TABLE OF CONTENTS	1
UPDATE HISTORY	UP-1
INTRODUCTION	IN-1
I-1. PURPOSE	IN-1
I-2. INTRODUCTORY DEFINITIONS	IN-1
I-3. HANDBOOK APPLICABILITY	IN-2
I-3.1. New Load, New Transmission and Generation Facilities	IN-2
I-3.2. Existing Load or Transmission Facilities	IN-2
I-3.3. Existing Generation Facilities	IN-3
I-4. ELECTRIC INDUSTRY RESTRUCTURING.....	IN-3
I-5. PROCEDURES FOR DEVELOPING TRANSMISSION PLANS AND COORDINATED JOINT STUDIES	IN-4
I-5.1. Procedures for Developing Transmission Plans	IN-4
I-5.2. Procedures for Coordinated Joint Studies.....	IN-5
I-6. ORGANIZATION OF HANDBOOKS.....	IN-5
I-7. STANDARD AND PROJECT-SPECIFIC INTERCONNECTION REQUIREMENTS	IN-6
I-8. CUSTOMER-OWNED EQUIPMENT REQUIREMENTS.....	IN-6
I-9. COMPLIANCE WITH NERC INTERCONNECTION STANDARDS.....	IN-7
I-10. GENERAL RECOMMENDATIONS CONCERNING THE CONTENTS OF LOCAL CEQA DOCUMENTS.....	IN-10
I-10.1. EIR adopted with significant and unavoidable impacts in any environmental impact categories.....	IN-10
I-10.2. First section in your document.....	IN-10
I-10.3. Mitigation Measures v. APMs	IN-11
I-10.4. Not Obligating PG&E	IN-11
I-10.5. Local Ordinances.....	IN-11
I-10.6. Building Code Exemption	IN-12
I-10.7. General Worst-Case Assumptions	IN-12
I-10.8. Impact analyses sections.....	IN-13
I-10.9. Aesthetics	IN-13
I-10.10. GHG analysis.....	IN-13
I-10.11. GHG APMs	IN-14
I-10.12. SF ₆ -specific APMs	IN-14
GLOSSARY	GL-1
SECTION L1-D: REVENUE-METERING REQUIREMENTS FOR DISTRIBUTION LOAD-ONLY ENTITIES	L1-D-1
PURPOSE	L1-D-1
L1-D.1. REVENUE METERING REQUIREMENTS FOR LOAD ENTITIES.....	L1-D-1
L1-D.1.1. Wholesale Service	L1-D-1
L1-D.1.2. End Users (Retail Service).....	L1-D-1
L1-D.1.2.1. PG&E Direct Access Rule 22	L1-D-1
L1-D.1.2.2. PG&E, as an MSP, will provide, install, maintain and test the following meter equipment ...	L1-D-2
L1-D.1.2.3. PG&E, as an MDMA, will provide the following meter data services	L1-D-2
L1-D.1.2.4. All PG&E Load Entities will provide, install and maintain	L1-D-3
L1-D.2. REQUIREMENTS OF REVENUE-METERING POINT	L1-D-4
L1-D.3. COMMUNICATION CIRCUITS.....	L1-D-4
L1-D.4. GROUND POTENTIAL RISE	L1-D-5
SECTION L1-T: REVENUE-METERING REQUIREMENTS FOR TRANSMISSION-ONLY AND LOAD-ONLY ENTITIES	L1-T-1
PURPOSE	L1-T-1

