve cities, counties, public schools, special districts, higher education institutions and state government organizations.

## Organizations Outside EE that Support EE Activities

Application Management: Application Management includes Enrollment \& Incentive Management (E\&IM). E\&IM manages vendor contract with Parago, PG\&E's partner for residential rebate fulfillment services; processes deemed and partner rebates; and supports application processing for the financing programs.

Applied Technical Services (ATS): Applied Technology Services (ATS) provides a range of technology-based services across PG\&E. These include chemical and site testing, civil and mechanical engineering support, equipment testing and emerging technologies testing, and meteorology operations and analytics, among others.

Business Energy Solutions (BES): BES manages relationships with PG\&E's commercial, industrial, and agricultural customers, helping to manage business customers' energy and cost reduction and service-related needs. It is aligned along key market segments serving large customers and small/medium size businesses to respond to industry trends, customer needs and opportunities as well as provide service and product offerings.

Business Finance: Business Finance provides accounting and budgeting support to help manage spending and align it with regulatory and corporate priorities. Business Finance provides direct support for each assigned budget manager.

Central Inspections: The Central Inspection Program provides inspection verification of EE and ESA programs and products. CIP validates the physical installation and use of EE and ESA measures that were submitted on applications requesting rebates or incentives. Without the inspection/verification process the business is at risk due to not following CPUC/Business program guidelines and/or possible fraud by vendors or customer claiming rebates/incentives they are not authorized to receive.

Customer Energy Solutions (CES) Business Operations: Business Operations supports all Customer Energy Solutions teams (including EE) with performance management, financial management, quality assurance and compliance, process improvement, data mining, analysis, and reporting.

Customer Insights and Strategy (CIS): Customer Insights \& Strategy serves as a resource for any PG\&E department seeking information about customers for strategic and tactical decisionmaking purposes. The team conducts primary research regarding general customer behavior, attitudes, and profiles, or for specific programs, policies, and projects, maintains customer database and conducts data analysis, and delivers actionable insights and strategies at both the enterprise level and for individual business units

Customer Operations Regulatory Strategy (CORS): Customer Operations Regulatory Strategy (CORS) develops and implements customer privacy and governance, oversees risk management, regulatory compliance and audits, and leads various significant Customer Carewide projects and manages their transition to operations (such as records management).

EE Evaluation, Measurement, and Verification (EM\&V): conducts EE market and program evaluations for the purposes of program improvement, and to inform long-term program and policy planning. The team works to ensure that CPUC EM\&V study methods and implementation provide results and savings values that are reasonable, reliable, actionable and accurate. In addition, the team provides support for development of EE goals and potential, long-term EE savings forecasts, and cost-effectiveness calculations.

Energy Insight (System Administration): The System Administration team is responsible for developing and implementing the long-term strategy of energy efficiency platforms; maintaining existing energy efficiency platforms and integrating the Energy Insight platform into the business; developing a governance process across energy efficiency platforms; and partnering with IT to ensure projects and enhancements are aligned with our long-term strategy.

Financial Reporting \& Governance (FR\&G): In collaboration with Business Finance, FR\&G develops long-range financial plans for regulatory filings; facilitates the annual budget planning process and quarterly forecasting process; and provides financial support including benchmarking activities and audit support for all balancing accounts. FR\&G also leads supplier diversity activities for Customer Care.

Information Technology (IT): The Information Technology organization designs, develops, operates and maintains the technology and telecommunications systems that enable PG\&E to meet its commitment to providing safe, reliable and affordable service to customers. IT supports the business by improving service quality, increasing capabilities through the development of additional functionality, implementing new technologies, reducing costs, increasing productivity, and facilitating organizational and business effectiveness through enabling technologies.

Law: The Law Department provides high quality advice, counsel, and representation of the Company. It provides actionable feedback to the lines of business in order to identify and reduce areas of risk, based on claims, lawsuits, and other legal activities.

Local Customer Experience (LCE): The Local Customer Experience team strengthens the outreach and program support offered to customers, communities and internal partners by the Customer Impact team.

Measurement, Data Analytics \& Products: The Measurement, Data Analytics \& Products team leverages data of all kinds to better serve customers; works across the organization to tackle cross-cutting strategic issues. The group also performs ex post and ex ante load impact evaluations; enrollment forecasts; operational forecasts; market research; market potential studies; market characterization studies; and process evaluations. It also develops, manages and coordinates PG\&E's broad portfolio of interval data-based research and analytical projects spanning Time Varying Rates, Distributed Generation and Energy Efficiency.

