Wildfire Mitigation Plans Discovery 2023-2025
Data Response

PG&E Data Request No.:	SPD_016-Q004		
PG&E File Name:	WMP-Discovery2023-2025_DR_SPD_016-Q004Supp01		
Request Date:	May 30, 2024	Requester DR No.:	SPD_WSPS_PG&E_2024_006
Date Sent:	June 4, 2024 Supp01: June 27, 2024	Requesting Party:	Safety Policy Division
PG&E Witness:		Requester:	Henry Sweat

SUBJECT: REQUEST FOR CONFIDENTIAL FILES

QUESTION 004

Provide GIS data that show progressive sectionalization of EPSS-enabled circuits:

- a. Data snapshot of circuits from January 1, 2022
- b. Data snapshot of circuits from January 1, 2023
- c. Data snapshot of circuits from January 1, 2024

ANSWER 004 SUPPLEMENTAL 01

PG&E has prepared this response per clarification discussion with the Safety Policy Division on June 13, 2023. The response to Question No. 004 and Question No. 005 of this request includes active devices on PG&E's system which isolate protective zones. Please note, numbers reported out regarding sectionalizing devices in Wildfire Mitigation Plans varies over the years due to business-driven decisions, such as replacing or removing some sectionalizing devices. The lists provided in these responses includes active devices in PG&E service territory as of June 26, 2024.

Please see "*WMP-Discovery2023-2025_DR_SPD_016-Q004Supp01Atch01.xlsx*" for the requested information.

PG&E is compiling a GIS data file inclusive of the data requested in both Question No. 004 and Question No. 005 and will provide as soon as its available. Please note, changes that have occurred on a circuit over time are not visually represented in GIS data. The file being provided will include a snapshot of devices that are presently active. The data will show the exact location of the sectionalizing device, however, will not delineate its downstream effect in the attached line work. The circuit alignment included represents the entire circuit, not just the protected portion, and should be used for reference only.

Answer 004

PG&E is still compiling data and will provide the requested information as soon as possible.