L1-T.1. REVENUE-METERING REQUIREMENTS FOR LOAD ENTITIES AND TRANSMISSION ENTITIES CONNECTING LOAD TO THE PG&E TRANSMISSION SYSTEM	L1-T-1
L1-T.1.1. Wholesale Service	L1-T-1
L1-T.1.2. End User (Retail Service)	L1-T-1
L1-T.1.2.1. Bundled Service	L1-T-2
L1-T.1.2.2. Direct Access Service	L1-T-2
L1-T.1.2.3. Equipment Requirements:	L1-T-3
L1-T.1.3. Additional Requirements	L1-T-4
L1-T.2. LOCATION OF REVENUE METERING POINT	L1-T-5
L1-T.3. COMMUNICATIONS CIRCUITS	L1-T-6
FORM L1-1	L1-T-7
SECTION L2: PROTECTION AND CONTROL REQUIREMENTS FOR LOAD-ONLY ENTITIES AND TRANSMISSION-ONLY ENTITIES	L2-1
PURPOSE	L2-1
APPLICABILITY	L2-1
L2.1. PROTECTIVE RELAY REQUIREMENTS	L2-1
L2.2. RELIABILITY AND REDUNDANCY	L2-3
L2.3. RELAY SPECIFICATIONS RELIABILITY AND REDUNDANCY	L2-3
L2.4. LINE PROTECTION	L2-4
L2.4.1. Fault-Interrupting Devices	L2-5
L2.4.1.1. Circuit Breakers	L2-6
L2.4.1.2. Circuit Switchers	L2-6
L2.4.1.3. Fuses	L2-7
L2.4.1.4. Relay Class Current Transformers (CT)	L2-7
L2.5. STANDBY/BACKUP SOURCE	L2-8
L2.5.1. Standby Source	L2-8
L2.5.2. Backup Generators	L2-8
SECTION L3: SUBSTATION DESIGN FOR LOAD-ONLY ENTITIES AND TRANSMISSION-ONLY ENTITIES	L3-1
PURPOSE	L3-1
L3.1. DEAD-END STRUCTURE	L3-1
L3.2. TRANSFORMERS	L3-1
L3.3. VOLTAGE REGULATION	L3-2
L3.4. POWER FACTOR	L3-3
L3.5. CIRCUIT BREAKER OR OTHER FAULT INTERRUPTING DEVICES	L3-3
L3.6. RULES FOR TAPPING TRANSMISSION LINES	L3-3
L3.7. SWITCHES	L3-4
L3.7.1. Manual Disconnects	L3-4
L3.7.2. Tap Switch	L3-5
L3.7.3. Line Selector Switches	L3-5
L3.8. INTERCONNECTION OF LOAD ENTITY'S OR TRANSMISSION ENTITY'S SUBSTATION WITH PG&E'S SYSTEM	L3-5
L3.9. LOAD ENTITY OR TRANSMISSION ENTITY INTERFERENCE WITH POWER QUALITY	L3-6
SECTION L4: OPERATING PROCEDURES AND REQUIREMENTS FOR LOAD-ONLY AND TRANSMISSION-ONLY ENTITIES	L4-1
PURPOSE	L4-1
APPLICABILITY	L4-1
L4.1. JURISDICTION OF THE ISO AND THE DESIGNATED PG&E CONTROL CENTER	L4-1
L4.2. COMMUNICATIONS	L4-1
L4.3. ATTENDED LOAD FACILITIES OR TRANSMISSION FACILITIES REQUIREMENTS	L4-2
L4.3.1. Voltage Control Device Operation and Special Service Requirements	L4-2
L4.3.2. Connecting and Separating from the Power System	L4-2
L4.3.3. Clearances and Switching Requests	L4-2