Call Center: PG\&E operates 5 call centers throughout its service territory to respond to customer inquiries.

Sales Operations: The Customer Sales Operations team supports application submission and pre-field and pre-calculations for specific custom energy efficiency programs, including Calculated Retrofit, Savings by Design and Calculated New Construction. The team's responsibilities include receiving the application, setting the right course for the project, setting the right expectations on the part of the customer, and identifying all project savings before handing the project off to the Project Office.

Smarter Energy Line (SEL): Smarter Energy Line (SEL) is a designated group of call center representatives that provide residential customers information about energy reduction, energy savings, rebates, energy efficient appliance options, Energy Partners, and PG\&E's many program offerings. The team's main goal is "customer education" and providing targeted assistance to customers who have recently had their Energy Cost Inquiries resolved.

Solutions Marketing: Solutions Marketing collaborates with various CES groups to produce marketing campaigns and collateral and provide marketing support to deliver on its vision of elevating the importance of energy management to PG\&E customers by offering them unique and simple solutions.

Sourcing: The Sourcing organization is the functional lead for the procurement of materials and services. The department collaborates with internal clients and suppliers to develop mutually beneficial total cost solutions for goods and services. To provide dedicated and expert service, the Sourcing organization is segmented into the following functional groups: Electric Sourcing, Gas Sourcing, IT Sourcing, and Generation Supply Chain.

| Sector | Cost Element | Functional Group | 2018 EE Expenditures (\$Million) | $2020 \text { EE }$ <br> Budget <br> (\$Million) | Difference | Drivers |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| PG\&E Portfolio | Labor (1) | Policy, Strategy, and Regulatory Reporting Compliance | \$4.4 | \$4.0 | -\$0.4 | Decrease in staffing and absorbing inflation. |
| including EM\&V and DSM, excluding OBF Loan Pool |  | Program Management | \$16.4 | \$14.2 | -\$2.2 | Difference due to reduced costs through identifying efficiencies in program management activities over time, while preparing for compliance with $60 \%$ outsourcing goals. |
|  |  | Engineering services | \$7.0 | \$6.7 | -\$0.3 | Decrease in staffing and absorbing inflation. |
|  |  | Customer <br> Application/Rebate/Incentive Processing | \$2.3 | \$1.9 | -\$0.4 | Decrease in staffing and absorbing inflation. |
|  |  | Customer Project Inspections | \$1.6 | \$0.8 | -\$0.9 | Difference due to decreased volume of deemed \& custom projects, thus the number of inspections has decreased, resulting in lower costs for this function. |
|  |  | Portfolio Analytics | \$1.8 | \$1.5 | -\$0.3 | Decrease in staffing and absorbing inflation. |
|  |  | ME\&O (Local) | \$2.7 | \$2.4 | -\$0.3 | Decrease in staffing and absorbing inflation. |
|  |  | Account Management / Sales | \$15.1 | \$11.2 | -\$3.9 | Reducing budget due to reduced goals, less reliance on account management/sales for customer acquisition and their projects' savings. Also, the residential sector, which BES does not support, is becoming a bigger portion of PG\&E's portfolio savings. |
|  |  | IT | \$5.2 | \$4.6 | -\$0.6 | Reducing overall spend as the Salesforce system is stabilized, while still ensuring enhancements are funded to ensure new third-party programs are successful. Overall IT change (labor + contracts) is a decrease of $\sim \$ 327 \mathrm{~K}$. |
|  |  | EM\&V | \$1.7 | \$1.5 | -\$0.2 | Decrease in staffing and absorbing inflation. |
|  |  | Call Center | \$0.5 | \$0.4 | -\$0.1 | Decrease in staffing and absorbing inflation. |
|  | Labor Total |  | \$58.6 | \$49.1 | -\$9.5 |  |

