SUBJECT: FOLLOW-UP 2026-2028 BASE WMP DATA REQUESTS (SPD-PGE-WMP2026-006)

QUESTION 003

In PG&E's 2026 Annual-WMP Template Workbook submitted to Energy Safety on April 30 2025, in column L of Table 11, PG&E listed "2022 WMP", "2023 WMP" and "refer to 8.4" as the most recent proceeding to review this program.

- a. Explain what these three responses mean.
- b. Were the costs of the initiative reviewed in each of these three responses.
 - i. If so, provide evidence of the review of the costs for this initiative.
 - ii. If not, explain where the costs for these initiatives have been reviewed. If the costs for these initiatives have not been reviewed, explain why.

ANSWER 003

- a. PG&E misstated some of the proceedings in Column L of Table 11. PG&E understands that "2022 WMP", "2023 WMP" and "refer to 8.4" are not valid proceedings.
- b. No, the most recent proceeding to review costs for non-Transmission-related initiatives is PG&E's 2023 General Rate Case (GRC).
 - i. Not applicable.
 - ii. The CPUC issued a Final Decision (D.23-11-069) for PG&E's 2023 GRC on November 17, 2023. This Decision discusses PG&E's forecast capital expenditures for 2023-2025 and forecast expenses for 2023. Specifically, sections 4.2 – Wildfire Risk Mitigation Forecast, 4.3 – Wildfire System Hardening, 4.9 – Vegetation Management, and 4.4 – Other Wildfire Risk Mitigations address PG&E's wildfire mitigation forecasts. Forecasts for other programs included in the WMP, such as Overhead Equipment Replacement or Pole Replacement, are also discussed in the Final Decision in other sections. Costs for electric transmission work are reviewed in Transmission Owner (TO) rate cases, the most recent of which is PG&E TO21 (docket number ER-25-624).
