*As reported to the California Energy Commission's Power Source Disclosure Program. SVCE and PG&E data is subject to an independent audit and verification that will not be completed until October 1, 2026. The figures above may not sum up to 100 percent due to rounding.

**Silicon Valley Clean Energy elected to receive carbon-free resource allocations from PG&E, including nuclear, as Silicon Valley Clean Energy customers already pay for it through the PG&E Power Charge Indifference Adjustment (PCIA).

**Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
