

Important electric work in your community

We are committed to maintaining powerline safety. As part of that commitment, we will be upgrading our poles, overhead electric power lines and other equipment in the City of Sausalito. We are partnering closely with the city to help reduce the impact to your community as we install new and modernized equipment and continue to provide safe and reliable electric service.

The benefits

- Enhanced electric reliability and reduced risk of outages to our customers in Sausalito.
- Reduced future construction impacts due to newly installed equipment.
- Modernized equipment to ensure continued safety and electric reliability for homes and businesses.

What we're doing

We will be replacing or upgrading approximately 200 poles, installing four temporary new poles next to our electric substation during project construction, and performing safety work on existing underground equipment. As part of this work, the size of some poles will increase to accommodate larger equipment and meet safety requirements.

Our crews will also perform vegetation work in some locations to create adequate space to safely install new equipment and reduce outages caused by vegetation. Views from some properties may be slightly altered due to the taller poles and larger transformers.

When this work will occur

Work will begin in mid- to late February 2024 and last approximately three months. We expect work hours to be Monday through Friday during regular business hours from 8 a.m. to 5 p.m., with occasional evening and weekend work. The work will be performed in several geographic phases (Please see other side for a phased construction map).

What to expect

Temporary service interruptions may be necessary in some locations for safety, and we will notify you in advance. We will do our best to minimize impacts, but there will be intermittent construction noise. This work will involve short-term road or lane closures, and driveway and street access may be affected.