| Sector | Cost Element | Functional Group | 2018 EE Expenditures (\$Million) | $\begin{aligned} & 2020 \text { EE } \\ & \text { Budget } \\ & \text { (\$Million) } \end{aligned}$ | Difference | Drivers |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Non-Labor | Third-Party Implementer Contracts (as defined per D.16-08-019, OP 10) | \$0.0 | \$27.9 | \$27.9 | N/A as these are outsourced costs and the question asks for drivers of in-house costs. |
|  |  | Local/Government Partnerships Contracts (3) | \$11.5 | \$6.3 | -\$5.2 | $\mathrm{N} / \mathrm{A}$ as these are outsourced costs and the question asks for drivers of in-house costs. Note: A third-party placeholder for LGPs of $\$ 2.5 \mathrm{M}$ is included in above line for Third-Party Implementer Contracts. Net decrease of $\$ 2.7 \mathrm{M}$. |
|  |  | Other Contracts |  |  |  |  |
|  |  | Program Implementation | \$73.0 | \$48.7 | -\$24.3 | Reduced existing programs' contracts spend to make room for new third-party contracts. Furthermore, program budgets decreased across the portfolio due sunsetting lighting measures. |
|  |  | Policy, Strategy, and Regulatory Reporting Compliance | \$3.2 | \$1.8 | -\$1.4 | Decrease based on contract reductions |
|  |  | Program Management | \$2.1 | \$2.0 | -\$0.1 | Decrease in staff augmentation and other PM-related costs, offset by addition of cost for independent evaluators for third-party solicitations process. |
|  |  | Engineering services | \$6.6 | \$5.7 | -\$0.9 | Fewer custom projects resulting in less technical review, therefore lower spend. |
|  |  | Customer Application/Rebate/Incentive Processing | \$0.3 | \$0.1 | -\$0.2 | Decrease in contracts costs for application processing. |
|  |  | Customer Project Inspections | \$0.0 | \$0.0 | \$0.0 | Immaterial difference. |
|  |  | Portfolio Analytics | \$0.0 | \$0.0 | \$0.0 | Immaterial difference. |
|  |  | ME\&O (Local) | \$6.9 | \$5.3 | -\$1.6 | Lower costs due to more targeted marketing campaigns for non-residential sectors. |
|  |  | Account Management / Sales | \$0.4 | \$0.3 | -\$0.1 | Decrease in staff augmentation and other account management/sales non-labor costs. |
|  |  | IT | \$5.1 | \$5.3 | \$0.2 | Reducing overall spend as the Salesforce system is stabilized, while still ensuring enhancements are funded to ensure new third-party programs are successful. Overall IT change (labor + contracts) is a decrease of $\sim \$ 327 \mathrm{~K}$. |
|  |  | Call Center | \$0.0 | \$0.0 | \$0.0 | No contract costs. |
|  |  | EM\&V | \$2.5 | \$8.0 | \$5.4 | EM\&V budgets are set at 4\%, and spend typically occurs in future years. |
|  |  | Facilities |  |  |  | PG\&E's cost model bundles facilities costs in labor overheads among other overheads and are included in the labor costs above. |

| Sector | Cost Element | Functional Group | 2018 EE Expenditures (\$Million) | 2020 EE <br> Budget <br> (\$Million) | Difference | Drivers |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Incentives--(PA-Implemented and Other Contracts Program Implementation) Programs | \$109.1 | \$44.7 | -\$64.4 | Reduced existing programs' contracts \& incentives spend to make room for new thirdparty contracts. Furthermore, program budgets decreased across the portfolio due sunsetting lighting measures. |
|  |  | Incentives--Third Party Program (as defined per D.16-08-019, OP 10) | \$9.7 | \$18.7 | \$9.0 | N/A as these are outsourced costs and the question asks for drivers of in-house costs. |
|  | Non-Labor Total |  | \$230.4 | \$174.9 | -\$55.5 |  |
| Total |  |  | \$289.0 | \$224.0 | -\$65.0 |  |
|  | Other (collected through GRC) (2) | Labor Overheads | \$8.2 | \$15.5 | \$7.3 | 2020 Benefits Burden amount is a placeholder based on the 2019 authorized Benefit Burden budget for EE. |

Notes: (1) Labor costs are already loaded with employee benefits costs.
(2) These costs are collected through the GRC, approved in D.14-08-032 - Decision Authorizing Pacific Gas and Electric Company's General Rate Case Revenue Requirement for 2014-2016, issue date of August 20, 2014 and in D.17-05-013 - Decision Authorizing Pacific Gas and Electric Company's General Rate Case Revenue Requirement for 2017-2019, issue date of May 11, 2017.

