Undergrounding Map
Yolo County

Undergrounding is one of many layers of protection that PG&E uses to reduce the risk of wildfires and keep our customers and hometowns safe. The map below shows the approximate locations of recently completed or forecast projects for 2026, as well as areas we have identified for potential work in 2027-2028. Forecast miles include areas that are in any stage of the planning process and projects are subject to change.

2026 COMPLETE/FORECAST	2027 FORECAST*	2028 FORECAST*
0 MILES	**0** MILES	**<1** MILE

*Extended forecast is preliminary and has a higher potential for changes.

To view an interactive map of undergrounding throughout our service area, go to pge.com/wildfiresafety-upgrades and select the "Undergrounding/System Upgrades" layer.

Data as of 10/9/2026. Maps are for illustrative purposes. Projects may be only partially within incorporated city boundaries and forecast mileage is approximate. Extended forecast is preliminary and has a higher potential for changes. Forecasts can change as our risk model evolves to address the greatest wildfire risk. Forecast miles also exceed annual targets and include Rule 20A projects initiated by agencies in high fire-risk areas. Mileage in a community may increase or decrease due to access, weather, permitting or other constraints. In most cases, if a project is not completed during the year originally identified, it will continue through planning/construction phases during subsequent years. Mileage represents projects that will be energized in a given year. Construction for a project may begin before the year of energization, and final property and road restoration work may occur after the year of energization.
