Date Sent:	May 2, 2025

SUBJECT: DATA REQUESTS RELATED TO THE 2026-2028 WMP (SPD-PGE-WMP2026-003)

QUESTION 004

For Figure 6-1 and the figures in Part a of "WMP-Discovery2026-2028_DR_OEIS_001-Q023," what are the actual percentage values for each year?

- What are the baseline 2023 values for Wildfire Risk, PSPS Risk and EPSS Risk?
- Provide the three figures in Part a of "WMP-Discovery2026-2028_DR_OEIS_001-Q023," using absolute values of monetized risk in dollar values.
- What is the assumed risk reduction from operational mitigations for each year for wildfire risk (the first figure in the response to part (a) of "WMP-Discovery2026-2028_DR_OEIS_001-Q023,")?

ANSWER 004

The actual percentages of each risk and mitigation from Figure 6-1 has been extracted in to the following table.

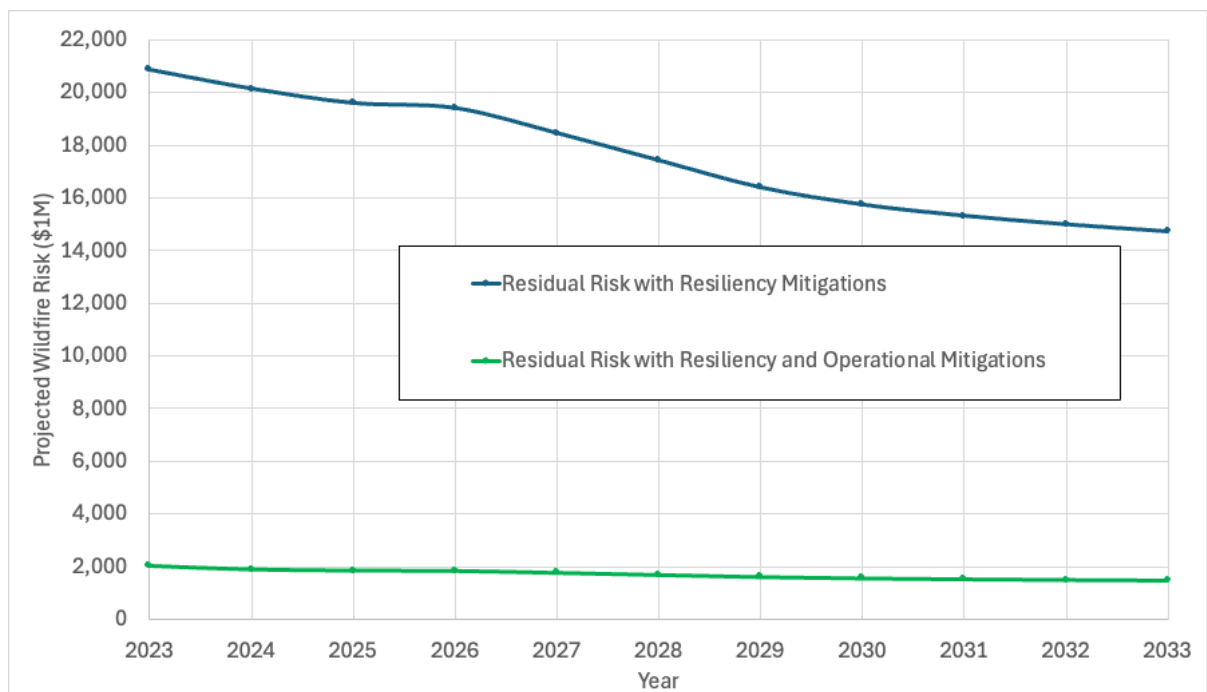

Year	Overall Residual Risk with Resiliency Mitigations	Overall Residual Risk with Resiliency and Operational Mitigations	Wildfire Residual Risk with Resiliency Mitigations	Wildfire Residual Risk with Resiliency and Operational Mitigations	EPSS Residual Risk	PSPS Residual Risk
2023	100.0%	21.1%	100.0%	9.7%	100.0%	100.0%
2024	96.9%	20.4%	96.6%	9.1%	99.1%	99.2%
2025	94.5%	20.1%	93.9%	8.9%	98.4%	98.0%
2026	93.6%	20.0%	93.0%	8.8%	98.2%	97.9%
2027	89.5%	19.6%	88.5%	8.5%	97.2%	96.9%
2028	85.1%	19.2%	83.5%	8.1%	96.6%	96.0%

