NOTICE OF PACIFIC GAS AND ELECTRIC COMPANY'S RATE INCREASE REQUEST

Pacific Gas and Electric Company's (PG&E) Energy Efficiency 2028 Business and Portfolio Plan Application to the California Public Utilities Commission (CPUC) A.26-03-017

What is being requested?

PG&E is requesting a revenue increase of approximately \$200 million for a total of **\$1.46 billion** in revenue for energy efficiency programs for the **2028–2031** period. That is in comparison to the current authorized amount of **\$1.26 billion** for the current **2024–2027** period. The request would continue funding energy efficiency (EE) programs that are designed to lower overall energy costs, reduce energy bills for participating customers and improve the availability of high-efficiency products. The programs would also provide financial incentives to help with upfront costs of energy-saving programs along with education and training for customers and their contractors. Of the \$1.46B revenue requested, PG&E's EE Portfolio budget is \$909.7 million, which is \$15.5 million lower than the current cycle's authorized amount. The remaining \$551.6M is attributed to Regional Energy Networks and Community Choice Aggregator EE Portfolios and other fiscal agent activities directed by the CPUC which is \$214.3 million higher than the current cycle's authorized amount for these activities outside of PG&E's EE programs.

¹Customers who receive electric generation as well as transmission and distribution service from PG&E.

²Customers who purchase energy from non-PG&E suppliers.

³Customers who purchase their electricity from a non-utility supplier and receive transmission and distribution service from a publicly owned utility or municipality. A \$/kWh rate comparison cannot be provided for Departed Load as the applicable rates vary by specific departed load customer categories and any average rate that could be derived, would not be representative of any particular departed load category.

If approved, residential electric rates for Energy Efficiency programs will increase overall from 2028 through 2031 compared to current rates. The table above shows the requested increase in rates for the year (2031) with the highest revenues by customer class. This increase will be phased in over the program years. Actual changes in rates may vary by year.

⁴CARE customers receive a 20% discount on transportation and procurement and are exempt from PG&E's Public Purpose Program Surcharge and California Solar Initiative Solar Water Heater rate components.

⁵Covered entities pay certain allowances directly to the Air Resources Board and will see an exemption credit on their bill.

If approved, residential gas rates for Energy Efficiency programs will increase overall from 2028 through 2031 compared to current rates. The table above shows the requested change in rates for the year (2031) with the highest revenues by customer class. This increase will be phased in over the program cycle years. Actual changes in rates may vary by year.

How would this impact the typical residential customer?

If the request is approved, a typical residential electric customer using 500 kWh per month would see a bill increase of approximately \$0.31 per month. A typical residential gas customer using 31 therms would see a bill increase of approximately \$0.13 per month. Actual impacts will vary depending on usage and are subject to CPUC regulatory approval.