## PG\&E 2020 ABAL Attachment 2: Supplemental Budget Information

Appendix I.B.
Energy Efficiency "Full Time Equivalent" Headcount: Portfolio Staffing

| Functional Group | 2018 EE Portfolio <br> FTE | 2020 EE Portfolio <br> FTE |
| :--- | ---: | ---: |
| Policy, Strategy, and Regulatory Reporting Compliance | 30.1 | 25.9 |
| Program Management | 81.1 | 66.2 |
| Engineering Services | 50.5 | 45.3 |
| Customer Application/Rebate/Incentive Processing | 26.0 | 20.4 |
| Customer Project Inspections | 10.3 | 4.5 |
| Portfolio Analytics | 10.7 | 8.5 |
| EM\&V | 9.2 | 7.9 |
| ME\&O | 14.4 | 12.0 |
| Account Management / Sales | 94.0 | 65.5 |
| IT | 40.5 | 34.1 |
| Call Center | 1.9 | 1.5 |
|  | 368.7 | 291.9 |

(1) 2020 FTEs were calculated based on the change in labor costs between 2018 and 2020 (adjusted for a 3\% escalation/year) and applying that change to 2018 FTEs.

| Customer Application/Rebate and Incentive Processing | Costs associated with application management and rebate and incentive processing (deemed and custom) |  <br> Application <br> Processing |  |
| Inspections | Costs associated with project inspections | Inspections |  |
| Portfolio Analytics | Includes analytics support, including internal performance reporting and external reporting | Data analytics | Data development for programs, products and services; Standard and ad hoc data extracts for internal and external clients; Database management; CPUC, CAISO reporting; Data reconciliation; E3 support ; Compliance filing support; Funding Oversight; ESPI support; Program Results Data \& Performance |
| EM\&V | EM\&V expenditures | EM\&V Studies | Program and product review; manage evaluation studies |
|  |  | EM\&V Forecasting | EE lead for LTPP and IEPR; market potential study; integration w/ procurement planning; CPUC Demand Analysis Working Group |
| ME\&O | Costs associated with utility EE marketing; no statewide; focus on outsourced portion | Marketing | Customer Programs, Products, and Services Marketing; Digital Product Development; Digital Content \& Optimization |
|  |  | Customer insights | Voice of the Customer; Customer satisfaction study measurement and analysis (JD Power, SDS); Customer testing/research |
| Account Management / Sales | Costs associated with account rep energy efficiency sales functions | Account Management |  |
| IT | IT project specific costs and regular O\&M | IT - project specific | Projects and minor enhancements. Includes project management/business integration ("PMO/BID"). Excluded: maintenance (which SCE defines as when something goes down, normal batch processing, verifying interfaces, etc.). |
|  |  | IT - regular O\&M |  |
| Call Center | Costs associated with call center staff fielding EE program questions | Call Center |  |
| Incentives | Costs of rebate and incentive payments to customers | Incentives |  |

| Sector | Cost Element | Functional Group | 2018 EE <br> Portfolio Expenditures (\$Million) |  |
| :---: | :---: | :---: | :---: | :---: |
| Residential | Labor(1) | Policy, Strategy, and Regulatory Reporting Compliance | \$1.0 | \$1.2 |
|  |  | Program Management | \$2.6 | \$3.1 |
|  |  | Engineering services | \$0.6 | \$1.0 |
|  |  | Customer Application/Rebate/Incentive Processing | \$0.6 | \$0.5 |
|  |  | Customer Project Inspections | \$0.7 | \$0.3 |
|  |  | Portfolio Analytics | \$0.4 | \$0.5 |
|  |  | ME\&O (Local) | \$0.8 | \$0.8 |
|  |  | Account Management / Sales | \$0.1 | \$0.0 |

## California Energy Data and Reporting System (CEDARS) Filing Confirmation

## CEDARS FILING SUBMISSION RECEIPT

The PGE portfolio filing has been submitted and is now under review. A summary of the filing is provided below.

PA: Pacific Gas \& Electric (PGE)

