

# Electric Home (E-ELEC) A new rate plan to support home electrification

Learn more about the new Electric Home rate plan to see if it's a fit for your home and the electric technologies you use. Visit [pge.com/electrichome](https://pge.com/electrichome) to learn more.

## Rate plan highlights

Electric Home is a Time-of-Use rate plan for those that have begun to electrify their home.

- Includes a Base Services Charge and lowered kilowatt-hour (kWh) prices as of March 2026. Visit [pge.com/baseservicescharge](https://pge.com/baseservicescharge) to learn more.
- **You may be able to save money on this rate plan, especially if you are a large electricity user who can shift usage to lower-priced times of day.**
- Your home does not need to be all electric to qualify for this rate plan.

## Would Electric Home rate plan be a good fit for me?

Your home, your family size, your schedule, and your lifestyle all play a part in determining your electricity needs. **You qualify for this rate plan if you own or lease one or more of the following electric technologies:**

- Electric vehicle (EV)
- Battery storage
- Electric heat pump for water heating or climate control

## Ways to save with Electric Home

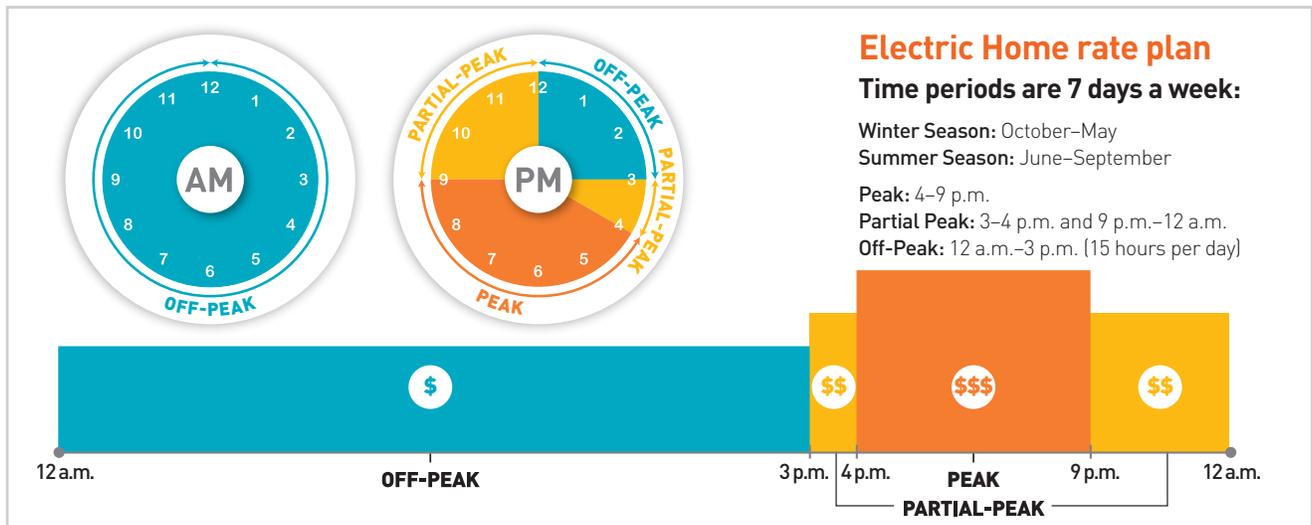

Households can maximize savings when renewables are more plentiful by **using energy during lower-priced times/off-peak hours.**

### Try these no cost saving tips:

- Charge electric vehicles (EVs) overnight after 12 a.m.
- When possible, shift energy usage, such as running large household appliances, to off-peak time periods
- If applicable, utilize stored energy from your residential battery during peak hours from 4 to 9 p.m.
