QUESTION 006

Provide the analysis referenced in ACI PG&E-23-26 which computes the risk associated with EPSS-enablement thresholds. SPD understands the analysis shows a demonstration of trade-offs between reliability and wildfire risk mitigation effectiveness for each FPI level, as well as inclusion of areas outside the HFTD. SPD already has access to the analysis provided with the RAMP filing, and would like to see the more detailed FPI based analysis.

ANSWER 006