Filing Year: 2020

Submitted: 11:12:53 on 30 Aug 2019

By: Wilson Wong

Advice Letter Number: 4136-G/5627-E

* Portfolio Filing Summary *
- TRC: 1.2582
- PAC: 4.0582
- TRC (no admin): 1.6712
- PAC (no admin): 20.0074
- RIM: 0.5488
- Budget: \$224,025,828.97
* Programs Included in the Filing *
- PGE21001: Residential Energy Advisor
- PGE210010: Pay for Performance Pilot
- PGE210011: Residential Energy Fitness program
- PGE21002: Residential Energy Efficiency
- PGE21003: Multifamily Energy Efficiency
- PGE21004: Energy Upgrade California
- PGE21005: Residential New Construction
- PGE21006: Residential HVAC
- PGE21007: California New Homes Multifamily
- PGE21008: Enhance Time Delay Relay
- PGE21009: Direct Install for Manufactured and Mobile Homes
- PGE21011: Commercial Calculated Incentives
- PGE210112: School Energy Efficiency
- PGE210119: LED Accelerator
- PGE21012: Commercial Deemed Incentives
- PGE210123: Healthcare Energy Efficiency Program
- PGE21013: Commercial Continuous Energy Improvement
- PGE210135: Water Infrastructure and System Efficiency
- PGE210139: SEI Energize Schools Program
- PGE21014: Commercial Energy Advisor
- PGE210143: Hospitality Program
- PGE21015: Commercial HVAC
- PGE21018: EnergySmart Grocer
- PGE21021: Industrial Calculated Incentives
- PGE210210: Industrial Recommissioning Program
- PGE210211: Light Industrial Energy Efficiency
- PGE210212: Compressed Air and Vacuum Optimization Program
- PGE210213: Small Petrochemical Energy Efficiency
- PGE21022: Industrial Deemed Incentives
- PGE21023: Industrial Continuous Energy Improvement
- PGE21024: Industrial Energy Advisor
- PGE21025: California Wastewater Process Optimization
- PGE21026: Energy Efficiency Services for Oil Production
- PGE21027: Heavy Industry Energy Efficiency Program

Pacific Gas and Electric Company
2020
Table 1 -Bill Payer Impacts - Rates by Customer Class

|  | Electric Average Rate (Res and Non-Res) \$/kwh |  | Gas Average Rate (Res and Non-Res) \$/therm |  | ill Savings by (\$) |  | Lifecycle Bill gs (\$) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Present Rates - System Average |  |  |  |  |  |  |  |
| 2013 | \$ 0.16088 | \$ | 1.18081 | \$ | 152,246,518 | \$ | 1,553,692,551 |
| 2014 | \$ 0.16891 | \$ | 1.24800 | \$ | 161,566,746 | \$ | 1,557,176,408 |
| 2015 | 0.17094 | \$ | 1.50984 | \$ | 226,868,285 | \$ | 2,396,414,536 |
| 2016 | \$ 0.18423 | \$ | 1.66679 | \$ | 263,727,662 | \$ | 2,670,876,906 |
| 2017 | \$ 0.19092 | \$ | 1.59360 | \$ | 300,032,228 | \$ | 3,316,129,816 |
| 2018 | \$ 0.19545 | \$ | 1.53810 | \$ | 296,725,167 | \$ | 3,461,239,273 |
| 2019 | 0.20701 | \$ | 1.57527 | \$ | 305,905,770 | \$ | 3,414,305,688 |

Notes:

1) Average first year electric bill savings is calculated by multiplying an average electric rate with first year net kWh energy savings.
2) Average first year gas bill savings is calculated by multiplying an average gas rate with first year net therm energy savings.
3) Total average first year bill savings is the sum of Notes 1 and 2.
4) Average lifecycle electric bill savings is calculated by multiplying an average electric rate with lifecycle net kWh energy savings.
5) Average lifecycle gas bill savings is calculated by multiplying an average gas rate with lifecycle net therm energy savings.
6) Total average lifecycle bill savings is the sum of Notes 4 and 5.
7) As of $7 / 1 / 2019$, the bundles average electric rate is $\$ 0.20701$ per kWh before the impact of the proposed EE programs
8) As of $8 / 1 / 2019$, the bundled average gas rate is $\$ 1.547$ per therm before the impact of EE programs.
9) Total Average Bill Savings by Year and Lifecycle Bill Savings include C\&S net lifecycle savings and exclude ESA Programs.
10) Consistent with SPM TRC/PAC/RIM tests, all savings used from actuals and forecasts in this table are net not gross
11) All Bill Savings estimates values are based on energy savings from program year annual reports, except for 2019 which is based on the 2019 ABAL savings forecast.

