Requesting Party:	Safety Policy Division
Requester:	Edwin Schmitt
Date Sent:	June 2, 2025

SUBJECT: FOLLOW-UP 2026-2028 BASE WMP DATA REQUESTS (SPD-PGE-WMP2026-006)

QUESTION 005

In a meeting on May 9th to discuss the Wildfire Benefit Cost Analysis (WBCA) Tool, SPD understood from PG&E that a limited number of circuit segments had been evaluated according to the System Hardening Project Scoping Decision Tree and Process found in Figures PG&E-8.2.1-1, PG&E-8.2.1-2, and PG&E-8.2.1-3 in the 2026-2028 Base WMP. Per page 182 of the 2026-2028 WMP SPD understands that the decision trees will inform mitigation selection beginning in 2027.

- a. Provide the total number of circuit segments where PG&E has already applied the decision tree for mitigation work in 2027 and 2028.
- b. Provide the total number of circuit segments where PG&E intends to apply the decision tree for work done in 2027 and 2028.

ANSWER 005

- a. As of May 29, 2025, a total of 28 circuit segments have been reviewed against the System Hardening Project Scoping Decision Tree and Process found in Figures PG&E-8.2.1-1, PG&E-8.2.1-2, and PG&E-8.2.1-3 in the 2026-2028 Base WMP and progressed through scoping. Due to size or complexity, not all of these segments will be included in the 2027 workplans. Circuit segments for the 2028 workplan have not yet been evaluated using these decision trees.
- b. PG&E plans to use the System Hardening Project Scoping Decision Tree and Process found in Figures PG&E-8.2.1-1, PG&E-8.2.1-2, and PG&E-8.2.1-3 in the 2026-2028 Base WMP for an additional 35 circuit segments for consideration in the 2027 workplan. Circuit segments for 2028 have not yet been evaluated using these Decision Trees.
