

Solar Billing Plan Monthly Energy Statement

Commercial Business Customers

Service For

Clearly show where your charges were incurred. Some customers receive PG&E service at multiple locations.

Your Account Summary

The account summary provides an overview of charges incurred, payments received, and your total amount due. Solar Billing Plan customers pay current electric charges, after credits are applied, and current gas charges, if applicable.

At-A-Glance Account Data

Your account number and due date are at the top of every page. It's good to have this information handy if you need to call us about your energy use.

5

Solar Billing Plan Highlights (04/16/2025 - 05/15/2025)

Estimated annual True-Up date	03/2026
Energy you sent to the grid	-973 kWh
Credits you earned this bill period	\$5.46

- Any unused credits for energy your system produces and sends to the grid (Energy Export Credits) will be applied to next month's bill.
- The credits you accrue will be reconciled at your annual True-Up.
- To view charges and credits for this bill period see "Details of Solar Billing Plan Charges" page.

Solar Billing Plan Highlights

This section is important to track your True-Up date and how much energy you sent to the grid and credits you earned this bill period. Any unused credits can be applied to next month's bill.

Reminder: Monitor your solar system performance levels monthly to maximize savings. Please contact your solar contractor to learn more about the performance monitoring services or if you have concerns over system performance

Details of

Solar Billing Plan Charges

This section shows the details of Peak, Off-Peak, Super Off-Peak, and other charges and credits.

Energy Produced shows energy charges for energy generated by PG&E or a Community Choice Aggregator (CCA), and energy credits for excess renewable energy generated and sent to the grid.

Energy Delivered shows energy charges for energy delivered by PG&E, and energy credits for excess renewable energy delivered to the grid.

Solar Billing Plan Charges

This is the total current Electric Monthly Charges shown under Your Account Summary.

Energy Export Credit Details

Energy Export Credit Bank

This shows your business earned energy credits for both Energy Produced and Energy Delivered. Use this chart to track credits earned and applied this billing period, and credits saved for the next billing period.

HOW ENERGY EXPORT CREDITS WORK

You may be eligible for up to two types of credits: 1. Energy Produced credits can only offset Energy Produced charges 2. Energy Delivered credits can only offset Energy Delivered charges. Any credits unable to offset your monthly charges will be saved to help offset future bill charges. You can use your Energy Export Credit Bank below to track your monthly credits.

YOUR ENERGY EXPORT CREDIT BANK

	Energy Produced Credits	Energy Delivered Credits	Total Credits
Beginning Balance	\$0.00	\$0.00	\$0.00
Earned This Bill (-973 kWh)	\$3.69	\$1.77	\$5.46
Applied This Period	-\$3.69	-\$1.77	-\$5.46
Remaining Balance	\$0.00	\$0.00	\$0.00

Any remaining energy export credits will be used to offset applicable charges at True-Up (03/2026).

9

Energy Export Credits (kWh) Earned This Bill

This chart will show if a customer installed a specific solar and storage solution. It provides details about energy units eligible for credits.

Your Energy Export Credits (kWh) Earned This Bill

Solar and Battery Energy Produced	Solar Energy Produced (Estimated or Metered) ¹	Energy Produced Eligible for Energy Export Credits ²
-973	-1120	-973
(A)	(B)	(C) = Max of A and B

Actual Billed Net Usage value may vary slightly due to rounding.

Energy Export Credits are only available for solar energy exported to the grid as required by state law.

¹ Customers with storage less than or equal to 10 kW in size are not required to meter their associated solar system.

² Energy Export Credits for Energy Produced are capped after calculating the solar energy your system produced (using estimated or metered data) and sent to the grid.

KEY TERMS

- **Energy Produced:** This section of the bill shows charges for energy produced by PG&E, and credits for your extra solar energy produced. If you are a customer of a Community Choice Aggregator (CCA), these charges and credits will be determined by your CCA, not PG&E.
- **Energy Delivered:** This section of the bill shows charges for PG&E energy delivered to your business, and credits for your extra solar energy delivered to PG&E.
- **Energy Export Credits:** Credits for excess energy your solar system produces and sends to the grid. Value of credits will vary by hour, month, and weekday/weekend to reflect the value the power provided at a given time.
- **Non-Bypassable Charges:** Charges all PG&E customers pay to help fund energy efficiency programs available to all customers as well as energy assistance programs for lower income households.

Message paid for by customers.