1. "2015 Total Budget with Commitments \& Fundshifts" reflects funds available for 2015, from the authorized 2013-2015 Budget, less the spending in 2013-2014 from the 2013-2015 Budget 2. "2015 Total Budget Spent" includes spending in 2015 paid from the 2013-2015 Budget
.Requested Carry Over of pre-2013 Unspent Funds to 2016 idenifies the funds PG\&E is requesting to carry over to 2016 in supplemental Advice 3752-G-B/4905-E-B, which was approved on November 2 , 2016 .
In addition to the amounts identified at the subprogram level in column G , $\mathrm{PG} \&$ Ewas approved authorization to shift $\$ 9.9 \mathrm{~m}$ of pre-2013 unspent funds into the Commercial Deemed Incentive program 2016 budget.
2. The CPUC approved AL 3718-G/4852-E on July 11,2016 , authorizing PG\&E to return a total of $\$ 43,024,401.85$ in unspent, uncommitted energy efficiency funds from its 2013 -2015 program cycle to its customers G\&E implemented this through a one-time adjustment to its gas and electric EE balancing accounts.
3. Commitments as of $12 / 31 / 2015$ (column I), 12/31/2016 (column R), and 12/31/2017 (column Y) includes incentive Commitments as of the end of the year indicated. Contractual encumbrances are not reflected BayREN and MCE Carry Over figures represent the level of funds in PG\&E's balancing accounts; this may include BayREN ex
indicated: the remainder is the amount potentially available for carry over; these may not match MCE or BayREN submissions.
4. 2013-2015 Unspent/Committed Funds, Carryover to 2016" Identifies unspent, committed funds that are carried over into 2016 and augment the 2016 budget, in accordance with D.12-11-015, as follows: New Financing Offerings: In D. 15-06-008, the Commission ordered that PG\&E operate for a minimum of 24 months from the point at which each pilot program enrolls its first loan. The Pilots have begun enrolling oans in 2016 indicating that the pilots will run until at least 2018. New financing pilot subprogram funds collected during 2013-2014 period are being carried over to continue to operate during this compliance period. Funds Transferred to REN and CCA balancing accounts: In D.16-05-004 (petition to modify D.14-10-046), effective May 12, 2016, the Commission authorized for Marin Clean Energy (MCE) an annual budget increase of $\$ 366,080$ for the duration of the ten-year rolling portfolio cycle unless and until modified by the Commission. The CPUC approved AL 3718-G/4852-E on July 11, 2016, authorizing PG\&E to use unspent $2013-2015$ unspent funds to fund the increase in MCE's 2016 budget. Advice Letter 3704-G/4826-E, effective April 29,2016 , authorized for BayREN a one-time budget increase of $\$ 3,700,000$ transferred from unspent $2013-2015$ cycle EE funds to the 2016 cycle.
Marin Clean Energy: MCE's 2015 authorized gas budget included $\$ 419,000$. The Commission authorized a gas budget of $\$ 219,000$ in D.14-10-046 and augmented the gas budget by $\$ 200,000$ per PG\&E Advice 3642 G/4720-E, filed 10/15/2015, approved 10/28/2015. After $\$ 382,818$ of gas payments from PG\&E to MCE, $\$ 36,182$ is available for carryover to 2016
5. "Pre-2016 unspent/uncommitted funds available for 2017 offset" identifies $2013-2015$ cycle unspent funds at the program level. The balancing account transfer for $\$ 43$ million of funds refunded to customers base
on Advice Letter 3718 -G/4852-E is identified on Row 154 . Unspent funds from 2009 and $2010-2012$ are represented in Column $G$. In 2017 PG\&E recorded a one-time electric EE balancing account adiustm $\$ 230,474$ crediting customer rates for unspent $2015-2016$ Marin Clean Energy Electric funds. In the 2018 ABAL, It had been pointed out that of the $\$ 230,474$, a refund should have occurred in the amount of $\$ 311,915$
from the 2016 cycle, while an increase of $\$ 81,441$ should have been applied to the $2013-2015$ cycle.
6. Represents 2020 forecasted ABAL budget for PG\&E and authorized 2019 ABAL budgets as placeholders for BayREN, 3C-REN, and MCE because the 2020 ABAL forecasted budgets for the RENs and MCE were ot available in time for incorporation into PG\&E's 2020 ABAL filing. If/when the REN and MCE 2020 ABAL budgets are approved, cost recovery for the REN and MCE budgets will be based on their approved 2020 BAL budgets
(CEBA) and the On-Bill Financing Balancing Account (OBFBA) subaccounts. The $\$ 14$ million referenced in cell H 57 was transferred to the CEBA subaccount.
7. Statewide ME\&O budgets for 2017 throagh September 2019 were approved in Advice Letter 3783-G/4963-E on January 23, 2017 , effective November 28, 2016. Budgets for October 2019 through 2021 were equested in Advice Letter 4098-G/5544-E and supplements, and are pending approval. The portion of SW ME\&O allocated to EE is reflected in PG\&E's cost effectiveness calculations.
8. The "2018 Authorized Budget" in Table 4 represents PG\&E's 2018 CEDARS filing budget at the subprogram level detail, and BayREN and MCE's approved budgets per the Business Plan Decision D. 18 -0541. This budget is lower than PG\&E's 2018 portfolio budget of $\$ 416,713,780$, also approved in D. 18-05-041. Subprogram level detail is unavailable in the approved Business Plan budget.
9. BayREN and MCE budgets are the authorized amounts from the Business Plan decision D. 18-05-041, with their EM\&V budgets increased to be $4 \%$ of their total budget.
10. 2019 3C-REN budget is the proposed contribution for PG\&E as circulated by 3C-REN on August 28,2018 , which includes $4 \%$ EM\&V.

