Flex Connect Approved Solution Provider List

PG&E has tested and certified the following IEEE 2030.5 Common Smart Inverter Profile (CSIP)-certified vendors for interoperability with PG&E's DERMS headend server to offer Flex Connect solutions.
The list of certified-interoperable vendors is expected to expand as PG&E continues to work with interested vendors to provide Flex Connect solutions. Prospective CSIP certified vendors will be required to be tested and configured for interoperability with PG&E's DERMS headend server.
For vendors wishing to certify interoperability with PG&E, PG&E will provide a cost estimate and timeline to complete an evaluation of the requested solutions.