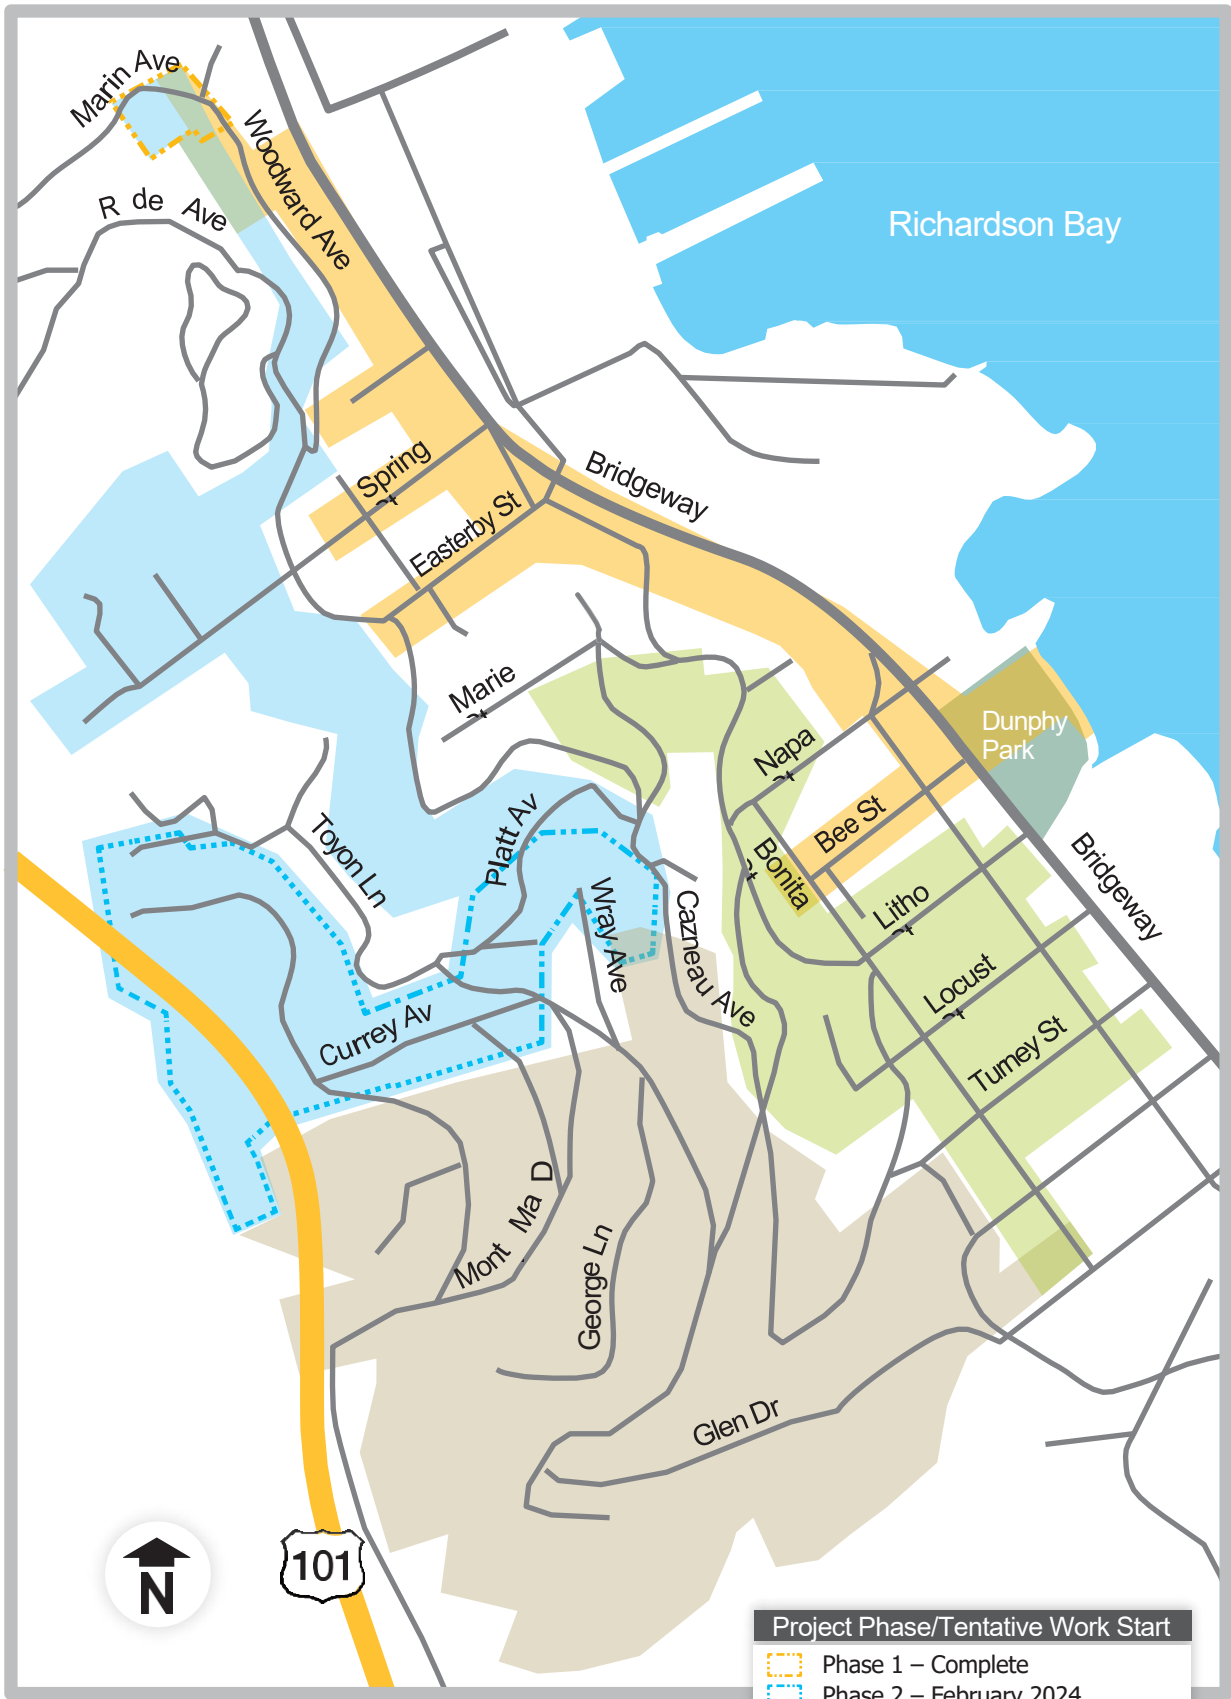

Crews will provide emergency services access in the event of an emergency. You may experience minor delays if crews are working outside your home or business. Please plan accordingly. We may need access to equipment on your property to complete this work.

Your contact for questions

For questions regarding this work, please contact our dedicated hotline at **1-800-700-5722** during normal business hours or email [**SausalitoCutoverProject@pge.com**](mailto:SausalitoCutoverProject@pge.com).

Thank you for your patience while we work to enhance electric reliability in your neighborhood.

Project Phase/Tentative Work Start

- Phase 1 – Complete
- Phase 2 – February 2024
- Phase 3 – May 2024
- Phase 4 – July 2024
- Phase 5 – September 2024
- Phase 6 – 2025