PA Name: Pacific Gas and Electric Company
Budget Year: 2020

| 2020 Requested Program Funds - BayREN (incl. EM\&V) |  | \$16,583 | \$7,450 | \$24,034 |
| 2020 Requested Program Funds - MCE (incl. EM\&V) |  | \$4,793 | \$2,153 | \$6,946 |
| 2020 Requested Program Funds - 3C-REN (incl. EM\&V) |  | \$1,955 | \$878 | \$2,833 |
| 2020 Requested EM\&V (IOU only) |  | \$6,556 | \$2,945 | \$9,501 |
| 2020 Total Portfolio Request | \$7,771 | \$187,224 | \$84,115 | \$271,339 |

\{1\} Authorized budget excludes reductions from past unspent funds, carryover and is consistent with funding approved in D. 09-09-047, D. 12-11-015, D.14-10-046, D.15-10-028 and D.18-05-041. 2018 Utility and EM\&V budgets presented are from the 2018 ABAL. These budgets are also reflected in the revised CEDARS filing approved on August 3, 2018 by Energy Division, as well as in Table 4 Carryover (footnote 12). BayREN and MCE's budgets are approved in the Business Plan Decision (D.18-05041).

Notes:

1. $10 \%$ cap requirement based on D. 09-09-047 is set for IOU only.
2. New third-party programs (as defined per D.16-08-019, OP 10) were combined into "Third Party \& Partnership". Terminology for this table should be revisited for future filings given the new third party definition.
3. Target Exempt Programs are Non-Resource Programs which include: Emerging Technologies, Workforce Education \& Training, Strategic Energy Resources (SER) program, 3P Placeholder for Public LGPs, and Codes \& Standards programs (excluding Building Codes Advocacy, Appliance Standards Advocacy and National Standards Advocacy).
4. Statewide Marketing, Education \& Outreach (SW ME\&O) is excluded from the Marketing and Outreach cost target calculation per D.13-12-038, at p. 82.
5. Statewide ME\&O budgets for October 2019 through 2021 were requested in Advice 4098-G/5544-E and supplements, and are pending approval. The amount in Line 7 represents the portion allocated to EE .
6. EM\&V costs include only PG\&E's IOU EM\&V budget.
7. The EM\&V percentage is based on PG\&E's total programs budget of $\$ 237,525,829$, which excludes SWME\&O, BayREN, MCE and 3C-REN. This is the Total in line 13 , minus SWME\&O in line 7.
8. As directed in the Energy Efficiency Policy Manual Version 5 July 2013, p. 92, this total includes SW ME\&O and excludes BayREN, MCE, and 3C-REN budgets and is the denominator used to calculate the Administrative, Marketing, and Direct Implementation Non-Incentives percentages.
9. PG\&E's 2020 Proposed Budget of $\$ 271,339,165$ excludes SWME\&O budget of $\$ 6,859,212$ and includes BayREN, MCE and $3 C-R E N$ budgets of $\$ 24,033,828$, $\$ 6,946,418$ and $\$ 2,833,090$ respectively. BayREN, MCE, and 3C-REN budgets are based on their 2019 ABAL approved budgets and using 45.6\% of 3C-REN's budget for PG\&E's portion.
10. PG\&E's percentage for third-party implementer contracts uses $\$ 228,024,796$ as its denominator, which is PG\&E's IOU Subtotal, excluding EM\&V, SW ME\&O, BayREN, MCE, and 3C-REN. PG\&E's 2020 forecast includes $23.5 \%$ of budget attributed to third-party implementer contracts, which includes both qualifying existing programs as well as third-party sector-level placeholders (see Section III.C. of this advice letter detailing the Third-Party program forecast approach). This is the Total in line 13 minus, minus SW ME\&O in line 7 and minus EM\&V costs in line 12.
11. PG\&E's third-party implementer contracts (as defined per D.16-08-019, OP 10) includes the following: third-party placeholder contract and incentive budgets, statewide qualifying placeholder contract and incentive budgets, a placeholder amount for PG\&E's On-Bill Financing Loan Pool addition for third-party implementers using financing, and qualifying Residential Energy Advisor and Residential Pay for Performance contracts.

