<b>Date Sent:</b>	April 30, 2025

**SUBJECT: OUTAGES, PRIORITY A, MITIGATION EFFECTIVENESS AND WBCA (SPD-PGE-WMP2026-001)**

**QUESTION 009**

Provide the ignition data set used in WDRM v4 in excel format. Each row should correspond to an ignition, and each column should correspond to a feature related to the ignition used in the model.

**Answer 009**

Ignitions used for the p(ignition | outage) model are included in attachment “*WMP-Discovery2026-2028\_DR\_SPD\_001-Q008Atch01.xlsx*”.

Please note that the input data for the p(ignition | outage) model are based on failure/outage events and whether the event resulted in an ignition. Thus, the majority of rows in the model training dataset are not associated with an ignition. The ignitions can be identified by filtering the spreadsheet to where the ignition\_primary\_key column is not Null.
