

Net Energy Metering/Solar with FERA

See how the Base Services Charge may affect your bill* depending on various kWh usage levels. Figures are for illustrative purposes only. (Begins replacing the Minimum Delivery Charge starting March 2026)

 Generation  Delivery  Base Services Charge

\$ Amount equals total electricity bill

200 kWh: Low usage

Typically smaller home in moderate to cool climate area

Current bill

New bill

450 kWh: Medium usage

Average or moderate sized home in moderate to warm climate area

Current bill

New bill

700 kWh: High usage

Larger home in warm to hot climate area

Current bill

New bill

*These figures represent illustrative monthly kWh charges and do not constitute actual projected billing amounts. Rates and bills may differ at the time of the Base Services Charge implementation. Does not include applicable taxes and fees.

Energy pricing with a separated Base Services Charge will not increase total revenues for PG&E.
