The Policy and Guidelines require investor-owned utilities (IOUs), when seeking to divest of surplus real property, to give California Native American Tribes (Tribes) a right of first offer on the property before the IOU may offer the property on the open market. The Policy and Guidelines provide for certain exceptions, including that transactions involving lands required to support continued operation are not subject to the right of first offer. PG&E has determined that all of the lands associated with Hamilton Branch are necessary to support continued operation of the project. The majority of the lands are underwater, and the rest of the acreage lies under and adjacent to operating facilities and, as such, is not separable from Project operations."