L4.3.4. Unusual or Emergency Conditions	L4-2
L4.3.5. Other Communications	L4-3
L4.4. UNATTENDED LOAD FACILITIES REQUIREMENTS.....	L4-4
L4.4.1. Verification of Energized Circuit.....	L4-4
L4.4.2. Separation/Restoration	L4-4
L4.5. SPECIAL SERVICE REQUIREMENTS	L4-4
L4.6. LOAD ENTITY OR TRANSMISSION ENTITY INTERFERENCE WITH POWER QUALITY	L4-4
SECTION L5: PRE-ENERGIZATION TEST PROCEDURES FOR LOAD-ONLY ENTITIES AND TRANSMISSION-ONLY ENTITIES	L5-1
PURPOSE	L5-1
L5.1. TESTS REQUIRED FOR LOAD ENTITIES PRIOR TO ENERGIZING	L5-1
L5.1.1. Proving Insulation	L5-1
L5.1.2. Proving Ratios.....	L5-2
L5.1.3. Circuit Breakers and Circuit Switchers	L5-2
L5.1.4. Current Transformers and Current Circuits	L5-2
L5.1.5. Relays	L5-3
L5.1.6. Primary Disconnect Switch	L5-3
L5.1.7. Station Battery	L5-3
L5.2. ENERGIZING.....	L5-3
L5.3. GENERAL NOTES.....	L5-4
CONTACT INFORMATION SHEET	L5-5
SECTION G1: METERING REQUIREMENTS FOR TRANSMISSION GENERATION ENTITIES	G1-1
PURPOSE:	G1-1
APPLICABILITY.....	G1-1
G1.1. BASIC METERING REQUIREMENTS FOR GENERATORS.....	G1-1
G1.2. DETAILED METERING REQUIREMENTS FOR GENERATORS	G1-3
G1.2.2. Metering Configurations For New Generators	G1-3
G1.2.3. Metering Requirements For New Generators	G1-3
G1.2.3.1. Wholesale Generators	G1-3
G1.2.3.2. Metering Generator's Loads.....	G1-4
G1.3. TELEMETERING REQUIREMENTS FOR GENERATOR MONITORING.....	G1-4
G1.3.1. For New Generation Facilities 1,000 kW or Greater	G1-4
G1.3.2. For New Generation Facilities Less Than 1,000 kW	G1-4
G1.4. METERING CURRENT AND VOLTAGE TRANSFORMERS FOR GENERATORS.....	G1-4
SECTION G2: PROTECTION AND CONTROL REQUIREMENTS FOR TRANSMISSION GENERATION ENTITIES	G2-1
PURPOSE	G2-1
APPLICABILITY.....	G2-1
G2.1. PROTECTIVE RELAY REQUIREMENTS.....	G2-1
G2.2. RELIABILITY AND REDUNDANCY	G2-3
G2.3. RELAY GRADES	G2-4
G2.4. LINE PROTECTION.....	G2-4
G2.5. GENERATOR PROTECTION AND CONTROL	G2-7
G2.5.1. Phase Overcurrent	G2-9
G2.5.2. Over/Undervoltage Relay.....	G2-9
G2.5.3. Over/Underfrequency Relay	G2-9
G2.5.4. Ground and Phase Fault Sensing Scheme.....	G2-9
G2.5.4.1. General:	G2-9
G2.5.4.2. Ground Grid Requirements	G2-9
G2.5.5. Overcurrent Relay with Voltage Restraint/Voltage Control or Impedance Relay	G2-10
G2.5.6. Reverse Power Relay	G2-10
G2.6. DEDICATED TRANSFORMER.....	G2-10
G2.7. MANUAL DISCONNECT SWITCH	G2-11
G2.7.1. General	G2-11

G2.7.2. Specifications G2-12

G2.8. FAULT-INTERRUPTING DEVICES G2-12

 G2.8.1. Circuit Breakers G2-12

 G2.8.2. Circuit Switchers G2-13

 G2.8.3. Relay Class Current Transformers (CT) G2-13

G2.9. SYNCHRONOUS GENERATORS G2-13

 G2.9.1. Synchronizing Relays G2-13

 G2.9.1.1. Automatic Synchronizers Approved by PG&E See Table G2-4 for PG&E-approved devices. . G2-14

 G2.9.1.2. Automatic Synchronizers (not on PG&E’s approved list) Supervised by a PG&E-Approved Synchronizing Relay G2-14