[^0]:    ${ }^{1}$ D. 15-10-028, Ordering Paragraph (OP) 4.
    ${ }^{2}$ D.18-05-041, OP 41-47.
    ${ }^{3}$ D. 19-08-034 pp.23-34, 28.
    ${ }^{4}$ The electric/gas split approved in the 2019 ABAL that is the basis of cost recovery in 2019 is $76 \% / 24 \%$. The 2020 ABAL forecasted electric/gas split is $69 \% / 31 \%$.

[^1]:    ${ }^{5}$ D.15-10-028, OP 4.
    ${ }^{6}$ D.15-10-028, p. 59.
    ${ }^{7}$ D.18-05-041, p. 133.
    ${ }^{8}$ D.18-05-041, pp. 134-135.

[^2]:    ${ }^{9}$ The 2020 GWh, MW, and therm goals are $41 \%, 36 \%$, and $37 \%$ lower, respectively, than the 2019 goals.
    ${ }^{10}$ Second Supplemental Advice 4011-G-B/5375-E-B filed on January 23, 2019 and approved by the Commission on April 2, 2019.

[^3]:    ${ }^{11}$ D.18-05-041, p. 130 and D.19-08-034, p. 27.

[^4]:    ${ }^{1}$ This is the amount by which Statewide $25 \%$ requirement will be measured and what the IOU intends to spend in the PY, including carryovers.
    ${ }^{2}$ The estimated balance of all unspent and uncommitted reflects the total unspent uncommitted for all prior program years up to and through December 31, 2019. These funds are only an estimate at the time of this Advice Letter filing as these numbers have not yet been finalized.
    ${ }^{3}$ The amount of funds to be collected (budget recovery) for the Program Year. In Section G of this Advice Letter, PG\&E requests a cost recovery budget of $\$ 237,525,829$ given that the unspent and uncommitted funds through December 31, 2019 are only estimates. PG\&E will seek Commission approval to return unspent and uncommitted funds through December 31, 2019 when these funds are finalized in early 2020.
    ${ }^{4}$ The IOU Authorized PY Budget Cap uses the "Total Program" budget from PG\&E's approved Business Plan Table 1.5. This total 2020 business plan budget was unchanged in the budget true-up table presented in PG\&E's 2019 ABAL, Second Supplemental Advice 4011-G-B/5375-E-B filed on January 23, 2019 and approved by the CPUC on April 2, 2019.
    ${ }^{5}$ The portfolio TRC and PAC presented in this table are lower than the TRC and PAC including codes and standards and market effects.
    ${ }^{6}$ The public sector budget and savings in this table encompass all activity in the Government Partnership (GP) Programs, which includes public and commercial program activity. PG\&E will transition to reporting program activity in the appropriate public or commercial sectors as it brings on new third-party and statewide programs in 2020 and 2021.
    ${ }^{7}$ The REN and CCA budgets presented in this table represent the approved 2019 ABAL budgets and include CPUC and PAC EM\&V amounts. When the Commission approves the REN and CCA 2020 ABAL budgets, these budgets (with CPUC EM\&V) will be the basis of cost recovery in 2020.

[^5]:    ${ }^{12}$ The 2020 CET User Interface from CEDARS was used to calculate cost-effectiveness.
    ${ }^{13}$ PG\&E's $\$ 12$ million ESPI award estimate for 2020 is based on past ESPI awards.
    ${ }^{14}$ D.12-11-015.

[^6]:    ${ }^{15}$ D.19-08-034, p. 30.

    ${ }^{17}$ This table shows forecast numbers for the third-party placeholders only and does not represent PG\&E's total third-party-qualifying budget. PG\&E forecasted placeholders for new third-party programs expected to be incorporated into the 2020 portfolio. In addition to these placeholders, some of PG\&E's existing programs not shown in this Table 3 count under the third-party definition per D.16-08-019, OP 10. The total portion of PG\&E's budget that counts under this third-party definition is shown in Attachment 5 - Caps and Targets Table.