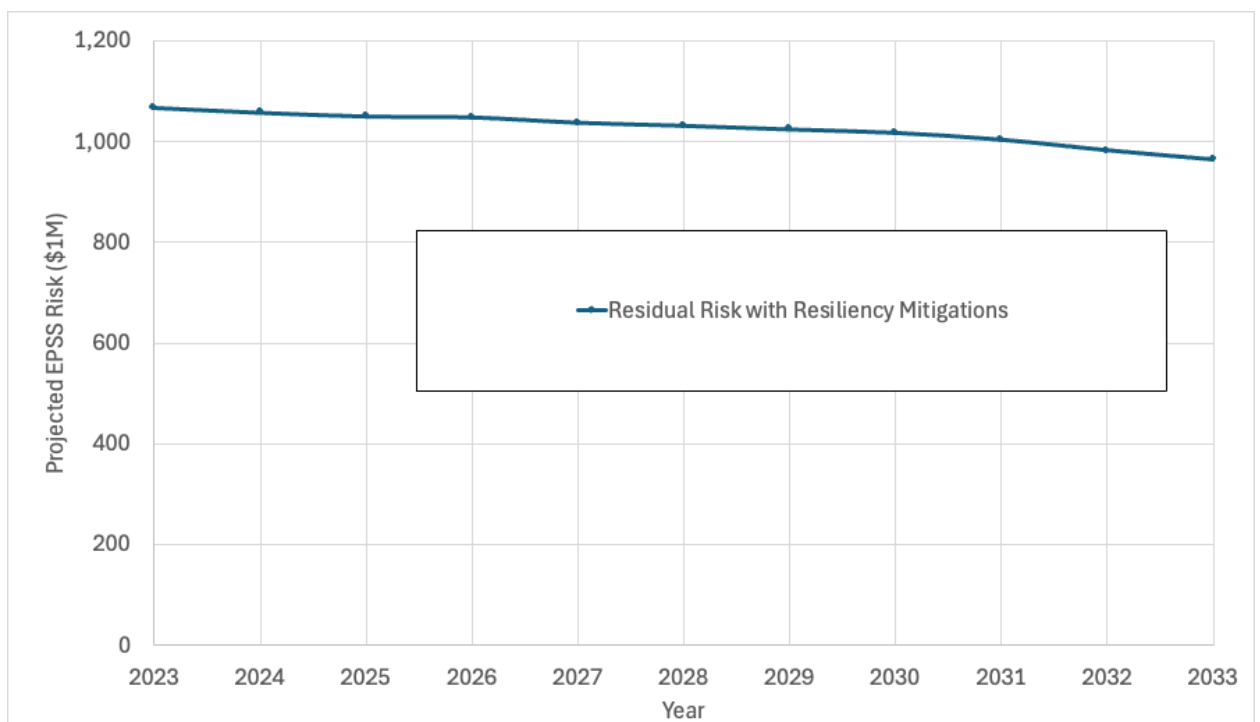

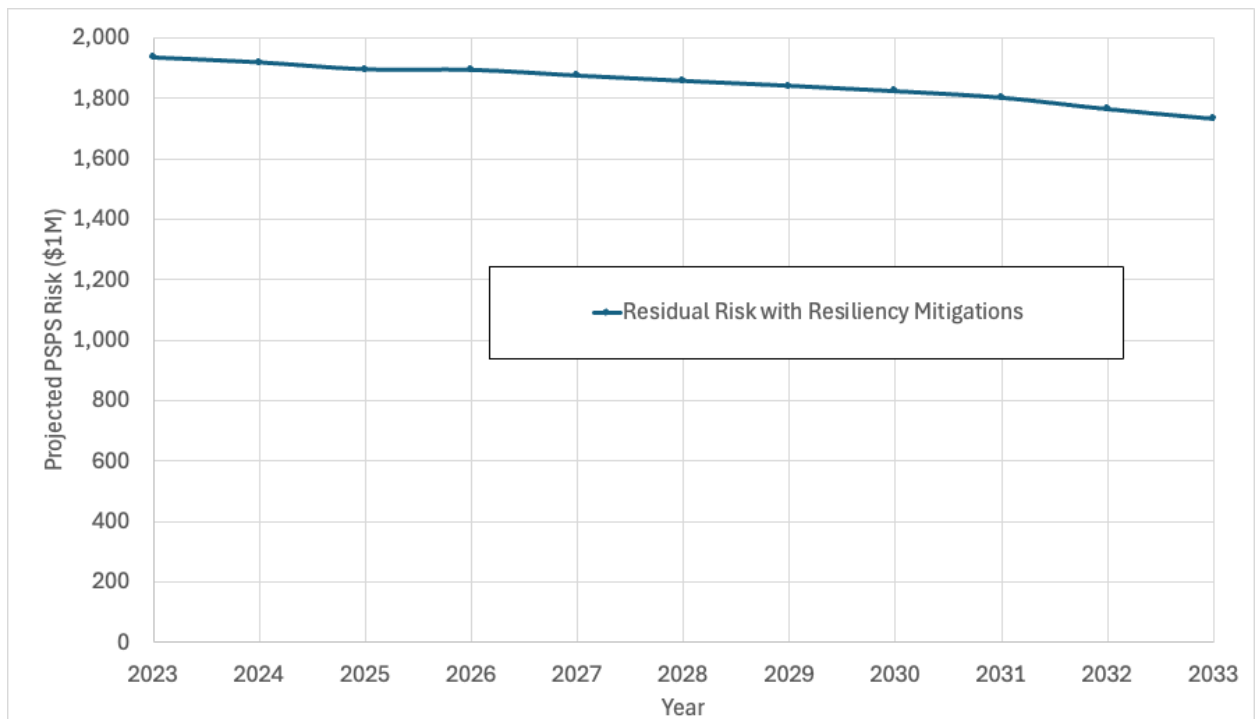

2029	80.7%	18.7%	78.6%	7.7%	95.9%	95.2%
2030	77.9%	18.4%	75.4%	7.5%	95.3%	94.2%
2031	75.9%	18.1%	73.4%	7.3%	94.0%	93.1%
2032	74.3%	17.8%	71.8%	7.2%	92.0%	91.2%
2033	73.0%	17.5%	70.6%	7.1%	90.3%	89.5%

a. The baseline risk values, in dollarized figures are listed in the below table.

Wildfire Risk (\$1M)	PSPS Risk (\$1M)	EPSS Risk (\$1M)
20,844	1,935	1,068

b. Figure 6-1 is regenerated based on dollars in the following 3 figures

- c. The following figure assumes that the operational mitigations and their effects on wildfire risk without operational mitigations are to be presented in dollarized risk, similar to the answers in part b.