 G2.9.1.3. Manual Synchronization Supervised by a Synchronizing Relay G2-14

 G2.9.1.4. Manual Synchronization With Synch-Check Relay G2-15

 G2.9.2. Frequency/Speed Control G2-15

 G2.9.3. Excitation System Requirements G2-15

 G2.9.4. Voltage Regulator G2-16

 G2.9.5. Power Factor Controller G2-17

G2.10. INDUCTION GENERATORS G2-17

G2.11. DC GENERATORS G2-17

 G2.11.1. Inverters Capable of Stand-Alone Operation G2-17

 G2.11.2. Inverters Incapable of Stand-Alone Operation G2-18

G2.12. SPECIAL PROTECTION SYSTEMS G2-19

G2.13. REMEDIAL ACTION SCHEME (RAS) PARTICIPATION REQUIREMENT FOR GENERATION FACILITIES G2-19

G2.14. EVENT RECORDER G2-20

G2.15. EMERGENCY GENERATOR REQUIREMENTS G2-20

 G2.15.1. “Break Before Make” G2-20

 G2.15.2. “Make Before Break” G2-20

 G2.15.3. Interconnection Requirements G2-20

 G2.15.3.1. Interconnection Protection Study G2-21

 G2.15.3.2. Transfer Switch G2-21

 G2.15.3.3. Notification and Documentation G2-21

 G2.15.3.4. Operation/Clearance G2-21

 G2.15.3.5. “Break Before Make” Specific Requirements G2-21

 G2.15.3.5.1. Transfer Switch G2-21

 G2.15.3.6. “Make Before Break” Requirements G2-22

 G2.15.3.6.1. Transfer Switch G2-22

 G2.15.3.6.2. Manual Disconnect G2-22

 G2.15.3.6.3. Synchronizing Function G2-22

 G2.15.3.6.4. Protection G2-23

 G2.15.3.6.5. Dedicated Transformer G2-23

G2.16. PARALLEL-ONLY (NO SALE) GENERATOR REQUIREMENT G2-23

G2.17. GENERATION ENTITY-OWNED PRIMARY OR TRANSMISSION VOLTAGE TAP LINES (60 KV AND ABOVE) G2-24

G2.18. PG&E PROTECTION AND CONTROL SYSTEM CHANGES WHICH MAY BE REQUIRED TO ACCOMMODATE GENERATOR INTERCONNECTION G2-24

G2.19. DIRECT TELEPHONE SERVICE G2-25

G2.20. STANDBY STATION SERVICE G2-25

G2.21. STATION BATTERY G2-25

SECTION G3: OPERATING REQUIREMENTS FOR TRANSMISSION GENERATION ENTITIES G3-1

PURPOSE G3-1

APPLICABILITY G3-1

G3.1. REACTIVE AND VOLTAGE CONTROL REQUIREMENTS FOR GENERATORS G3-1

 G3.1.1. Synchronous Generator Control G3-2

 G3.1.1.1. Frequency/Speed Control G3-2

 G3.1.1.2. Voltage Control G3-2

 G3.1.1.3. Power System Stabilizer Operating Requirements For Generators G3-2

 G3.1.1.4. Power Factor Control G3-2

 G3.1.2. Non-Synchronous Generator Control (without Var Control) G3-3

G3.1.2.2. Induction Generators Larger Than 40 kW	G3-3
G3.1.3. Inverter-Based Generating Facilities.....	G3-3
G3.2. GENERATOR STEP-UP TRANSFORMER	G3-4
