PACIFIC GAS AND ELECTRIC COMPANY
10-Year Electrical Undergrounding Plan (EUP)
Data Response

PG&E Data Request No.:	TURN_001-Q007
PG&E File Name:	EUP-PhI_DR_TURN_001-Q007
Request Date:	October 19, 2026
Requester DR No.:	001
Requesting Party:	The Utility Reform Network
Requester:	A Mireille Fall
Date Sent:	October 22, 2026
Responsible Person(s):	Nick Noyer

Subject: EUP-PGE

QUESTION 007

Please provide the total number of overhead and underground miles, separately, as part of system hardening, fire rebuild, or any other wildfire-related program over the same time period (2018-2025) on an annual basis. This should include all miles regardless of project status or cost recovery.

ANSWER 007

Please see the table below for completed overhead hardening (OH) and undergrounding (UG) miles from 2018 through 2025 as of October 19, 2026. The reported miles in the table below include overhead and undergrounding miles from all of our system hardening, fire rebuild, and other wildfire-related programs, regardless of cost-recovery.[1] It does not include line removal miles, which were not included in this request.

PG&E notes that, historically, a single project may include miles from more than one hardening method (i.e., overhead hardening, undergrounding, line removal), and its miles may be completed in different years. Miles are reported in the year they were completed.

[1] These values may differ from our 2025 System Hardening Accountability Report (SHAR). The SHAR reports only Base System Hardening and Fire Rebuild miles, uses an earlier data snapshot, and does not include Butte Rebuild or Community Rebuild work, nor other programs not funded by the System Hardening Program in the GRC, such as Rule 20A or Work Requested by Others.

	System Hardening		Fire Rebuild		Butte Rebuild		Community Rebuild