G3.3. POWER QUALITY REQUIREMENTS	G3-4
G3.3.1. Voltage Fluctuation Limits	G3-4
G3.3.2. Harmonic Limits	G3-4
G3.4. VOLTAGE RIDE-TROUGH REQUIREMENTS	G3-5
SECTION G4: OPERATING PROCEDURES FOR TRANSMISSION GENERATION ENTITIES	G4-1
PURPOSE	G4-1
APPLICABILITY.....	G4-1
G4.1. JURISDICTION OF THE CAISO AND THE PG&E GRID CENTER (GCC).....	G4-1
G4.2. COMMUNICATIONS.....	G4-1
G4.2.1. Daily Capacity and Energy Reports	G4-2
G4.2.2. Voltage Control Operation and Other Service Requirements.....	G4-2
G4.2.3. Paralleling to and Separating from PG&E (Attended Generating Facilities Only)	G4-3
G4.2.4. Clearances and Switching Requests	G4-3
G4.2.5. Unusual or System Emergency Conditions	G4-3
G4.2.6. Emergency/Backup Generators.....	G4-4
G4.2.7. Other Communications	G4-4
G4.3. UNATTENDED GENERATING FACILITIES.....	G4-5
G4.3.1. Verification of Energized Circuit.....	G4-5
G4.3.2. Loss of Power/Automatic Re-paralleling.....	G4-5
G4.3.3. Event Recorder	G4-6
G4.4. PROCEDURES ON TRANSFER TRIP PROTECTION FOR GENERATION FACILITIES	G4-6
G4.4.1. Purpose and Definition.....	G4-6
G4.4.2. Separation Following Loss of Transfer-Trip Protection.....	G4-7
G4.4.3. Procedures.....	G4-7
G4.4.4. Separation Orders.....	G4-8
G4.4.5. Non-Compliance Separation Order.....	G4-8
G4.4.5. Re-parallel of Generating Facility After Restoration of TT Protection.....	G4-8
G4.5. GENERATION ENTITY INTERFERENCE WITH POWER QUALITY	G4-9
SECTION G5: ENERGIZATION AND SYNCHRONIZATION REQUIREMENTS FOR TRANSMISSION GENERATION ENTITIES	G5-1
PURPOSE	G5-1
G5.1. TEST RESULTS AND/OR INFORMATION REQUIRED PRIOR TO PRE-PARALLEL TESTING	G5-1
G5.1.1. Proving Insulation.....	G5-1
G5.1.2. Proving Ratios.....	G5-2
G5.1.3. Circuit Breakers and Circuit Switchers.....	G5-2
G5.1.4. Current Transformers and Current Circuits.....	G5-2
G5.1.5. Relays	G5-3
G5.1.6. Primary Disconnect Switch	G5-3
G5.1.7. RTU/RIG/DPU	G5-3
G5.1.8. Station Battery.....	G5-3
G5.2. PRE-PARALLEL INSPECTION (PPI)	G5-3
G5.2.1. Functional Tests.....	G5-4
G5.2.2. Data Telemetry Tests.....	G5-4
G5.3. REQUIREMENTS FOR PARALLEL GENERATOR OPERATION.....	G5-5
G5.3.1. Clearance for Parallel Operation (For Testing Purposes Only)	G5-5
G5.3.2. Impedance and Directional Relay Tests	G5-5
G5.3.3. Generator Load Tests	G5-6
G5.3.4. Power System Stabilizer (PSS)	G5-6
G5.3.5. Model Testing and Validation Report.....	G5-8
G5.3.6. Signage Requirements	G5-8

G5.4. PERMISSION TO COMMENCE COMMERCIAL OPERATION	G5-8
G5.5. GENERAL NOTES	G5-9
SECTION G6: SITING POLICY AND REQUIREMENTS FOR TRANSMISSION GENERATION ENTITIES	G6-1
PURPOSE	G6-1
APPLICABILITY	G6-1
POLICY	G6-1
G6.1. CRITERIA FOR NEW OR PROPOSED RE-POWERING PROJECTS	G6-1
G6.1.1. 60/70 kV, 115kV, 230kV & 500kV TRANSMISSION FACILITIES	G6-1
G6.1.2. GENERATOR TAP LINES	G6-1
APPENDIX A: WHERE TO OBTAIN REFERENCE DOCUMENTS AND INFORMATION	AA-1
APPENDIX D: ENGINEERING NUMBERED DOCUMENTS	AD-1
APPENDIX F: TELEMETERING AND TRANSFER TRIP FOR TRANSMISSION GENERATION ENTITIES	AF-1
F.0. NOTIFICATION	AF-2
F.1. APPLICATIONS	AF-2
F.2. GENERAL REQUIREMENTS	AF-3
F2.1. EMS/SCADA Telemetry	AF-4
F2.1.1. SCADA Telemetry for all Generation Facilities	AF-4
F2.1.2. EMS/SCADA Telemetry for Generation Facilities 1 MW or Greater	AF-5
F2.2. Protection	AF-6
F2.3. Business Telephone and Revenue Metering	AF-9
F2.4. Environmental Considerations	AF-9
F.3. INSTALLATION OF LEC ENTRANCE CABLE IN SUBSTATIONS (RISK - SEE SECTION F.0. NOTIFICATION)	AF-10
F.4. CIRCUIT REQUIREMENTS FOR PROTECTIVE RELAYING AND EMS/SCADA CIRCUITS INSTALLED BETWEEN GENERATION FACILITY STATIONS AND PG&E POWER SUBSTATIONS (RISK - SEE SECTION F.0. NOTIFICATION)	AF-10
F.5. ADDITIONAL DIRECT TRANSFER TRIP (DTT) TELECOMMUNICATION OPTIONS	AF-12
F.5.1. Option 1. All Fiber	AF-12
F.5.2. Option 2. Fiber / Channelized T1 using fiber based HVP protection	AF-13
F.5.3. Option 3 - Copper / Channelized T1 using copper HVP	AF-14
F.6. DEFINITIONS	AF-15
F7.0 FIGURES	AF-17
APPENDIX H: POWER SYSTEM STABILIZER	AH-1
APPENDIX I: LOAD OPERATING AGREEMENT	AI-1
PURPOSE	AI-1
APPLICABILITY	AI-1
ATTACHMENT	AI-1
APPENDIX J: SPECIAL AGREEMENT FOR ELECTRICAL STANDBY SERVICE	AJ-1
PURPOSE	AJ-1
APPLICABILITY	AJ-1
RELEVANT DOCUMENTS	AJ-1
APPENDIX K: LOAD SPECIAL FACILITIES AGREEMENT	AK-1
APPENDIX L: INTERCONNECTION AGREEMENTS FOR GENERATORS CONNECTING TO THE ISO CONTROLLED GRID	AL-1
PURPOSE AND APPLICABILITY	AL-1
RELEVANT DOCUMENTS	AL-1
APPENDIX M: GENERATION INTERCONNECTION DATA SHEET	AM-1

APPENDIX N: GENERATOR DATA SHEET FOR SYNCHRONOUS GENERATORS CONNECTED TO PG&E ELECTRIC SYSTEMAN-1

APPENDIX Q: GENERATOR AUTOMATIC SYNCHRONIZERS FOR GENERATION ENTITIES AQ-1

 Q1.1. OPERATION AND PERFORMANCE REQUIREMENTS.....AQ-1

APPENDIX R: PROTECTIVE RELAY REQUIREMENTS AND APPROVALSAR-1

 R.1. REQUIREMENTSAR-2

APPENDIX S: PROTECTION ALTERNATIVES FOR VARIOUS GENERATOR CONFIGURATIONSAS-1

 S1. STANDARD INTERCONNECTION METHODS WITH TYPICAL CIRCUIT CONFIGURATION FOR SINGLE OR MULTIPLE UNITS AS-1

 S1.1. Generator “Connected” Into a Ring Bus.....AS-1

 S1.2. Generator “Connected” Into a Breaker-and A-Half (BAAH) BusAS-1

 S1.3. Bus Fault Clearing.....AS-2

 S2. INTERCONNECTION METHODS WITH SPECIAL CIRCUIT CONFIGURATIONS FOR SINGLE UNIT.....AS-2

 S2.1. Alternative--Generator “Tapping” To Existing Transmission Line between Two Terminals, considered only at voltages below 230kV.....AS-2

 S2.3. Generator “Tapping” closely outside the Substation Between Two Existing TerminalsAS-3

 S2.4. Generator “Connected Close” Outside the Substation with a Dedicated LineAS-4

 S2.5. Requirements for S2.3 and S2.4 AlternativesAS-4

 S2.6. Additional Items for ConsiderationAS-5

APPENDIX T: BATTERY REQUIREMENTS FOR INTERCONNECTION TO PG&E SYSTEMAT-1
